A proven way to put together a portfolio that enhances performance and reduces risk Professor Craig Israelsen of Brigham Young University is an important voice in the area of asset allocation. The reason? He keeps things simple. Now, in 7Twelve, he shows you how to do the same, and demonstrates how his approach to investing can help you grow your money as well as protect it. 7Twelve outlines a multi-asset balanced portfolio that is a logical starting point when assembling a portfolio-either as the blueprint for the entire portfolio or as a significant building block. Page by page, he will show you how to create a balanced portfolio utilizing multiple asset classes to enhance

performance and reduce risk. Discusses how the 7Twelve portfolio includes seven core asset classes and utilizes twelve specific mutual funds or exchange traded funds Details the tax efficiency of this specific investment approach Shows you how to use the 7Twelve portfolio as a pre-retirement accumulation portfolio or a post-retirement distribution portfolio If you want to build a well-balanced, multi-asset portfolio, 7Twelve is the book for you.

What Learning Means SAGE

This book foregrounds pedagogy in a way that challenges readers to reflect on themselves as teachers and learners, and to be reflexive about their own practices and contexts. Learning involves a transformation of identity which occurs through negotiation and repositioning, through new ways of relating, and through different ways of participating in practices. This book examines the meaning and implications for pedagogy in educational and workplace settings, and the role of the

teacher in this sociocultural view of learning. By illustrating the mediated nature of agency and identity, the chapters (re)conceptualise the teacher and the learner and show different ways of supporting learning and being a teacher. The settings represented range from nursery to university and from out-of-school to institutionally-based and work place situations. Curricular aspects represented include popular culture, critical literacy, multimodality, the arts, and new technologies. Teachers and student teachers, as learners, are also represented in the accounts assembled. The book takes a sociocultural view of learning and considers the pedagogical implications of this view. It explores different meanings of pedagogy and considers notions of cultural bridging and the process of transforming identities. The contributions challenge ways of thinking about practice, both teaching and assessment, and argue for practices that bridge between learners' worlds, their communities and educational institutions. Drawing on the international literature, this book will be essential reading for students of curriculum learning and

assessment in all sectors from pre-primary to further and higher education. It is suitable as a core text for masters and taught doctorate programmes. It will also be of interest to a wide range of professionals involved with curriculum, learning and the practice of teaching and assessment. This book is relevant to those in work-based and professional education and training, and in informal educational settings, as well as traditional educational institutions at all levels. A unique collection in a field that is underrepresented, it will also be of interest to an academic audience.

A New York Times bestseller: "The funniest writer in America" takes on the global economy (The Wall Street Journal). In this book, renowned political humorist P. J. O'Rourke, author of *Parliament of Whores* and *How the Hell Did This Happen?* leads us on a hysterical whirlwind world tour from the "good capitalism" of Wall Street to the "bad socialism" of Cuba in search of the answer to an age-old question: "Why do some places prosper and thrive, while others just suck?" With stops in Albania,

Sweden, Hong Kong, Moscow, and Tanzania, O'Rourke takes a look at the complexities of economics with a big dose of the incomparable wit that has made him one of today's most refreshing commentators. "O'Rourke has done the unthinkable: he's made money funny." —Forbes FYI "[O'Rourke is] witty, smart and—though he hides it under a tough coat of cynicism—a fine reporter . . . Delightful." —The New York Times Book Review

Reflective practice is at the heart of effective teaching, and this book helps you develop into a reflective teacher of mathematics. Everything you need is here: guidance on developing your analysis and self-evaluation skills, the knowledge of what you are trying to achieve and why, and examples of how experienced teachers deliver successful lessons. The book shows you how to plan lessons, how to make good use of resources and how to assess pupils' progress effectively. Each

chapter contains points for reflection, which encourage you to break off from your reading and think about the challenging questions that you face as a new teacher. The book is supplemented by a companion website, with: " Videos of real lessons so you can see the skills discussed in the text in action " Links to a range of sites that provide useful additional support " Extra planning and resource materials. If you are training to teach mathematics this book will help you to improve your classroom performance, by providing you with practical advice, but also by helping you to think in depth about the key issues. It also provides examples of the research evidence that is needed in academic work at Masters level, essential for anyone undertaking an M-level PGCE. Paul Chambers was formerly course leader for PGCE mathematics at Edge Hill University.
