Warm, wise, and magical—the latest novel by the bestselling author of THE LITTLE PARIS

BOOKSHOP and THE LITTLE FRENCH BISTRO is an astonishing exploration of the thresholds between life and death Henri Skinner is a hardened ex-war reporter on the run from his past. On his way to see his son, Sam, for the first time in years, Henri steps into the road without looking

and collides with oncoming traffic. He is rushed to a nearby hospital where he floats, comatose, between dreams, reliving the fairytales of his childhood and the secrets that made him run away in the first place. After the accident, Sam—a thirteen-year old synesthete with an IQ of 144 and an appetite for science fiction—waits by his father's bedside every day. There he meets Eddie Tomlin, a woman forced to confront her love for Henri after all these years, and twelve-year old Madelyn Zeidler, a coma patient like Henri and the sole survivor of a traffic accident that killed her family. As these four very different individuals fight—for hope, for patience, for life—they are bound together inextricably, facing the ravages of loss and first love side by side. A revelatory, urgently human story that examines what we consider serious and painful alongside light and whimsy, THE BOOK OF DREAMS is a tender meditation on memory, liminality, and empathy, asking with grace and gravitas what we will truly find meaningful in our lives once we are gone.

This volume brings together key findings of the long-term research project 'Religious Individualisation in Historical Perspective' (Max Weber Centre for Advanced Cultural and Social

Studies, Erfurt University). Combining a wide range of disciplinary approaches, methods and theories, the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods, in particular in Asia, the Mediterranean, and Europe from antiquity to the recent past. Contrary to standard theories of modernisation, which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon, the chapters reveal processes of religious individualisation in a large variety of non-Western and pre-modern scenarios. Furthermore, the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency, the pluralisation of religious options, dynamics of de-traditionalisation and privatisation, the development of elaborated notions of the self, the facilitation of religious deviance, and on the notion of dividuality.

The Singer's Guide to German Diction is the essential foundation for a complete course in German diction for singers, vocal coaches, choral conductors, and anyone wishing to learn the proper pronunciation of High German. Written by Valentin Lanzrein and Richard Cross, who each have years of experience on stage, in the voice studio, and in the diction classroom, it provides an all-encompassing and versatile reference for the rules of German diction and their exceptions. Featuring an easily navigable format that uses tables and charts to support a visual understanding of the text, this guide allows the reader to find information on diction rules and quick help with the formation of each sound. It also places an emphasis on exceptions to the rules, which are crucial in learning the proper pronunciation of any language. Exceptions are not only provided with the diction rules, but are also gathered in a specific section for ease of reference. A glossary of difficult words, names, and exceptions is provided in the appendix, along with a section on Latin pronounced in the German manner. Extensive pronunciation exercises, as well as IPA transcription worksheets and short examples from the vocal literature, are used for practical application of the diction rules, and feature musical exercises drawn from art song, opera, and oratorio. The book's companion website supplements these musical exercises with high-quality audio clips recorded by leading professional singers, providing an invaluable resource for independent study. A comprehensive companion for teachers, students, and singers alike, The Singer's Guide to German Diction brings German diction to life through its well-structured system of practice and reference materials.

This book, designed for students who have already developed a basic competence in German,

aims to broaden and improve their vocabulary by providing detailed information on groups of German words with related meanings. It is invaluable as a guide to finding the right word for the context. In order to enhance understanding of the structure of the German vocabulary, groups of synonyms are organised under German (rather than English) headwords. All entries are accompanied by an example of usage and English glosses and there are two indexes allowing users quickly to locate words in German or English. The book takes full account of register variation, indicating the degree of formal or informal use, and reflects regional usage especially in Austria and Switzerland. It is an essential reference for intermediate and advanced students as well as teachers and other professional linguists seeking access to the finer nuances of the German language.

This study is the first attempt to reconstruct the prehistory of Arabic by examining lexical evidence of its symbiotic relationship with Ancient Egyptian already apparent from the Pyramid Texts (c. 2613–2181 BC). It documents the contention that Ancient Egypt was a strategic site in its early prehistory.

This novel by esteemed Swiss writer Max Frisch is an exploration of the question: "Why don't we live when we know we're here just this one time, just one single, unrepeatable time in this unutterably magnificent world?!" This outcry against the emptiness of ordinary everyday life uttered by the hero of Frisch's book is countered by "an answer from the silence" he meets when face-to-face with death. When An Answer from the Silence begins, the protagonist has just turned thirty and is engaged to be married and about to start work as a teacher. Frightened by the idea of settling down, he journeys to the Alps in a do-or-die effort to climb the unclimbed North Ridge, and by doing so prove he is not ordinary. But having reached the top he returns not in triumph, but in frostbitten shock, having come dangerously close to death. This highly personal early novel reflects a crisis in Frisch's own life, and perhaps because of this intimate connection, he refused to allow it to be included in his Collected Works in the 1970s. Now available in English, this distinctive book will thrill fans of Frisch's other works.

A quest to find something new by excavating the "deep time" of media's development—not by simply looking at new media's historic forerunners, but by connecting models, machines, technologies, and accidents that have until now remained separated. Deep Time of the Media takes us on an archaeological quest into the hidden layers of media development—dynamic moments of intense activity in media design and construction that have been largely ignored in the historical-media archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery; in Deep Time of the Media, he illuminates turning points of media history—fractures in the predictable—that help us see the new in the old. Drawing on original source materials, Zielinski explores the technology of devices for hearing and seeing through two thousand years of cultural and technological history. He discovers the contributions of "dreamers and modelers" of media worlds, from the ancient Greek philosopher Empedocles and natural philosophers of the Renaissance and Baroque periods to Russian avant-gardists of the early twentieth century. "Media are spaces of action for constructed attempts to connect what is separated," Zielinski writes. He describes models and machines that make this connection: including a theater of mirrors in sixteenth-century Naples, an automaton for musical composition created by the seventeenth-century Jesuit Athanasius Kircher, and the eighteenth-century electrical tele-writing machine of Joseph Mazzolari, among others. Uncovering these moments in the media-archaeological record, Zielinski says, brings us into a new relationship with present-day moments; these discoveries in the "deep time" media history shed light on today's media landscape and may help us map our expedition to the media future.

Exploring Contemporary Migration provides the first comprehensive introduction to the various aspects of population migration in both the developed and the developing worlds. Some of the most important quantitative and qualitative methods used for the description and analysis of migration are presented in a clearly structured and accessible way. The various theoretical approaches used to explain the complex patterns of migration are also summarised. These patterns are then explored through the use of specific migration-related themes: employment, stage in the life course, quality of life, societal engineering, violence and persecution, and the role of culture. Exploring Contemporary Migration is written in a user-friendly, accessible style, appealing to undergraduate students of population geography and social science students taking a population module. This text will also be valuable reading to those researchers and academics concerned with gaining a broad understanding of the dynamics and patterns of contemporary population.

Thus Spake Zarathustra is a foundational work of Western literature and is widely considered to be Friedrich Nietzsche's masterpiece. It includes the German philosopher's famous discussion of the phrase 'God is dead' as well as his concept of the Superman. Nietzsche delineates his Will to Power theory and devotes pages to critiquing Christian thinking, in particular Christianity's definition of good and evil.
