### Nature

This book contains the most comprehensive question bank and model answers for ZIMSEC A-Level exam questions. It also includes syllabus review notes and exercises. Examiners provide observations and tips and point out common errors that students make when answering questions. If you use this book faithfully, you can't fail, and the Grade "A" is very much within your reach.

### **Indigenous Knowledges in Global Contexts** Yale University Press

This book provides the reader with an introduction to the world of educational research, helping the reader understand the terminology and issues and providing guidance

on initiating and implementing research studies.

*Lectures in Systematic Theology* AFRICAN SUN MeDIA

Indigenous knowledges are the commonsense ideas and cultural knowledges of local peoples concerning the everyday realities of living. This collection of essays discusses indigenous knowledges and their implication for academic decolonization.

Educating Students to Improve the World V&R unipress GmbH

Updated Edition of Bestseller! Build a learning community of teachers and students through mastering the art of effective leadership! The first edition of this classic text was based on a landmark study in which the authors

surveyed over 800 K-12 teachers to find how the best principals encourage teacher growth and professionalism. The answers provided conclusive evidence that the most successful principals act as instructional leaders who advocate teacher development that enhances students' learning. The updated and expanded second edition presents new research by the Blases, along with the most recent research and insights to support the text's groundbreaking theory. Successful instructional leaders inspire their staff to develop "professional learning communities" dedicated to effective teaching practices. New to the second edition is an in-depth

analysis that shows principals how to achieve this goal. Also new are additional figures, models, and reading lists that enrich the text's original findings. Time-tested practices of instructional leadership are still central features. Principals can use these keys to success to: Build teachers' trust through continual communication  
Encourage teachers to continue their self-improvement efforts  
Motivate teachers with constructive feedback  
Promote and participate in reflective practices  
Support and encourage teachers' professional development  
Encourage your teachers to be their best through supportive

collaboration and communication. Practice real instructional leadership and develop a "professional learning community" in which effective teaching promotes continued learning.

Curriculum problems are everywhere: alert observers with a practiced eye and educated mind will find it almost impossible to read a newspaper without discovering curricular issues. The media often report about educational

reforms or even about curriculum wars with opposing parties fiercely debating the aims, content and organization of learning. Few people analyze these trends and discussions from a curricular conceptual framework. In addition, people sometimes think that their curriculum approaches and problems are unique and context-specific. However, international experience shows us that we can learn a lot from curriculum issues elsewhere. This book aims to sharpen the eyes and minds of a broader audience in identifying, understanding, addressing and reflecting upon curriculum problems. It also aims to contribute to the increased

exchange, discussion and reflection on all the current curriculum problems that form such a crucial part of learning worldwide.

*Teaching African History in Schools*  
Routledge

This collection of essays examines the relationship of prophecy to the Deuteronomistic History (Deuteronomy–2 Kings), including the historical reality of prophecy that stands behind the text and the portrayal of prophecy within the literature itself. The contributors use a number of perspectives to explore the varieties of intermediation and the cultic setting of prophecy in the ancient Near East; the portrayal of prophecy in pentateuchal

traditions, pre-Deuteronomistic sources, and other Near Eastern literature; the diverse perspectives reflected within the Deuteronomistic History; and the possible Persian period setting for the final form of the Deuteronomistic History. Together the collection represents the current state of an important, ongoing discussion. The contributors are Ehud Ben Zvi, Diana Edelman, Mignon R. Jacobs, Mark Leuchter, Martti Nissinen, Mark O'Brien, Raymond F. Person Jr., Thomas C. Römer, Marvin A. Sweeney, and Rannfrid Thelle.

