This title was first published in 2000: The focus of this analysis is that of moral standards in public service, with special attention to the role(s) of officials. It presents discussion of some of the issues that seem to the contributors to be of pressing importance and that seem to have relevance for public service in the new millennium. It concentrates in

particular on public officials, and the constraints imposed on them by the political environment in liberal democracies.

Lodusky Wiley-Interscience

The amount of data being generated, processed, and stored has reached unprecedented levels. Even during the recent economic crisis, there has been no slow down or information recession. Instead, the need to process, move, and store data has only increased. Consequently, IT organizations are looking to do more with what they have while supporting gr

Promoting Equality of Opportunity for Marginalized Roma Pearson

Established in 1964, the IMF Institute provides training on macroeconomic management to officials of IMF member countries, on issues including: financial programming and policies, monetary and exchange operations, public finance, financial sector issues and macroeconomic statistics. This book considers the key issues addressed by the Institute's programme of economic management training, which policymakers need to consider when managing national economies.

A Manifesto CRC Press

Nafziger explains the reasons for the recent fast growth of India, Poland, Brazil, China, and other Pacific Rim countries, and the slow, yet essential, growth for a turnaround of sub-Saharan Africa. The book is suitable for those with a background in economics principles. The fifth edition of the text, written by a scholar of developing countries, is replete with real-world examples and up-to-date information. Nafziger discusses poverty, income inequality, hunger, unemployment, the environment and carbon-dioxide emissions, and the widening gap between rich (including middle-income) and poor countries. Other new components include the rise and fall of models based on Russia, Japan, China/Taiwan/Korea and North America; randomized experiments to assess aid; an exploration of whether information technology and mobile phones can provide poor countries with a shortcut to prosperity; and a discussion of how worldwide financial crises, debt, and trade and capital markets affect developing countries.

Adam Smith, Karl Marx, and John Maynard Keynes Prentice Hall

This guide enables engineers and engineering managers to communicate effectively with financial professionals, while offering a balanced presentation of the basics of engineering economic analysis. KEY TOPICS: Focuses on real management situations. Provides accounting/cost accounting fundamentals to measure results. Introduces the concept of "options analysis" applied to capital investment decisions. Aids in conducting economic analyses with liberal use of spreadsheets. Introduces tax considerations and their consequences. MARKET: For those interested in learning more about capital investment decision methodologies, particularly engineers and engineering managers.

History comes alive in this fascinating story of opposing views that continue to play a fundamental role in today's politics and economics. The Big Three in Economics traces the turbulent lives and battle of ideas of the three most influential economists in world history: Adam Smith, representing laissez faire; Karl Marx, reflecting the radical socialist model; and

John Maynard Keynes, symbolizing big government and the welfare state.

With the global economy still in recovery, it is more important than ever for individuals and organizations to be aware of their money and its potential for both depreciation and growth. Banking, Finance, and Accounting: Concepts, Methodologies, Tools, and Applications investigates recent advances and undertakings in the financial industry to better equip all members of the world economy with the tools and insights needed to weather any shift in the economic climate. With chapters on topics ranging from investment portfolios to credit unions, this multi-volume reference source will serve as a crucial resource for managers, investors, brokers, and all others within the banking industry.

Banking, Finance, and Accounting: Concepts, Methodologies, Tools, and Applications IGI Global

This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations

can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

Bosnia-Herzegovina Since Dayton
Routledge

In Central and Eastern European countries, inequalities for Roma families living in marginalized communities start early and are striking. Some of these inequalities reflect hard-wired family circumstances such as being born in poverty. Others reflect lack of opportunities such as limited access to those basic goods and services that are necessary not only for realizing one's potential in life, but also for living with dignity. Gaps between Roma and non-Roma widen over the lifecycle in a way that reinforces and perpetuates

disadvantage and translates into significantly unequal outcomes, despite the fact that Roma report having similar aspirations to those of their non-Roma neighbors. Promoting equal opportunities for disadvantaged Roma is not only an imperative for societies that want to call themselves fair, but it is also a smart economic choice, especially in those countries where populations are aging rapidly. Investing early, with a particular emphasis on supporting healthy and cognitive development for disadvantaged Roma children, is likely to go a long way in promoting fair chances. However, leveling the playing field in childhood is likely not enough: disadvantaged Roma continue being exposed to unequal opportunities at key nodes in their lives, such as when pursuing education or when looking for a job. Therefore, it is as important that a broader set of policies address some of the circumstances in which a large share of Roma children grow up, including access to employment and decent living conditions for their families. Implementing interventions that help overcome these interrelated barriers will require strong ownership at the national level,

coordinated policies across different ministries and government levels, and an integrated delivery system that is grounded in approaches that are customized to local conditions and implemented in a participatory manner. Good practices in Europe and elsewhere show that inclusion of the most disadvantaged - including many Roma - is possible and the current programming cycle for European Funds represents a unique opportunity to fund such interventions.

