The main objective of this Seminar proceedings book is to analyse the performance of the present development programmes, the issues and challenges and also reflect and think about whether and to what extent the benefits of these programmes have percolated to the weaker sections of our society- indeed, have they reached those they were meant to reach ?

The author is a prominent linguistics scholar. The study of sociolinguistics of the English language in Nigeria has assumed great importance in Nigerian universities. Against the background of key works from 1971 to 1991, and the growing debate over an optimal language policy for Nigeria, he looks at the perspectives of an individual writer, to provide an overview of the language since its earliest contacts with what is now known as Nigeria. One important gap which he identifies is the paucity of illustrative data even from the three main Nigerian languages.

What will it be like to live in Lagos 100 years after Nigeria gained independence from the British?

In 2010, eight writers came together to contribute stories to an anthology on fictional / futuristic

takes on the city of Lagos via a workshop tagged LAGOS_2060, conceived to commemorate

Nigeria's golden jubilee. The anthology that grew out of the workshop is telling in the different

versions of the future it foretells. In LAGOS_2060 - an unusual scenario planning exercise achieved

through the power and magic of a creative writing programme - there are climate change induced

natural disasters actively plugged by doomsday preachers of the day, there are serious

government institutions involved in first rate science and more often than not, these institutions

tackle and solve the energy crisis to various degrees of success. There are wars and near wars as

Lagos threatens to secede from the Nigerian state to have full control of its own economy. There

are robots, amphibious speed trains, psychedelic drugs and highly trained security operatives with

conflicts of interest, but more importantly, there are the ubiquitous Lagos people, whose industry and inventiveness seems largely unchanged, despite how much their city has travelled in the intervening half century.

The Searing Portrayal Of War That Has Stunned And Galvanized Generations Of Readers An immediate bestseller upon its original publication in 1939, Dalton Trumbo's stark, profoundly troubling masterpiece about the horrors of World War I brilliantly crystallized the uncompromising brutality of war and became the most influential protest novel of the Vietnam era. Johnny Got His Gun is an undisputed classic of antiwar literature that's as timely as ever. ?A terrifying book, of an extraordinary emotional intensity.?-The Washington Post "Powerful. . . an eye-opener." --Michael

Moore "Mr. Trumbo sets this story down almost without pause or punctuation and with a fury amounting to eloquence."--The New York Times "A book that can never be forgotten by anyone who reads it."--Saturday Review

At eleven years old a young boy is told that God has chosen him to become a Catholic missionary monk and priest; the choice is not his to make. He joins the Redemptorist Order and spends the next 11 years being schooled in the way he is expected to live for the rest of his life. He must leave his family to lead a secluded monastic life, making no close friendships and taking vows of poverty, chastity and obedience. When doubts arise in his mind he strives to overcome them, studying all the harder, but eventually he realises that he is not happy in the only life he knows. When he spends time in hospital and falls in love his thoughts crystallise. Only then is he able to make his final decision about the life he wants to live. This autobiographical work brings Stephen's story to life and its moving narrative comes to a truly emotional conclusion.

Biomass, Biofuels, Biochemicals encompasses the potential of microbial electrochemical technologies, delineating their role in developing a technology for abating environmental crisis and enabling transformation to a sustainable future. The book provides new and futuristic methods for bioelectrogenesis, multiple product synthesis, waste remediation strategies, and electromicrobiology generation which are widely essential to individuals from industry, marketing, activists, writers, etc. In addition, it provides essential knowledge transfer to researchers, students and science enthusiasts on Microbial Electrochemical Technologies, detailing the functional mechanisms employed, various operational configurations, influencing factors governing the reaction progress and integration strategies. With these key topics and features, the book generates interest among a wide range of people related to renewable energy generation and sustainable environmental research. - Depicts the holistic view of the multiple applications of Microbial Electrochemical Technologies (METs) in a unified comprehensible manner - Provides strategic integrations of MET with various bioprocesses that are essential in establishing a circular biorefinery - Widens the scope of the existing technologies, giving up-to date, state-of-the-art information and knowledge on research and commercialization - Contains topics that are lucid, providing interdisciplinary knowledge on the environment, molecular biology, engineering, biotechnology, microbiology and economic aspects - Includes more than 75 illustrations, figures, diagrams, flow charts, and tables for further study

Do financial derivatives enhance or impede innovation? We aim to answer this question by examining the relationship between equity options markets and standard measures of firm innovation. Our baseline results show that firms with more options trading activity generate more patents and patent citations per dollar of R&D invested. We then investigate how more active options markets affect firms' innovation strategy. Our results suggest that firms with greater trading activity pursue a more creative, diverse and risky innovation strategy. We discuss potential underlying mechanisms and show that options appear to mitigate managerial career concerns that

would induce managers to take actions that boost short-term performance measures. Finally, using several econometric specifications that try to account for the potential endogeneity of options trading, we argue that the positive effect of options trading on firm innovation is causal.

