Civic and Uncivic Values in Macedonia Cambridge University Press

2020 could be a crucial year for the Western Balkans. For over twenty years, the region has been stuck in a never-ending transition. Politics, economics, and geopolitics are still falling prey to old and new sources of instability. With the path towards EU integration still uncertain, many governments in the region are marked by autocratic tendencies, and international actors strive for a bigger say in the region. NATO is expanding to the Balkans, but regional security still depends on foreign soft power and influence. And while recipes for economic transition focus mainly on foreign direct investments that often lack transparency, Balkan societies are losing their citizens to substantial emigration. What are the factors contributing to Western Balkans instability in the age of Covid-19? Will the region continue to be ground for renewed geopolitical competition? How can the Balkans leave the transition phase and find a sustainable, balanced path onwards?

The Balkans: Nationalism, War, and the Great Powers, 1804-2012 Ledizioni

In light of Europe's prolonged state of crisis, this book reassesses the challenges and prospects of the European integration process. Scholars from diverse disciplines reflect on various types of integration by analyzing political, economic and sociological variables, while also taking legal and cultural constraints into account. Readers will learn about the dilemmas and challenges of the European transformation process as well as political reforms to overcome these challenges. The book is divided into four parts, the first of which discusses the external dimension of the European Union, including a review of development aid policies and EU foreign policy. In turn, the second part focuses on institutional change and asymmetrical integration in the EU. The third part is devoted to the rise of populism and nationalism, including an analysis of the role of civil society organizations in the Brexit. In closing, the last part highlights the crisis of the Euro as a symbol of European integration and the emerging social and economic divide between countries of the North and South.

Redefining Southeastern Europe Oxford University Press

This first volume in the bi-lingual handbook "The Auchenorrhyncha of Central Europe / Die Zikaden Mitteleuropas" (to be published in 3 volumes) is an essential and highly valuable addition to the literature available in this field since the last keys published date from 1935 (Haupt) and 1896 (Melichar) respectively. These insects are a very important group: in grassland ecosystems they are one of the most abundant and diverse groups. They are collected in enormous numbers in every entomo-ecological project and are also important from a phytopathological point of view, since many species are virus vectors and/or damage crops as well as various herbs and ornamental trees and shrubs. Simple keys allow an easy identification to the 250 species treated from Central Europe, Northern Europe and the UK. More than 250 drawings as well as 250 distribution maps are included. Almost all species are figured in (700) colour photographs. In addition, information on taxonomy, host plants, habitats, phenology, distribution and economic importance are given. Planthoppers and leafhoppers are among the most abundant and diverse taxa in terrestrial ecosystems. Therefore,

this first volume of the handbook will be a very important reference tool, not only for entomologists but for everyone working in the fields of ecology, applied zoology and nature conservation.

Südosteuropa bei aller Spezifik besser als bisher historisch zugänglich zu machen, ist das Ziel dieses Handbuchs. In steter Bezugnahme auf gesamteuropäische und weitere Zusammenhänge werden hier die Ereignisgeschichte und die Strukturen von Staatlichkeit und Herrschaftsweisen im Zeitalter beschleunigten Wandels ab ca. 1800 behandelt. Die Diskussion von Quellen und Sekundärliteratur bezieht die Forschung in den südosteuropäischen Ländern in aller sprachlichen Vielfalt ein und vermeidet „westliche“ Perspektivverengung. Der Darstellungszeitraum ist zunächst gekennzeichnet durch ein starkes Fortbestehen der imperialen Ordnungsrahmen durch Habsburgermonarchie und Osmanisches Reich, neben der nationalstaatlichen Strukturierung, die auf zuvor osmanischem Boden bald nach 1800 begann. Das religionspolitische Ordnungsmoment trat schrittweise zurück. Wie in Gesamteuropa rückt in den staatlichen und politischen Prozessen die Frage nach administrativer und machtpolitischer Teilhabe mit neuen Ordnungsvorstellungen in den Vordergrund. Über den fachspezifischen Forschungsstand hinaus bietet der Band umfassendes analytisches Orientierungswissen, das auch für internationale Vergleiche herangezogen werden kann.

This unique and lively history of Balkan geopolitics since the early nineteenth century gives readers the essential historical background to recent events in this war-torn area. No other book covers the entire region, or offers such profound insights into the roots of Balkan violence, or explains so vividly the origins of modern Serbia, Croatia, Bosnia, Greece, Bulgaria, Romania, and Albania. Misha Glenny presents a lucid and fair-minded account of each national group in the Balkans and its struggle for statehood. The narrative is studded with sharply observed portraits of kings, guerrillas, bandits, generals, and politicians. Glenny also explores the often-catastrophic relationship between the Balkans and the Great Powers, raising some disturbing questions about Western intervention.

This is a comprehensive regional geography synthesis of the most important physical and human spatial processes that shaped Serbia and led to many interesting regional issues, not only to Serbia

but to the Balkans and Europe. The book provides an overall view on the Serbian physical environment, its population and economy. It also highlights important regional issues such as regional disparities and depopulation, sustainable development and ecological issues and rural economy in the context of rural area development, which have been shaped by different political and historical processes. This highly illustrated book provides interesting and informative insights into Serbia and its context within the Balkans and Europe. It appeals to scientists and students as well as travelers and general readers interested in this region.

In the last decades, palaeomagnetic research has provided important information about the past variation of the Earth's magnetic field (EMF) from its origin to the present day. However, questions regarding the origin and evolution of the EMF as well as the frequency and spatial distribution of its variations still remain open to debate. This Special Publication provides new insights into the study of the temporal and spatial evolution of the EMF presenting new data from palaeomagnetic and rock magnetic studies of archaeological materials, sediments and lavas. The papers presented cover a wide range of topics related to archaeology, stratigraphy and climate, including new data from several parts of the world, such as Europe, Africa, Australia, New Zealand, India and the Baltic Sea. This Special Publication aims to present an overview of the most recent secular variation studies and their use to disclose fundamental properties of the EMF evolution.

