### Farmers' Review

Charlesbridge

The iconography of Manhattan Island, 1498-1909 compiled from original sources and illustrated by photo-intaglio reproductions of important maps, plans, views, and documents in public and private collections

### **Exploring Manhattan's Landmark**

**Neighborhoods** Michael Grant

In 1845 a blight of unknown origin destroyed the potato crop in Ireland triggering a series of events that would change forever the course of Ireland's history. The British government called

the famine an act of God. The Irish called it genocide. By any name the famine caused the death of over one million men, women, and children by starvation and disease. Another two million were forced to flee the country. With the famine as a backdrop, this is a story about two families as different as coarse wool and fine silk. Michael Ranahan, the son of a tenant farmer, dreams of breaking his bondage to the land and going to America. The passage money has been saved. He's made up his mind to go. And then-the blight strikes and Michael must put his dream on hold. The landlord, Lord Somerville, is a compassionate man who struggles to preserve a way of life without compromising his ideals. To add to his troubles, he

has to deal with a recalcitrant daughter who chafes at being forced to live in a country of "bog runners." In *The Time Of Famine* is a story of survival. It's a story of duplicity. But most of all, it's a story of love and sacrifice.

### Calico Dorsey

Charlesbridge Publishing  
Late one winter afternoon in the small town of Chosen, New York, professor George Clare knocks on his neighbor's door with terrible news: he returned from work to find his wife, Catherine, murdered in their bed. Someone took an ax to her head while their three-year-old daughter, Franny, played alone in her room across the hall. Recent transplants to Chosen, the Clares have not received the warmest welcome; once a thriving dairy farm, their home is

haunted by the tragedy that left the former owner's three sons orphaned and adrift. As one dark secret peels away to reveal others-- and as the Clare marriage reveals itself to have a sinister darkness that rivals the farm's history-- Elizabeth Brundage offers a rich and complex portrait of the scars that can haunt a community for generations and the dark longings inside each and every one of us that drive us to do inexplicable things.

### **The Manhattan Project**

Arcadia Publishing

A clever new spin on "Old MacDonald," this fun book explores the popular trend of urban farming. From rooftop farms and gardens on Manhattan high rises to neighborhood gardens in empty lots in Atlanta to hydroponic gardens in Seattle, growing food locally has become an important part of city-dwelling life. Set to the tune of the popular children's song, this bouncy rhyming text will get everyone reading (or singing) out loud. If you're not comfortable singing aloud, download the free recording of the song created by popular children's performer Caspar Babypants (aka

Chris Ballew, lead singer and songwriter for the band The Presidents of the United States of America). Six North American cities are highlighted, but included in the back matter are tips and tricks on how to alter the text so you can sing about your own hometown gardens. Back matter also includes more information about the different types of gardens introduced, additional resources, and the sheet music for the song.

At times hilarious, at other times thoughtful, this book is more than an account of a family which goes to live on a farm. The events described here took the Sherry's deep into a terra incognita of the spirit as well as the land. It is that quality: the sense of adventure and of patterns being broken which gives Maggie's Farm a flavor all its own.

Random House Digital, Inc.

The Dry Creek Chronicles offer a window onto the daily lives of Idaho families who owned and worked the land in the Dry Creek Valley and Green Meadow, southwestern Idaho, from 1863 to 1900. Two nineteenth century

farming communities, one in the creek valley and one on the floodplain of the Boise River, forged an enduring social bond through marriage and shared economic fortunes in similar environments. Over the course of forty years, however, their destinies diverged: one remained rural for more than 150 years, while the other became a settled part of nearby Boise City. This is the story of the families who created those communities.

**Old Manhattan Has Some Farms** Charlesbridge  
**The Neighborhood Manhattan Forgot** New Society Publishers  
 Audubon Park's journey from farmland to cityscape The study of Audubon Park's origins, maturation, and disappearance is at root the study of a rural

society evolving into an urban community, an examination of the relationship between people and the land they inhabit. When John James Audubon bought fourteen acres of northern Manhattan farmland in 1841, he set in motion a chain of events that moved forward inexorably to the streetscape that emerged seven decades later. The story of how that happened makes up the pages of *The Neighborhood Manhattan Forgot: Audubon Park and the Families Who Shaped It*. This fully illustrated history peels back the many layers of a rural society evolving into an urban community, enlivened by the people who propelled it forward: property owners, tenants, laborers, and servants. *The Neighborhood Manhattan Forgot* tells the intricate tale of how individual choices in the face of family dysfunction, economic crises, technological developments, and the myriad daily occurrences that elicit personal reflection and change of course pushed Audubon Park forward to the cityscape that distinguishes the neighborhood today. A longtime evangelist for