Zimbabwe Foundation for Education with Production, ZIMFEP  
John Wiley & Sons

Based on the blockbuster movie starring Meryl Streep and Kevin Bacon. To help heal a marriage on the rocks, river-rafting expert Gail, her husband Tom, and their son embark on a white water adventure in Montana. Along the way, they encounter two inexperienced rafters supposedly looking for their friends downriver. Little do they know that the men are escaped convicts whose bid for freedom has a body count. Things take a turn when the young family learns that they are now the captives of two armed killers, and it becomes clear that there is much more at stake than a marriage. Desperate to evade both the police and federal marshals, the men force the family

down the river and into the mouth of a deadly class 5 white-water rapid. Careening towards mortal peril, Gail and Tom must bond together to save their family from the brutality of nature and the savageness of man. This high-stakes thriller is both a testament to the power of mother nature and a classic adventure story that is perfect for fans of CJ Box and Craig Johnson. Denis O'Neill, the screenwriter for the movie *The River Wild*, brings the striking beauty of the film into his writing and ratchets up the danger that races forward to a breathtaking conclusion.

New in this edition is a 20 page section on the

use of ICT resources in teaching and learning about statistics. The book also includes over 300 worked examples and advice on how to break down calculations into easy stages.

### **Biochemistry For Dummies** Springer Nature

In recent years, the Zimbabwe crisis rendered the country and its citizens to be a typical case of 'failed states', the world over. Zimbabwean society was and is still confronted with different challenges which include political, economic and social problems. Attempts to overcome these challenges have thrown light on the power that rests within individuals and or groups to change and even revolutionize

their localities, communities, states and ultimately the world at large. Through experience, individuals and groups have promoted ideas that have aided in changing mentalities, attitudes and behaviors in societies at different levels. This book brings together contributors from various academic disciplines to reflect on and theorize the contours of power, including the intrinsic and or extrinsic models of power, which pertain to individuals, communities, and or groups in order to transform society. Reflections are on various groups such as political movements, environmental movements, religious groups, advocacy groups, gender groups, to mention but a few,

as they struggle against marginalization, discrimination, exploitation, and other forms of oppression showing their agency or compliance.

*Handbook of Instructional Leadership* Hodder Education

Originally published in 1949 and then revised in 1979, this comprehensive introduction to systematic theology has well served countless students and pastors for more than half a century. In this paperback edition it will continue to instruct serious students of the Bible and theology. Following two introductory chapters delineating the nature, necessity, possibility, and divisions of theology, Henry

Clarence Thiessen systematically address a wide range of subjects in eight major sections -- Theism, Bibliology, Theology, Anthropology, Soteriology, Ecclesiology, Angelology, and Eschatology. Also included are two specialized indexes for further study -- an Index of Subjects and an Index of Scriptural References that includes over 4,000 entries.

### **The River Wild**

Cambridge Scholars Publishing  
 What have postcolonial Sub-Saharan African countries achieved in their education policies and programmes? How far have they contributed to successful attainment of the targeted 2015 Millennium

Development Goals (MDGs) on education? What were the constraints and barriers for developing an education system that appeals to the needs of the sub-region? Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century: Post-Millennium Development Goals is an attempt to demonstrate that Sub-Saharan Africa has the potential and capability to provide solutions to challenges facing its desire and ability to provide sustainable education to its people. To that end, the contributors are academics with an African vision attempting to come up with African home-grown perspectives to fill the gap created by the lapse of the MDGs

as the guiding vision and framework for educational provision in Africa and beyond. The book seeks to articulate and address African issues from an informed as well as objective African perspective. The book is also intended to provide insights to scholars who are interested in studying and understanding the nature of postcolonial education in the Sub-Saharan African region. Given the objectives and themes of this book, it is intended for academic scholars, undergraduate and graduate students, human rights scholars, curriculum developers, college and university academics, teachers, education policy makers, international organisations, and local and international

non-governmental organisations that are interested in African education policies and programmes. "Rethinking Postcolonial Education in Sub-Saharan Africa in the 21st Century provides contemporary reflections from multiple perspectives and re-positions the issue of education at the forefront of the debates on African development." – Lamine Diallo, Associate Professor, Wilfrid Laurier University, Canada "The book is a welcome addition to discourses and analyses on education in sub-Saharan Africa with reference to a postcolonial critique and the Millennium Development Goals framework on education in Africa." –

