What does it really take to succeed in business today? In *A New Brand World*, Scott Bedbury, who helped make Nike and Starbucks two of the most successful brands of recent years, explains this often mysterious process by setting out the principles that helped these companies become leaders in their respective industries. With illuminating anecdotes from his own in-the-trenches experiences and dozens of case studies of other winning—and failed—branding efforts (including Harley-Davidson, Guinness, The Gap, and Disney), Bedbury offers practical, battle-tested advice for keeping any business at the top of its game.

Sticky Branding Wiley

In this long-awaited book

from the world's premier brand expert and author of the seminal work *Building Strong Brands*, David Aaker shows managers how to construct a brand portfolio strategy that will support a company's business strategy and create relevance, differentiation, energy, leverage, and clarity. Building on case studies of world-class brands such as Dell, Disney, Microsoft, Sony, Dove, Intel, CitiGroup, and PowerBar, Aaker demonstrates how powerful, cohesive brand strategies have enabled managers to revitalize brands, support business growth, and create discipline in confused, bloated portfolios of master brands, subbrands, endorser brands, cobrands, and brand extensions. Renowned brand guru Aaker demonstrates that assuring that each brand in the portfolio has a clear role and actively reinforces and supports the other portfolio brands will profoundly affect the firm's profitability. *Brand Portfolio Strategy* is required reading not only for brand managers but for all managers with bottom-line responsibility to their shareholders. *The Shift* John Wiley &

Sons

Management fads come and go in the blink of an eye, but branding is here to stay. Closely watched by the stock market and obsessed over by the biggest companies, brand identity is the one indisputable source of sustainable competitive advantage, the vital key to customer loyalty. David Aaker is widely recognised as the leading expert in this burgeoning field. Now he prepares managers for the next wave of the brand revolution. With coauthor Erich Joachimsthaler, Aaker takes brand management to the next level - strategic brand leadership. Required reading for every marketing manager is the authors' conceptualisation of 'brand architecture' - how multiple brands relate to each other - and their insights on the hot new area of Internet branding. Full of impeccable, intelligent guidance, **BRAND LEADERSHIP** is the visionary key to business success in the future. Managing Brand Equity
John Wiley & Sons
The most important assets of any business are intangible: its company name, brands, symbols and slogans and their

underlying association, perceived quality, name awareness, and customer base. These assets, which comprise brand equity, are a primary source of competitive advantage and future earnings, contends David Aaker, a national authority on branding. Yet, research shows that managers cannot identify with confidence their brand associations, level of consumer awareness, or degree of customer loyalty. Moreover, in the last decade, managers desperate for short-term financial results have often unwittingly damaged their brands through price promotions and unwise brand extensions, causing irreversible deterioration of the value of the brand name.

Discover proven strategies for building powerful, world-class brands It's tempting to believe that brands like Apple, Nike, and Zappos achieved their iconic statuses because of serendipity, an unattainable magic formula, or even the genius of a single visionary leader. However, these companies all adopted

specific approaches and principles that transformed their ordinary brands into industry leaders. In other words, great brands can be built—and Denise Lee Yohn knows exactly how to do it. Delivering a fresh perspective, Yohn's *What Great Brands Do* teaches an innovative brand-as-business strategy that enhances brand identity while boosting profit margins, improving company culture, and creating stronger stakeholder relationships. Drawing from twenty-five years of consulting work with such top brands as Frito-Lay, Sony, Nautica, and Burger King, Yohn explains key principles of her brand-as-business strategy. Reveals the seven key principles that the world's best brands consistently implement Presents case studies that explore the brand building successes and failures of companies of all sizes including IBM, Lululemon, Chipotle Mexican Grill, and other remarkable brands Provides tools and strategies that organizations can start using right away Filled with targeted guidance for CEOs, COOs, entrepreneurs, and other organization leaders, *What Great Brands Do* is

an essential blueprint for launching any brand to meteoric heights.