Transexuals often believe that they were born as the wrong gender and are the victims of a terrible accident of nature. Now that medicine can change a person's gender, should the law also acknowledge that change?

New York : Vantage Press

"Innovative and thorough scholarship by an acknowledged leader in his field, one which lies at the often quite baffling intersection of linguistics and anthropology."—Donald L. Brenneis,

Editor, American Ethnologist

Ethics in Public Service for the New Millennium Simon and Schuster

Ethical Issues in Accounting offers a comprehensive and accessible introduction for students and teachers of business studies and accountancy as well as the practicing accountant. The book covers the ethical implications of several aspects of accounting: * ethics and taxation * creative accounting * ethics in accounting regulation * ethical dilemmas in the public sector * whistleblowing * various aspects of social accounting, including environmental accounting. The fitness of the accounting profession as guardians of accounting and auditing ethics is also discussed in detail.

"Lodusky" by Frances Hodgson Burnett. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited

and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

The Underground Economy in the United States Cambridge University Press

Is your job just a way to pay the bills? Are you a drudge Monday through Friday only so you can be more yourself on Saturday? It doesn't have to be this way! Never before in history has there been such an eclectic variety of money-making opportunities and cutting-edge vocations than there are in today's marketplace. There is no need to settle! And when you find the career that fits your personality, you'll discover that the work hours you once begrudged with every fiber of your being now bring you tremendous satisfaction and success. Career Match contains the ten-minute self-assessment that can change your life! After a simple quiz to determine your personality style, turn to the corresponding chapter that reads as if it was written just for you and discover what ideal work options there are for you. In this invaluable resource for all personalities: • Identify career choices that

will exhilarate you • Recognize the type of work environment and boss you need to thrive • Learn to leverage your natural strengths • Customize and speed your job search This second edition has been updated to include trending new careers in areas such as gaming, web design, alternative energy, cybersecurity, food science, and more. Whether you are a recent graduate looking for direction or a burned-out veteran seeking new inspiration, this indispensable guide will help you match who you are with what you're meant to do—with a success rate vastly greater than that of your typical match maker!

Capital Investment and Financial Decisions Cambridge University Press

How do we objectively measure scientific activities? What proportion of economic activities should a society devote to research and development? How can public-sector and private-sector research best be directed to achieve social goals? Governments and researchers from industrial countries have been measuring science and technology for more than eighty years. This book provides the first comprehensive account of the attempts to

measure science and technology activities in Western countries and the successes and shortcomings of statistical systems. Godin guides readers through the historical moments that led to the development of statistics on science and technology and also examines the socio-political dynamics behind social measurement. This enlightening account will be of interest to students and academics investigating science measurement as well as policy makers working in this burgeoning field.

Truly global in scope and ambition, the 21st Century Public Manager addresses key trends, challenges, and opportunities facing public managers across contexts and regimes. This accessible textbook aims to inspire public managers in rethinking their roles, skills, and values as

they enter a VUCA world—one characterized by volatility, uncertainty, complexity, and ambiguity. It is written for aspiring and current public managers in graduate schools and executive education programs.

An American Institution Springer

This paper reviews the linkages between infrastructure and economic development based on both formal empirical research and informal case studies. The main thesis is that economic benefits result from investments in infrastructure only to the extent that they generate a sustainable flow of services valued by consumers. Thus, an analysis of infrastructures' contributions to growth must look at the impacts of services as actually perceived, not at indirect indicators that measure only aggregate provision of infrastructure capital. The paper notes that macro and industry level research, although having its limitations, suggest a positive and statistically significant relationship between infrastructure and economic output. However the conclusions derived from this research (most of which derives from developed countries) provide little specific guidance for policy. To gain more

practical insights about how infrastructure contributes to economic growth and to improved quality of life, and to understand the welfare costs of inadequate or unreliable infrastructure, it is necessary to look at microeconomic evidence.

Particularly interesting illustrations of these relationships are to be found in developing countries where there is wide variance in the availability and quality of infrastructure.

Patterns of Local Autonomy in Europe

Cengage Learning

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of

Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic

pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare,

Albanian writer.
