Ulysses, a middle-aged widower, is forced into early retirement from his moving job. At a loss for what to do next, the course of his life is changed by a chance encounter with a fellow lonely soul at, of all places, his son's OB/GYN office. Mediterranea, who recently lost her mother, runs a cheese shop that she took over when her beloved Corsican father died years earlier. A romance blossoms between these two people who are supposedly in the "autumn" of their lives and they soon find themselves embarking on a most unexpected odyssey.

It is impossible to imagine Austrian architecture and contemporary history without Karl Schwanzer, who would have marked his hundredth birthday in 2018. His buildings, like the BMW administration building in Munich, caused quite a furor domestically and abroad; his institute at the Technical

University of Vienna influenced offices like Coop Himmelb(l)au, Haus-Rucker-Co, Missing Link and ZÜND-UP. Posthumously, Schwanzer rose to cult status among his staff, students and clients, conferred especially for his passionate way of working, sparing no effort or expense, and for his relentless search for the optimum solution. In every sense, his life and work were unconventional. The idea to relate them in the form of a graphic novel is also quite unconventional, but certainly a logical consequence!

Karl Schwanzer, der 2018 einhundert Jahre alt geworden wäre, ist aus der Architektur- und Zeitgeschichte Österreichs nicht wegzudenken. Seine Bauten, etwa das BMW-Verwaltungsgebäude in München, haben im In- und Ausland für Aufsehen gesorgt; sein Institut an der TU Wien prägte Büros wie Coop Himmelb(l)au, Haus-Rucker-Co, Missing Link und ZÜND-UP. Seine Mitarbeiter, Studenten und Bauherren verliehen ihm posthum einen Kultstatus, der insbesondere durch seine leidenschaftliche Arbeitsweise begründet war, bei der er keinen Aufwand scheute, und durch seine unerbittliche Suche nach der optimalen Lösung. Sein Leben und Arbeiten waren in jeder Hinsicht unkonventionell. Dass nun beides in Form einer Graphic Novel erzählt wird, ist sicher auch unkonventionell, aber durchaus folgerichtig!

Karl Schwanzer was on fire for architecture. He reformed Austrian architecture after 1945 and, in the post-war period, significantly shaped the image of a new, free Austria at home and abroad. As an importer and exporter of ideas, he worked on over 600 projects and designs over 28 years of his

career. This book is an illustrated chronology of his oeuvre, bringing to life developments and modulations. At the same time, it is also an architectural and contemporary history as well as a homage to architectural photography; Schwanzer only worked with excellent photographers such as Lucca Chmel, Barbara Pflaum, Franz Hubmann, Sigrid Neubert, and with Maria Wölfel, who has yet to be discovered. The photographs of temporary buildings that are no longer in existence are particularly valuable.

"Elizabeth "Lisl" Scheu Close (1912-2011) was the first female modern architect in Minnesota. Over her 60-year career, she designed more than 150 residences in the state, which were stylistically rooted in Austrian and other European modern movements of the 1920s and 30s. The work of architect Adolf Loos was a primary influence –Close grew up in the 1912 Loos-designed Scheu House, a seminal early modern house in Vienna, Austria. In 1938 with her husband Winston Close, she cofounded the first practice in Minnesota dedicated to modern architecture. The book traces Lisl's life, education, and career from pre-World War I Vienna, to MIT, to Minnesota. Lisl was in the vanguard of professionally-trained women architects. Not only was she perceived as a "woman in a man's field" when she launched her career, she was also committed to a design aesthetic then not widely adopted by the public or the profession. Modernism, to Lisl, meant the design of buildings that "fit the modern style of living," or those that were practical, efficient, durable, and of their time"--

The fastest, easiest way to shift culture toward engagement and productivity Change Your Space, Change Your Culture is a guide to transforming business by rethinking the workplace. Written by a team of trail-blazing leaders, this book reveals the secrets of companies that discovered the power of culture and space. This insightful guide reveals what companies lose by viewing office space as something to manage or minimize. With practical tips and implementation details, the book helps the reader see that the workspace is, in fact, a crucial driver of productivity and morale. Change Your Space, Change Your Culture was born out of recent studies that expose truly outrageous "Oh, my God" realities: More than 70 percent of the workforce either hates their job or they are just going through the motions. Half of all office space is wasted. Those shattering facts exist because office space is generally regarded as "overhead" or "sunk cost." Most buildings today clearly communicate the low priority placed on people-friendly design. Poor workforce engagement is baked into the culture. This book provides guidance on turning this around, by rethinking and reshaping space to align with the way people work. Specifically, this book moves from the high-altitude view down to the details on how to: Discover the fastest, easiest and most cost-effective way to shift culture Add square footage by using space more effectively Boost employee engagement and vitality by the creative use of space Learn how space can become a powerful productivity tool We all know that design, space, and flow have a powerful effect on the human psyche. Our homes, museums, sports arenas, places of worship, and even airport terminals reveal that. Environment can inspire dread or enthusiasm, distraction or focus, collaboration or isolation. That's why the office must be designed to inspire the desired culture and workflow – if it's not properly designed, no program, training or rules will be effective over time. Change Your Space, Change Your Culture is the practical guide to office space, the foundation of an engaging culture.