Using both qualitative and quantitative research methods, the authors investigate the issue of language conflict situations in Nigeria resulting from the contact of Nigeria's indigenous languages with one another as well as with English and Pidgin English. The study captures patterns of language preference with the help of a survey of language attitudes and loyalties covering five Nigerian states. This book provides essential material for researchers and students in Sociolinguistics and Applied Linguistics as well as for educationists and language policy specialists. **Mother Tongue for Scientific and Technological Development in Africa** KY Publications Learn how automotive Ethernet is revolutionizing in-car networking from the experts at the core of its development. "This booklet takes up the two-fold challenge of establishing the linkages between educational quality and national economic productivity, and then identifying those aspects of educational reform that are most likely to deliver enhanced levels of educational quality. The booklet presents arguments in favour of improved teacher quality as the key pathway to improved student performance ? and offers sound advice concerning the planning and timeframe required to develop and evaluate progress towards a more effective teaching force."-- p. 4.

Liquidity and Asset Prices reviews the literature that studies the relationship between liquidity and asset prices. The authors review the theoretical literature that predicts how liquidity affects a security's required return and discuss the empirical connection between the two. Liquidity and Asset Prices surveys the theory of liquidity-based asset pricing followed by the empirical evidence. The theory section proceeds from basic models with exogenous holding periods to those that incorporate additional elements of risk and endogenous holding periods. The empirical section reviews the evidence on the liquidity premium for stocks, bonds, and other financial assets.

Optimal Data Analysis: A Guidebook With Software for Windows offers the only statistical analysis paradigm that maximizes (weighted) predictive accuracy. This unique book fully explains this paradigm and includes simple-to-use software that empowers a universe of associated analyses. For any specific sample and exploratory or confirmatory hypothesis, optimal data analysis (ODA) identifies the statistical model that yields maximum predictive accuracy, assesses the exact Type I error rate, and evaluates potential cross-generalizability.

First published in 1921, and cited on the Africa's Best 100 Books List, this is a standard work on the

history of the Yorubas from the earliest times to the beginning of the British Protectorate. The first part of the book discusses the people, their country and language, religion, government, land law, manners and customs. The second part is divided into four periods, dealing first with mythological kings and deified heroes; with the growth, prosperity and oppression of the Yoruba people; the time of revolutionary wars and disruption; and, finally, the arrest of disintegration, inter-tribal wars, and the coming of the British. There are two appendices, on dealing with treaties and agreements, the other giving tables of Yoruba kings, rulers, and chiefs. The book also includes an index and map of the Yoruba country.

This varied collection of essays explores the vast, complex and contentious subject of language in West Africa. The essayists adopt the perspective that languages - indigenous African and European - and the attitudes of their speakers are inseparable from social and historical identities and wider debates about political cultures. A major aspect of the work covers the attitudes of Nigerians of differing linguistic identities and social profiles to foreign languages vis-a-vis indigenous languages. Other contributors examine the conflicts resulting from the situation of a multiplicity of languages - e.g. Igbo as internal conflict, against English as external conflict; language attitude in market transaction; and attitudes towards pidgin. One essay branches out into philosophies of cultural relativism, human communication and intercultural relations, presenting a critique of Anta Diop and Kwasi Wiredu. A final piece considers the utilisation of information for development in Nigeria, and cultural shock.

It has long been recognized that the Persian period is crucial to the history of the formation of the biblical corpora. The essays presented in this volume explore this critically important era, reconstructing the socio-economic shifts that took place as well as the religio-theological environment of the Judean community and its neighbours. The topics of this volume, sociological, archaeological and theological, include: ethnicities and administration in Persian-era Palestine (Yigal); the historical origin of the concept of the piety of the poor at Qumran (Ro); the development of the theological concept of Yhwh's punitive justice (Ro); social, cultural and demographic transformations in Persian-period Judah (Faust); changes in Judah and its neighbouring provinces in the fourth century BCE (Fantalkin and Tal); some Greek views of the Persian empire (Sano). The papers collected in this volume were presented at an international conference held at International Christian University (ICU) in Tokyo, February 17-19, 2011, a testimony to the fruitfulness of this unusual Asian-Israeli scholarly dialogue.