Manhattan's Audubon Park neighborhood, author Matthew Spady delves deep into the lives of the two families most responsible over time for the anomalous arrangement of today's streetscape: the Audubons and the Grinnells. Buoyed by his extensive research, Spady reveals the darker truth behind John James Audubon (1785-1851), a towering patriarch who consumed the lives of his family members in pursuit of his own goals. He then narrates how fifty years after Audubon's death, George Bird Grinnell (1849-1938) and his siblings found themselves the owners of extensive property that was not yielding sufficient income to pay taxes, insurance, and maintenance. Like the Audubons, they planned an exit strategy for controlled change that would have an unexpected ending. Beginning with the Audubons' return to America in 1839, *The Neighborhood Manhattan Forgot* follows the many twists and turns of the area's path from forest to city, ending in the twenty-first century with the Audubon name repurposed in today's historic district, a

multiethnic, multi-racial urban neighborhood far removed from the homogeneous, Eurocentric Audubon Park suburb.

"The vertical farm is a

world-changing innovation whose time has come.

Dickson Despommier's visionary book provides a blueprint for securing the world's food supply and at the same time solving one of the gravest

environmental crises facing us today."--Sting Imagine a world where every town has their own local food source, grown in the safest way possible, where no drop of water or particle of light is wasted, and where a simple elevator ride can transport you to nature's grocery store - imagine the world of the vertical farm. When Columbia professor Dickson Despommier set out to solve America's food, water, and energy crises, he didn't just think big - he thought up.

Despommier's stroke of genius, the vertical farm, has excited scientists, architects, and politicians around the globe. Now, in this groundbreaking book, Despommier explains how the vertical farm will have an incredible impact on changing the face of this planet for future generations. Despommier takes readers on an incredible journey inside the vertical farm, buildings filled with fruits and vegetables that will provide local food sources

for entire cities. Vertical farms will allow us to: - Grow food 24 hours a day, 365 days a year - Protect crops from unpredictable and harmful weather - Re-use water collected from the indoor environment - Provide jobs for residents - Eliminate use of pesticides, fertilizers, or herbicides - Drastically reduce dependence on fossil fuels - Prevent crop loss due to shipping or storage - Stop agricultural runoff Vertical farms can be built in abandoned buildings and on deserted lots, transforming our cities into urban landscapes which will provide fresh food grown and harvested just around the corner. Possibly the most important aspect of vertical farms is that they can be built by nations with little or no arable land, transforming nations which are currently unable to farm into top food producers. In the tradition of the bestselling *The World Without Us*, *The Vertical Farm* is a completely original landmark work destined to become an instant classic.

Learn how to use natural no-till systems to increase profitability, efficiency,

carbon sequestration, and soil health on your small farm. The Organic No-Till Farming Revolution is the comprehensive farmer-developed roadmap showing how no-till lowers barriers to starting a small farm, reduces greenhouse gas emissions, increases efficiency and profitability, and promotes soil health. Farming without tilling has long been a goal of agriculture, yet tilling remains one of the most dominant paradigms; almost everyone does it. But tilling kills beneficial soil life, burns up organic matter, and releases carbon dioxide. If the ground could instead be prepared for planting without tilling, time and energy could be saved, soil organic matter increased, carbon sequestered, and dependence on machinery reduced. This hands-on manual offers: Why roller-crimper no-till methods don't work for most small farms A decision-making framework for the four no-till methods: occultation, solarization, organic mulches grown in place, and applied to beds Ideas for starting a no-till farm or transitioning a working farm A list of tools, supplies, and sources. This is the only manual of

its kind, specifically written for natural and small-scale farmers who wish to expand or explore chemical-free, regenerative farming methods.

When the term “ageism” was coined in 1969, many problems of exclusion seemed resolved by government programs like Social Security and Medicare. As people live longer lives, today’s great demotions of older people cut deeper into their self-worth and human relations, beyond the reach of law or public policy. In *Ending Ageism, or How Not to Shoot Old People*, award-winning writer and cultural critic Margaret Morganroth Gullette confronts the offenders: the ways people aging past midlife are portrayed in the media, by adult offspring; the esthetics and politics of representation in photography, film, and theater; and the incitement to commit suicide for those with early signs of “dementia.” In this original and important book, Gullette presents evidence of pervasive age-related assaults in contemporary societies and their chronic affects. The sudden onset of age-related shaming can occur anywhere—the shove in the street, the cold shoulder at the party, the deaf ear at the

meeting, the shut-out by the personnel office or the obtuseness of a government. Turning intimate suffering into public grievances, *Ending Ageism, Or How Not to Shoot Old People* effectively and beautifully argues that overcoming ageism is the next imperative social movement of our time. About the cover image: This elegant, dignified figure--Leda Machado, a Cuban old enough to have seen the Revolution--once the center of a vast photo mural, is now a fragment on a ruined wall. Ageism tears down the structures that all humans need to age well; to end it, a symbol of resilience offers us all brisk blue-sky energy. “Leda Antonia Machado” from “Wrinkles of the City, 2012.” Piotr Trybalski / Trybalski.com.