Michael Tonderai Kariwo, PhD, Instructor and Research Fellow, University of Alberta, Canada

**Cambridge IGCSE and O Level**

**Economics** Routledge

Each volume in the 7-volume series The World of Science Education reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, North Africa and the Middle East, and Sub-Saharan Africa. The focus of this Handbook is on research in science education in mostly former British colonies in Sub-Saharan Africa and the scholarship that most closely support this program. The reviews of the

research situate what has been accomplished within a given field in Sub-Saharan Africa rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories – focusing the changing façade of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished, what is missing and what might be done next. Implementing Deeper Learning and 21st Century Education Reforms Mobile Library While the majority of

mankind access education and while different ideologies and philosophies may motivate education, educational delivery and attainment, it is important to discuss how, through these, humanity may become more human by realising its full potential. This book addresses issues such as equality, inclusiveness, cosmopolitan worldviews and conflicting pressures in education in a manner that makes every member of the human community accountable to the others through education.

*The World of Science Education* Routledge

This collection of homilies by St. Josemaría Escrivá helps you develop a strong,

lasting friendship with the God who is close to us. St. Josemaría gives you a broad picture of the basic human and Christian virtues, so that you can not only follow closely in our Lord's footsteps, but establish and maintain a filial dialogue with God. Each of his homilies here are not only heartfelt conversations with the Christian who is immersed in ordinary life, but also a prayerful colloquy with God. With a masterful pastor's hand, St. Josemaría combines theological depth with evangelical clarity. He gives you here not only a lesson in doctrine, but an introduction to essential aspects of the Christian life. Simple, compassionate, and profound, these homilies are a full

expression of St. Josemaría's passionate, expansive love for God.

The African Film Industry McGraw-Hill Education (UK) School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and

learning and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers and post-graduate students in the fields of science education and educational policy.

A Concise Course in Advanced Level Statistics East African Publishers  
Written at a time of

uncertainty about the implications of the English government's curriculum policies, Knowledge and the Future School engages with the debate between the government and large sections of the educational community. It provides a forward-looking framework for head teachers, their staff and those involved in training teachers to use when developing the curriculum of individual schools in the context of a national curriculum. While explaining recent ideas in the sociology of educational knowledge, the authors draw on Michael Young's earlier research with Johan Muller to distinguish three models of the curriculum in terms of

their assumptions about knowledge, referred to in this book as Future 1, Future 2 and Future 3. They link Future 3 to the idea of 'powerful knowledge' for all pupils as a curriculum principle for any school, arguing that the question of knowledge is intimately linked to the issue of social justice and that access to 'powerful knowledge' is a necessary component of the education of all pupils. Knowledge and the Future School offers a new way of thinking about the problems that head teachers, their staff and curriculum designers face. In charting a course for schools that goes beyond current debates, it also provides a perspective that policy makers

should not avoid.

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education.

The nexus between education, democracy and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience. The book discusses educational successes and

challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development,

undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be

useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a

comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are interested in how the sociopolitical shapes education- how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education. Handel Kashope Wright, Professor of Education, University of British Columbia  
When Money Destroys Nations Springer  
 Science & Business Media

The production and distribution of film and audiovisual works is one of the most dynamic growth sectors in the world. Thanks to digital technologies, production has been growing rapidly in Africa in recent years. For the first time, a complete mapping of the film and audiovisual industry in 54 States of the African continent is available, including quantitative and qualitative data and an analysis of their strengths and weaknesses at the continental and regional levels. The report proposes strategic recommendations for the development of the film and audiovisual sectors in Africa and invites policymakers, professional

organizations, firms, filmmakers and artists to implement them in a concerted manner.