The Sound State of Uzbekistan: Popular Music and Politics in the Karimov Era is a pioneering study of the intersection between popular music and state politics in Central Asia. Based on 20 months of fieldwork and archival research in Tashkent, this book explores a remarkable era in Uzbekistan's politics (2001-2016), when the Uzbek government promoted a rather unlikely candidate to the prominent position of state sound: estrada, a genre of popular music and a musical relic of socialism. The political importance it attached to estrada was matched by the establishment of an elaborate bureaucratic apparatus for state oversight. *The Sound State of Uzbekistan* shows the continuing legacy of Soviet concepts to frame the nexus between music, artists and the state, and explains the extraordinary potency ascribed to estrada. At the same time, it challenges classical readings of transition and also questions common binary models for researching culture in totalitarian or authoritarian states. Proposing to approach lives in music under authoritarianism as a form of normality instead, the author promotes a post-Cold War paradigm in music studies.

The protection of minorities in Bulgaria presents a paradox. Although minority protection played a prominent role in the accession of the country to the European Union, hardly any positive minority rights were adopted in post-communist Bulgaria. Apart from the reversal of communist assimilation campaigns, only limited progress has been made in the area of minority protection. Positive minority rights have remained very restricted, some minorities, notably Pomaks and Macedonians, have been denied recognition, and the formal adoption of legislation or policy documents has often not been followed by implementation. By charting minority rights policies in Bulgaria in the period between 1989 and 2004, this study clarifies the main reasons for the limited progress in the post-communist period. While, in contrast to some other countries in Central and Eastern Europe, minority "kin-states" did not play a major role in post-communist Bulgaria, the European Union and the Council of Europe were instrumental in putting minority questions on the agenda of Bulgarian governments. However, their impact was smaller than much of the literature on enlargement and conditionality would suggest. Domestic factors were crucial in shaping minority rights policies in post-communist Bulgaria. Of particular importance was the communist legacy, which acted as a brake on the development of minority rights.

A sweeping history of southeastern Europe from antiquity to the present that reveals it to be a vibrant crossroads of trade, ideas, and religions. We often think of the Balkans as a region beset by turmoil and backwardness, but from late antiquity to the present it has been a dynamic meeting place of cultures and religions. Combining deep insight with narrative flair, *The Great Cauldron* invites us to reconsider the history of this intriguing, diverse region as essential to the story of global

Europe. Marie-Janine Calic reveals the many ways in which southeastern Europe's position at the crossroads of East and West shaped continental and global developments. The nascent merchant capitalism of the Mediterranean world helped the Balkan knights fight the Ottomans in the fifteenth century. The deep pull of nationalism led a young Serbian bookworm to spark the conflagration of World War I. The late twentieth century saw political Islam spread like wildfire in a region where Christians and Muslims had long lived side by side. Along with vivid snapshots of revealing moments in time, including Krujë in 1450 and Sarajevo in 1984, Calic introduces fascinating figures rarely found in standard European histories. We meet the Greek merchant and poet Rhigas Velestinlis, whose revolutionary pamphlet called for a general uprising against Ottoman tyranny in 1797. And the Croatian bishop Ivan Dominik Stratiko, who argued passionately for equality of the sexes and whose success with women astonished even his friend Casanova. Calic's ambitious reappraisal expands and deepens our understanding of the ever-changing mixture of peoples, faiths, and civilizations in this much-neglected nexus of empire.

Thanks to its half-century under Communism, as well as its little-known language, Albania has suffered from neglect and a sense of isolation. Yet, as this study helps to show, the Albanian lands have a long history of interaction with others. They have been a meeting-ground of Christianity and Islam; a channel through which Venice connected with the Ottoman Balkans; a place of interest to the Habsburgs; and a focus for the ambitions of neighbouring powers in the late Ottoman period. Albanians themselves could have many different identities. The studies in this volume, by one of the world's leading experts on Albanian history, range from the fifteenth century to the twentieth, taking in politics, social history, religion and diplomacy. Each is based on original research; the longest, on

Ali Pasha, uses a wealth of manuscript material to tell, for the first time, the full story of the vital role he played in the international politics of the Napoleonic Wars. Other studies bring to life ordinary individuals hitherto unknown to history: women hauled before the Inquisition, for example, or the author of the first Albanian autobiography. Some of these studies have been printed before (several in hard-to-find publications, and one only in Albanian), but the greater part of this book appears here for the first time. This is not only a landmark publication for readers interested in south-east European history. It also engages with many broader issues, including religious conversion, 'crypto-Christianity' among Muslims, methods of enslavement within the Ottoman Empire, and the nature of modern myth-making about national identity.

The Oxford Handbook of Neolithic Europe Walter de Gruyter

The Oxford Handbook of the European Iron Age presents a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods, exploiting the large quantities of new evidence yielded by the upsurge in archaeological research and excavation on this period over the last thirty years. Three introductory chapters situate the reader in the times and the environments of Iron Age Europe. Fourteen regional chapters provide accessible syntheses of developments in different parts of the continent, from Ireland and Spain in the west to the borders with Asia in the east, from Scandinavia in the north to the Mediterranean shores in the south. Twenty-six thematic chapters examine different aspects of Iron Age archaeology in greater depth, from lifeways, economy, and complexity to identity, ritual, and expression. Among the many topics explored are agricultural systems, settlements, landscape monuments, iron smelting and forging, production of textiles, politics, demography, gender, migration, funerary practices, social and religious rituals, coinage and literacy, and art and design.