"A sheer delight and will have readers laughing out loud by the second page." —Daytona Beach News-Journal Southern manners, mint julips, cold-blooded larceny, and sweet revenge collide in this rollicking tale from the delightfully charming New York Times bestselling author of Hissy Fit and Savannah Blues The Breeze Inn is a place where very classy Southern belle Bebe Loudermilk normally wouldn't be caught dead. But a brief, disastrous relationship with gorgeous "investment counselor" con man Reddy has cost her nearly all her worldly possessions. All that's left is the ramshackle 1950s motel on Tybee Island, a "drinking village with a fishing problem." Moving into the manager's unit, BeBe vows to make magic out of mud, and with the help of the inn's cantankerous caretaker, Harry, and her junking friend, Weezie, she soon has the motel spiffed up and attracting paying guests. But all it takes is one Reddy sighting in Fort Lauderdale for BeBe to drop everything and haul her hastily assembled posse south to participate in a somewhat outside-the-law sting. With a little luck, BeBe might get her fortune back, Harry (who's looking hunkier every day) might get his boat back, and Reddy might get the prison stripes he so richly deserves.

This lavish publication presents the Neues Museum, badly damaged during the Second World War and recently restored and reopened, in all its glory. Numerous full-page photographs magnificently showcase both the museum's architecture and its collection One of the great museums of the 19th century, the Neues Museum in Berlin, built between 1843 to 1855 to a design by Friedrich August Stüler, was celebrated both for its important collections and its innovative integration of exhibition concept and magnificent interior designs. Badly damaged during the Second World War, the building has been sympathetically restored by the British architect David Chipperfield and his team, whose work skilfully combines a rigorous respect for the original architecture on the one hand, with a commitment to modern design and contemporary exhibition needs on the other. This lavish publication presents the reopened Neues Museum in all its glory. Numerous full-page photographs magnificently showcase both the museum's architecture and its collection. The famous Mythological Room, Roman Room and the Room of the Niobids, as well as the extensive wall paintings of Wilhelm von Kaulbach and the historic floors, are described in detailed individual chapters. Other chapters re-examine the museum's eventful history and detail the extensive programme of restoration. Historical and current illustrations and floorplans complete this comprehensive and beautifully illustrated work on one of the finest museums in the world.

Twenty-five years after the end of the Cold War, a new Cold War is being waged in our societies. During the Cold War a theoretical model of man was developed by economists and the military, an egotistical being interested only in his own benefit and in duping his opponents to achieve his ends: a

modern homo oeconomicus. After his career in the Cold War ended, he was not scrapped but adapted to the needs of the twenty-first century. He became the ringmaster of a new era of information capitalism. He sought to read, control and influence thoughts; to predict, price and eliminate risks. Today stock-market trading is guided by him. He uses computer algorithms and Big Data to build up detailed pictures of our preferences and then suggest and sell goods to us. The model has become a self-fulfilling prophecy. We are no longer the masters of our own fate. The Game of Life runs without us. Schirmmacher traces the progress of this extreme rationalization of social life from the Cold War games of the 1950s Rand Corporation to the stock-market trading techniques that brought about the financial crash of 2008, showing how these developments were interwoven with the rise of game theory, rational choice theory and neoliberal economics. The state and politics increasingly submitted themselves to the logic of computerized game theory and an economic view of the world, evading real decision-making in the process. In this brave new world individuals, alone in front of their computers, may think they are constructing a reality of their own choosing, but in fact they are being manipulated all along by others who are setting the rules of the game. This international bestseller by one of Germany's most distinguished journalists is a powerful indictment of a way of thinking that has become pervasive and threatens to undermine not only parliaments and constitutions but also the sovereignty of the individual to be the person he or she wants to be.

"In 2018 the Vienna Porcelain Manufactory celebrates its 300th anniversary. Having obtained the charter to produce porcelain in 1718, it is considered the second oldest porcelain manufactory in Europe after Meissen. The volume accompanying the exhibition in the MAK - Austrian Museum of Applied Arts / Contemporary Art in Vienna will now reopen the history of the Vienna Porcelain Manufactory, which closed in 1864, where major works such as the porcelain chamber from the Palais Dubsy (Dubsy Room) and the Zwettl centrepiece are presented in light of new findings. With numerous illustrations of leading pieces from the MAK's collection and international loans, the catalogue attests to the significance that Viennese porcelain has enjoyed as an outstanding cultural achievement of Austria since the Baroque era."--Publisher.
