How have we  
thought “the  
body”? How  
can we think it  
anew? The  
body of mortal  
creatures, the  
body politic,  
the body of  
letters and of  
laws, the  
“mystical  
body of  
Christ”—all  
these (and  
others) are  
incorporated  
in the word  
Corpus, the  
title and topic  
of Jean-Luc  
Nancy’s

masterwork. *Corpus* is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the “corpus” from Plato, Aristotle, and Saint Paul to Descartes, Hegel,

Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To

the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the “mind-body problem” formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is “The Intruder,” Nancy’s philosophical meditation on his heart

<p>transplant. The book also serves as the opening move in Nancy's larger project called "The deconstruction of Christianity." <u>Disintegration and Integration in East-central Europe: 1919 - Post-1989</u> (Veröffentlichungen Der Historiker-verbundungsgruppe Bei Der Kommission Der EG). Russell Grigg provides lively and accessible readings of Lacan and Freud that are grounded in clinical experience and informed by a background in analytic philosophy. He addresses key issues in Lacanian psychoanalysis, from the clinical (how psychosis results from the foreclosure of the signifier the Name-of-the-Father; the father as a</p>	<p>symbolic function; the place of transference) to the philosophical (the logic of the "pas-tout"; the link between the superego and Kant's categorical imperative; a critique of Žižek's account of radical change). Grigg's expertise and knowledge of psychoanalysis produce a major contribution to contemporary philosophical and psychoanalytic debates. <i>Ancient</i></p>

*Memories, Modern Identities* Penguin This monograph contributes to the scientific misconduct debate from an oblique perspective, by analysing seven novels devoted to this issue, namely: Arrowsmith by Sinclair Lewis (1925), *The affair* by C.P. Snow (1960), *Cantor's Dilemma* by Carl Djerassi (1989), *Perlmann's Silence* by Pascal Mercier (1995), *Intuition* by Allegra Goodman (2006), *Solar* by Ian McEwan (2010) and *Derailment* by Diederik Stapel (2012). Scientific misconduct, i.e. fabrication, falsification, plagiarism, but also other questionable research practices, have become a focus of concern for academic communities worldwide, but also for managers, funders and publishers of research. The aforementioned novels offer intriguing windows into integrity challenges emerging in contemporary research practices. They are analysed from a continental philosophical perspective, providing a stage where various voices, positions and modes of discourse are mutually exposed to one another, so that they critically address and question one another. They force us to start from the admission that we do not really know

what misconduct is. Subsequently, by providing case histories of misconduct, they address integrity challenges not only in terms of individual deviance but also in terms of systemic crisis, due to current transformations in the ways in which knowledge is produced. Rather than functioning as moral vignettes, the author argues that misconduct novels challenge us to reconsider some of the

basic conceptual building blocks of integrity discourse. Except where otherwise noted, this book is licensed under a Creative Commons Attribution 4.0 International License. the approaches of four leading scholars to questions of penal change, analysing the relationship between their roles as scholars in an academic environment and as citizens in a political community. **Interface Fantasy** Indiana University Press Earth's outcasts, exiled to a distant planet and forgotten about, face a choice: slowly wipe each other out with the attritional gang violence

that ravages their planet, or find a path to redemption that will create something entirely new. Tony Puryear, writer of the hit film Eraser (Warner Bros., 1996) and Erika Alexander (star of Living Single and The Cosby Show) bring a dark, sexy sci-fi epic with unforgettable characters and non-stop action, all presented in a vibrant, unmistakable style.

Eurotica Architectural projects which expose the hidden contradictions of our everyday reality in a lively yet challenging way. François Roche (born in 1961 in Paris) and his partner Stephanie Lavaux (born in 1966 on the Reunion Island) are radical advocates of an architecture which is to be perceived as a tool for increasing critical awareness, as a discipline

which provokes thought and inspires the imagination. Their buildings and projects, which include the new art museum in Bangkok and the Glacier Museum in Switzerland, both of which would have been unthinkable without the latest IT methods of design, strive towards designs which are unique and unmistakable in both function and appearance. Francois Roche is guest

professor at the London Bartlett School and the Technical University of Vienna, and has made a name for himself internationally as a pioneer of a new architecture through his lecture activities and his participation in many exhibitions. This monograph is the first complete overview of his work and will be published to coincide with the exhibition "No Standard

Architecture" which opens in November at the Centre Pompidou in Paris, where R & Sie...architects are one of the 12 invited architectural firms.

