Governing the Embedded
State integrates
governance theory with
organization theory and
examines how states
address social complexity
and international
embeddedness. Drawing
upon extensive empirical

research on the Swedish
government system, this
volume describes a
strategy of governance
based in a
metagovernance model of
steering by designing
institutional structures.
This strategy is
supplemented by micro-
steering of administrative
structures within the path
dependencies put in place
through metagovernance.
Both of these strategies of

steering rely on subtle
methods of providing
political guidance to the
public service where
norms of loyalty to the
government characterize
the relationship between
politicians and civil
servants. By drawing
upon this research, the
volume will explain how
recent developments such
as globalization,
Europeanization, the
expansion of managerial

ideas, and the fragmentation of states, have influenced the state's capacity to govern. The result is an account of contemporary governance which shows the societal constraints on government but also the significance of close interaction and cooperation between the political leadership and the senior civil servants in addressing those constraints.

The Language of Constitutional Comparison
Council of Europe
Within democratic states, parliaments have always been regarded as playing a pivotal role in the creation of rules. Through its composition, parliament represents the opinions and interests of society, which it serves through the legislative process. But in an increasingly globalized world, nation-states are confronted with issues that require international

cooperation, expert knowledge and flexibility to resolve. Rather than taking the lead, parliaments are increasingly settling for a managerial position and have begun to outsource their rulemaking powers (and other constitutional responsibilities) rather than exercising them themselves. Outsourcing Rulemaking Powers identifies the shared constitutional principles that determine the limits to the outsourcing of rulemaking powers. It asks fundamental

questions of its readers, such as: which powers should be outsourced? And to whom? What mechanisms are in place to guarantee the quality of the rules they make? Through the examination of multiple countries, this book argues that there should be minimal legal safeguards to which all rules must heed, in particular those made by autonomous public or private actors. Offering a bridge between traditional constitutional law and transnational private law, this book will be of

interest to both practitioners and scholars within the global communities of comparative constitutionalism, global administrative law and transnational private law.

The essays which appear in this work are based on the papers presented at a two-day conference held in Liverpool in July 2007 to celebrate the 50th anniversary of the signing of the Treaty of Rome

establishing the EEC. The collection reflects critically upon some of the EU's historic characteristics and speculates imaginatively on some of the diverse challenges facing the Union in the future. Contributions from both established and emerging scholars of EU law and policy are united by two main themes: the paradox of the resilient yet unstable basis of the Union's constitutional fundamentals, and the ever-contested balance between the EU's core

economic mission and its broader social values and aspirations. For any student, scholar or practitioner interested in the dynamic nature of the constitutional relationship between the Union and its Member States, and in the complex tensions underpinning the EU's substantive policies, these essays will be essential reading.

Principles of Prussian Administration (Classic Reprint) Martinus Nijhoff Publishers

The issue of competence division is of fundamental

importance as it reflects the 'power bargain' struck between the Member States and their Union, determining the limits of the authority of the EU as well as the limits of the authority of the Member States. It defines the nature of the EU as a polity, as well as the identity of the Member States. After over six years since the entry into force of the Lisbon Treaty, it is high time to take stock of whether the reforms that were adopted to make the Union's system of division

of competences between the EU Member States clearer, more coherent, and better at containing European integration, have been successful. This book asks whether 'the competence problem' has finally been solved. Given the fundamental importance of this question, this publication will be of interest to a wide audience, from constitutional and substantive EU law scholars to practitioners in the EU institutions and EU legal practice more generally.

Comparaison du chef de l'État et du chef du Gouvernement en France et en Allemagne Jourist Verlags GmbH
Das sogenannte Gesetzgebungsoutsourcing ist ein relativ junges Phänomen der legislativen Praxis. Dabei wird die genuin staatliche Aufgabe der Erstellung von Gesetzentwürfen an externe Berater delegiert. Während diesbezüglich der Diskurs bisher mit nahezu ausschliesslich (verfassungs-)rechtlichem Fokus geführt wurde, beleuchtet Hannes

Worner darüber hinaus auch das verfassungstheoretische Fundament, das als massgebliches "Dahinter" der eigentlichen Verfassungsanwendung die kontrovers geführte Debatte prägt. Konkret erörtert er die Praxis der Entwurfsdelegation aus der Perspektive sowohl eines extensiven als auch eines restriktiven Verfassungsverständnisses. Anschliessend zeigt der Autor auf, dass die Verfassung durchaus eine normative Strukturierung der Entwurfserstellung

beinhaltet. Er pladiert für die Etablierung spezifischer Verfahrensorderungen, die eine tatsächliche Entscheidungsherrschaft der zuständigen staatlichen Stellen sichern sollen. Den Abschluss bildet ein eigener rechtspolitischer Entwurf zur Gewährleistung eines verfassungsmässigen Gesetzgebungsoutsourcings.

An Introduction to German Law Oxford University Press

"Nothing is more constant than change," said the

ancient Greek philosopher Heraclitus. And this is exactly what Jürgen Weber shows us in his new book "On the Roads of Life". He begins by describing how mankind and the climate have developed over millions of years. One thing becomes clear: there have always been changes, but climate change is dramatic and is provoked by humans. We must therefore try to minimize it - but also learn to live with it. Weber also explains how ideologies change society and that we need more

direct democracy. Especially in such turbulent times and in times of upheaval, we need to involve citizens more, otherwise there is a risk that they will turn away from the system completely.

