 The book discusses vocabulary learning strategies as an integral subgroup of language learning strategies. It defines language learning strategies in general and their features on the basis of cognitive theory and relevant models of second language acquisition as the basis for empirical research. Furthermore, the book gives a survey of research on vocabulary learning strategies and describes three original empirical studies. Thus, the book attempts at integrating the approaches of theories of second language acquisition, the theory and practice of instructed foreign language learning, and the findings of current empirical research.

 More and more students are studying English these days because it's simply imperative for their studies. English for Academic Purposes (EAP) material aims to teach students not only the language they need for their studies, but also the key study skills. EAP is taught in many varied settings around the world, and generic published materials often do not meet the requirements of the individual institutions, meaning that teachers frequently have to supplement with their own materials. This book provides: - an in-depth discussion of the challenges of writing excellent skills- and language-based EAP materials.- a checklist at the end of each

section to help you review the material you've written.- frequent tasks to focus on the crucial issues.- footnotes to explain technical terms and an alphabetical glossary for a 'dip in and out' reading experience. This book forms part of the ELT Teacher 2 Writer training course. The course is designed to help you write better ELT materials, either for publication, or simply to improve the quality of your self-produced classroom materials.

 Teaching Grammar Creatively is a practical new resource book that offers a variety of lessons and activities for everyday use in English language classes. It aims to stimulate students' imagination, humour and creativity and increase the effectiveness of grammar practice. The book offers more than 50 complete lessons covering a wide range of grammar structures, learner levels, and age groups. Each lesson is divided into two main sections: Language Awareness Activities and Creative Grammar Practice. The Language Awareness Activities are designed to introduce and provide initial practice of items that may still be unfamiliar to students. The Creative Grammar Practice section provides ideas for a deeper and more personalised familiarisation with these items, always with an element of individual creativity. Each lesson ends with the creation of a learner text - a permanent and original record of the grammar, in the form of a story or a poem for example.

 This book fills the need for a text that integrates Information and Communication Technologies (ICTs) into English for Specific Purposes (ESP). It offers insights on current methodological principles in ESP in both academic and professional contexts, drawing on authentic teaching and learning situations, and analyses best practice guidelines. Part I begins with ESP pedagogical principles and technological practice in order to focus on its two main branches: English for Academic Purposes, which includes linguistic skills and students' needs, and English for Occupational Purposes, specifically looking at Business, Medical and Translators courses. This book is a great resource for ESP researchers, educators and students, because it provides case studies of how ICTs can be used in English for multiple purposes. Authors present their experiences of integrating tools into their instructions, with each chapter contributing unique pedagogical implications.