The most feared man in the history of the corrupt police state of La Colonia was the Iguana, an unstoppable assassin of monstrous cruelty, debased

appetites, and nearly super-human abilities. Now, he is seemingly dead, but his foul influence still permeates the landscape, inspiring as much terror and loathing in death as in life. When a beautiful and ambitious American tabloid journalist travels to La Colonia to investigate the Iguana's apparent death, she herself becomes entangled in his legacy of savage

transgressions and perverse desires, and even a Pulitzer Prize may not be able to wipe away the stain on her soul. Written by CyberSix creator Carlos Trillo and illustrated by Roberto Mandrafina, and the sequel to The Big Hoax, The Iguana is a brutal satire, as disturbing as it is sardonic. Not for the faint of heart, The Iguana is another essential Venture graphic album, published in

collaboration with Strip Art Features, and available for the first time in an English-language edition! A Scene in Between (Revised Edition) Guernica Editions Behind our computer screens we are all cyborgs: through fantasy we can understand our involvement in virtual worlds. Cyberspace is first and foremost a mental space. Therefore we need to take a

psychological approach to understand our experiences in it. In Interface Fantasy, André Nusselder uses the core psychoanalytic notion of fantasy to examine our relationship to computers and digital technology. Lacanian psychoanalysis considers fantasy to be an indispensable “screen” for our interaction with the outside world; Nusselder argues that, at the mental level,

computer screens and other human-computer interfaces incorporate this function of fantasy: they mediate the real and the virtual. Interface Fantasy illuminates our attachment to new media: why we love our devices; why we are fascinated by the images on their screens; and how it is possible that virtual images can provide physical pleasure. Nusselder puts such phenomena as

avatars, role playing, cybersex, computer psychotherapy, and Internet addiction in the context of established psychoanalytic theory. The virtual identities we assume in virtual worlds, exemplified best by avatars consisting of both realistic and symbolic self-representations, illustrate the three orders that Lacan uses to analyze human reality: the imaginary, the symbolic, and the real.

Nusselder analyzes our most intimate involvement with information technology—the almost invisible, affective aspects of technology that have the greatest impact on our lives. Interface Fantasy lays the foundation for a new way of thinking that acknowledges the pivotal role of the screen in the current world of information. And it gives an intelligible overview of basic Lacanian principles

(including fantasy, language, the virtual, the real, embodiment, and enjoyment) that shows their enormous relevance for understanding the current state of media technology. Eh, Paesan! David R. Godine Publisher When three high-school-age video game fanatics purchase a new virtual reality game they have no idea they are about to be transported to the

battlefields of Verdun, Guernica, and Bosnia.

Despite the fact that the name of many characters mentioned in the Old Testament, like David, King of Israel, have been recently confirmed by archaeology as well as their epoch and the events in which they were involved, most

archaeologists continue to deny the historicity of the Bible they view as pious fiction or a mythical account. They argue that the major events in the Bible such as the victory of Abraham against Chedorlaomer, an unknown king of Elam around 2000 BCE, the victory of Moses against an unknown Pharaoh around 1500 BCE or the victory of Esther, an unknown Persian Queen,

against an unknown vizier of Xerxes, never existed because they left absolutely no evidence. They also explain that according to what we know today, these events could not have occurred. These logical arguments are impressive but a precise chronological analysis based on absolute dates, coupled with a rigorous historical investigation, shows that all those major events really took place at

the dates and places indicated. The Iguana Parkstone Press Published between 1998 and 2000, and set in a mythical medieval world, Red Moon follows the fortunes of Antolin, a young juggler, as he attempts to free the Land of Burien from the evil Lord of Leona. In a swashbuckling adventure that will remind readers of The Never-Ending Story (Puffin, 2009), a full cast of circus

performers, knights, fairies, witches, lords and ladies create an unmistakably magical world. Red Moon is about to get the worldwide audience it deserves. **Lacan, Language, and Philosophy** Oxford University Press This collection is the first extended interrogation in any language of Jacques Lacan's Seminar XVII. Originally delivered just after the Paris

uprisings of May 1968, Seminar XVII marked a turning point in Lacan's thought; it was both a step forward in the psychoanalytic debates and an important contribution to social and political issues. Collecting important analyses by many of the major Lacanian theorists and practitioners, this anthology is at once an introduction, critique, and extension of Lacan's influential

ideas. The contributors examine Lacan's theory of the four discourses, his critique of the Oedipus complex and the superego, the role of primal affects in political life, and his prophetic grasp of twenty-first-century developments. They take up these issues in detail, illuminating the Lacanian concepts with in-depth discussions of shame and guilt,	literature and intimacy, femininity, perversion, authority and revolt, and the discourse of marketing and political rhetoric. Topics of more specific psychoanalytic interest include the role of objet a, philosophy and psychoanalysis, the status of knowledge, and the relation between psychoanalytic practices and the modern	university.