As industries turn increasingly hostile, it is clear that strong brand-building skills are needed to survive and prosper. In David Aaker's pathbreaking book, *MANAGING BRAND EQUITY*, managers discovered the value of a brand as a strategic asset and a company's primary source of competitive advantage. Now, in this compelling new work, Aaker uses real brand-building cases from Saturn, General Electric, Kodak, Healthy Choice, McDonald's, and others to demonstrate how strong brands have been created and managed. A common pitfall of brand strategists is to focus on brand attributes. Aaker shows

how to break out of the box by considering emotional and self-expressive benefits and by introducing the brand-as-person, brand-as-organisation, and brand-as-symbol perspectives. A second pitfall is to ignore the fact that individual brands are part of a larger system consisting of many intertwined and overlapping brands and subbrands. Aaker shows how to manage the "brand system" to achieve clarity and synergy, to adapt to a changing environment, and to leverage brand assets into new markets and products. As executives in a wide range of industries seek to prevent their products and services from becoming commodities, they are recommitting themselves to brands as a foundation of business strategy. This new work will be essential reading for the battle-ready.

Eating the Big Fish

Harvard Business Press
The most important assets of any business are intangible: its company name, brands, symbols, and slogans, and their underlying associations, perceived quality, name awareness, customer base, and proprietary resources such as patents, trademarks, and channel relationships. These assets, which comprise brand equity,

are a primary source of competitive advantage and future earnings, contends David Aaker, a national authority on branding. Yet, research shows that managers cannot identify with confidence their brand associations, levels of consumer awareness, or degree of customer loyalty. Moreover in the last decade, managers desperate for short-term financial results have often unwittingly damaged their brands through price promotions and unwise brand extensions, causing irreversible deterioration of the value of the brand name. Although several companies, such as Canada Dry and Colgate-Palmolive, have recently created an equity management position to be guardian of the value of brand names, far too few managers, Aaker concludes, really understand the concept of brand equity and how it must be implemented. In a fascinating and insightful examination of the phenomenon of brand equity, Aaker provides a clear and well-defined structure of the relationship between a brand and its symbol and slogan, as well as each of the five underlying assets,

which will clarify for managers exactly how brand equity does contribute value. The author opens each chapter with a historical analysis of either the success or failure of a particular company's attempt at building brand equity: the fascinating Ivory soap story; the transformation of Datsun to Nissan; the decline of Schlitz beer; the making of the Ford Taurus; and others. Finally, citing examples from many other companies, Aaker shows how to avoid the temptation to place short-term performance before the health of the brand and, instead, to manage brands strategically by creating, developing, and exploiting each of the five assets in turn

[Three Threats to Brand Relevance](#) John Wiley &

Sons
The tenth annual Advertising and Consumer Psychology Conference held in San Francisco focused on branding -- a subject generating intense interest both in academia and in the "real world." The principle theory behind these conferences is that much can be gained by joining advertising and marketing professionals with academic researchers in advertising. Professionals can gain insight into the new theories, measurement tools and empirical findings that are emerging, while academics are stimulated by the insights and experience that professionals describe and the research questions that they pose. This book consists of papers delivered by experts from academia and industry discussing issues regarding the role of advertising in the establishment and maintenance of brand equity -- making this volume of interest to advertising and marketing specialists, as well as consumer and social psychologists.

"Threats to brand

relevance are always lurking around the corner. Your brand is virtually never immune from the risk of fading instead of being energized or being damaged instead of strengthened."—David Aaker From branding guru David Aaker comes *Three Threats to Brand Relevance*, a provocative new offering in the Jossey-Bass Short Format series. In *Three Threats* Aaker reveals that the key to an organization's sustained growth is to learn what it takes to bring "big" innovation to market and create barriers to competitors. Aaker also shows how well-established companies can avoid becoming irrelevant in the face of the continuing parade of marketing dynamics led by others. Building on his full-length book *Brand Relevance*, Aaker offers a guide for confronting the three threats if they emerge and shows how to put in place the strategies that will keep the threats at bay. Threat #1: A decline in category or subcategory relevance. Customers simply no longer want to buy what you are making, despite the fact you are offering a quality product and some customers love it. Threat #2: The loss of energy

relevance. Without energy the brand simply does not come to mind as other more visible brands and a decline in energy can create a perception that it is locked in the past, suitable for an older generation. Threat #3: The emergence of a "reason-not-to-buy." The brand may have a perceived quality problem or be associated with a firm policy that is not acceptable. Whether your brand is just breaking into the marketplace or has a long held place in the hearts of its consumers, any forward-thinking company can implement Aaker's proven methods and strategies as part of their organization's ongoing review of brand strategy with the help of this succinct and to-the-point resource. About the Jossey-Bass Short Format Series Written by thought leaders and experts in their fields, pieces in the Jossey-Bass Short Format Series provide busy, on-the-go professionals, managers and leaders around the world with must-have, just-in-time information in a concise and actionable format. *Aaker on Branding* Vintage
 "All marketers should heed [the] advice" of this brand marketing guru in

his latest book on digital storytelling." —Joseph V. Tripodi, former Chief Marketing Officer, Subway and Coca-Cola Stories are orders of magnitude which are more effective than facts at achieving attention, persuading, being remembered, and inspiring involvement. Signature stories?intriguing, authentic, and involving narratives?apply the power of stories to communicate a strategic message. Marketing professionals, coping with the digital revolution and the need to have their strategic message heard internally and externally, are realizing that a digital strategy revolves around content and that content is stories. Creating Signature Stories shows organizations how to introduce storytelling into their strategic messaging, and guides organizations to find, or even create, signature stories and leverage them over time. With case studies built into every chapter, organizations will realize the power of storytelling to energize readers, gain visibility, persuade audiences, and inspire action. *Spanning Silos* Brand Leadership Tom Peters--brilliant,

original, and perhaps the most inspiring and listened-to business thinker of our time--has a lot on his mind these days. And he wants to share it in *The Circle of Innovation*. The world of business is in a permanent state of flux, he argues, a state of chaos in which constant innovation is the only survival strategy--for the individual and for the organization. And he presents here a lifesaving handbook--both provocative and practical--designed to turn any organization into a perpetual innovation machine. In 400 seminars in 47 states and 22 countries in the last five years, Peters has reexamined, refined, and reinvented his views on innovation. Now he brings those seminars--and his passion--to the reader in a landmark book. It is meant, he writes, to both "terrify" and "enlighten." These are "times of matchless peril for those who fail to grasp the nettle...and times of matchless opportunity for those who do." To keep us alert, limber, and ready for action, he provokes and cajoles in chapter after chapter. Among his institutions and revelations: *We Are All*

Michelangelos. He shows how to transform every "jobholder" into a full-fledged businessperson. All Value Comes from the Professional Services. How to convert sluggish staff units into Vital Centers of Intellectual Capital Accumulation. The System is the Solution. How to build great systems--which go far beyond nuts and bolts. Create Waves of Lust. Quality is not the automatic advantage it recently was. There is a pressing need to reverse the rising tide of product and service "commoditization." Tommy Hilfiger Knows. In a crowded marketplace, branding is far more important than ever before. It's a Woman's World. How to capitalize on the fact that women purchase/are purchasing agents for well over half of U.S. commercial and consumer goods. Little Things Are the Only Things. As the Blight of Sameness encroaches on market after market, design is often the best tool in services or manufacturing for sustainable differentiation. We're Here to Live Life Out Loud. Why transformational leaders of the future must have laser-like focus, tell the

truth, and live on the lunatic fringe. The hallmarks of Tom Peters legend are an insatiable curiosity, an agile intellect, a pragmatic perspective, and an uncanny ability to gauge the global zeitgeist. These qualities are all brought to bear as Peters sets out to engage, enrage, and ultimately empower his readers, amid forces that are reshaping not only business but every aspect of human experience.