Jan Niklas Kocks explores the effects of the now almost ubiquitous online media on political media relations and the interactions defining them. He analyses the ways in which leading political spokespersons and journalists perceive

digitisation in terms of technological, organisational and political change as well as the actual adaptations of digitisation on an individual and organisational level. Political media relations are approached from a perspective of social network analysis. Findings indicate a picture of political media relations as a continuing elite phenomenon. Networks are still mostly characterised by exclusive arrangements – and often to an even

larger degree than the actors involved actually perceive.

The Routledge International Handbook of Criminal Responsibility Walter de Gruyter GmbH & Co KG Presenting cutting-edge research and scholarship, this extensive volume covers everything from abstract theorising about the meanings of responsibility and how we blame, to analysing criminal law and justice responses, and factors that impact individual responsibility. Inviting

exchanges across a burgeoning critical scholarship on criminal responsibility, this Handbook showcases the diverse range of methodologies applied to the field, including socio-political approaches, critical historical methods, criminological and sociological perspectives, and interdisciplinary studies bridging law and the mind sciences. Spanning global networks of established and emerging scholars of responsibility for crime, this book explores how we

relate to one another as human beings under the spotlight of the criminal law. In doing so, it is hoped that the collection not only does justice to the vibrant landscape of criminal responsibility studies, but inspires new directions and future synergies in this compelling field. The Routledge International Handbook of Criminal Responsibility will appeal to scholars and students of criminal law, criminal justice, criminology, sociology, psychology, neuroscience, philosophy,

and socio-legal studies, as well as practitioners and policymakers working in related fields.

Writing Constitutions intends to serve as a practical manual for those writing constitutions or interested in their design. It is the first systematic and universal approach to coherently capture concepts and contents of a modern constitution. Volume I breaks each

constitutional mechanism into components and offers detailed designs to draft a constitutional clause. This provides lawmakers with the necessary toolkit for writing constitutions and empowers them to strengthen democracies. *Writing Constitutions* comes in three volumes: - Volume I: Institutions - Volume II: Fundamental Rights - Volume III: Constitutional Principles

European armed forces have frequently had to participate in counter-terrorist operations while abroad. For many, however, counter-terrorist operations in their home country are a relatively new phenomenon. Armed and uniformed soldiers can now be seen doing work which is, in some respects, comparable to that of the civilian security forces. What are the ethical implications of this phenomenon? To what extent does it change the relationship between the soldier and

the democratic state? Do emerging technologies encroach on democratic freedoms? Does the phenomenon re-define the relationship between the police and the military? Under what conditions can soldiers be trained to achieve victory by force of arms, be used effectively in crowded city centres? Conversely, do we also risk over-militarising our police? Excerpt from Principles of

Prussian Administration
We in the United States are standing at the beginning of a period of administrative development. Our individualistic tendencies have ever tempted many of us to support the Jeffersonian doctrine that the less government our people had the better for the people, and this has been directed, not only to the activities of the legislative branch of the government, but especially also to the administrative side of government. Our motto

has been, as little interference by the government with the activities of its citizens as possible, and this view has opposed adequate regulation as well as actual participation by the government in the various fields of individual endeavor. The new period which has now begun does not necessarily signify a change in the point of view, but merely perhaps a different conception of its application. We still desire as little government as possible, but we have a

different idea as to how little is possible. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. This volume explores the very topical issue of the lack of democratic legitimisation of national

and international courts and the question of whether rendering the original process of defining human rights more democratic at the national and international level would improve the degree of protection they afford. The authors venture to raise the crucial question: When can a democratic society be considered to be mature enough so as to be trusted to provide its own definition of human rights obligations?

Les Constitutions française et allemande possèdent, ainsi que cette recherche le démontre, une souplesse suffisante pour permettre une pratique très différente au sommet de l'État et du Gouvernement. Cela permet au locataire de la présidence d'exercer une influence très différente sur la direction du pays, en fonction de son élection et de la manière dont son parti s'est organisé. Tant que le dirigeant du parti est à la

tête de son parti, il en est en principe la personnalité politique décisive. Les candidats présidentiels français et allemand, qui deviennent alors Présidents, peuvent également choisir d'assumer en premier lieu un rôle de représentation et occasionnellement d'arbitre. Un Président arbitre se doit de laisser les appréciations uniquement politiques au Gouvernement. La flexibilité constitutionnelle française et allemande, inspirée respectivement des expériences vécues,

offre des options, sans que le choix de l'une ne se fasse au détriment de l'autre.

The Legal Doctrines of the Rule of Law and the Legal State (Rechtsstaat) BRILL

This important new book seeks to widen the understanding of the principle of equality within European law. Firstly, it deconstructs the European Court of Justice's adjudication of cases in the field. It then explores how the Member States' courts decide on the question of equality. This detailed rigorous

research allows the author to argue for a reconceptualised equality doctrine. Such an adaptation, the author argues, will provide judges, practitioners and academics with the tools to balance institutional considerations against substantive interpretation.

Theoretically ambitious, while grounded in practical application, this is a significant restatement of one of the key principles of European law: the equality doctrine. *Writing Constitutions* BoD

In this incisive and thought-provoking book, Francois Venter illuminates the issues arising from the fact that the current language of constitutional law is strongly premised on a particular worldview rooted in the history of the states around the North Atlantic Ocean. Highlighting how this terminological hegemony is being challenged from various directions, Venter explores the problem that all constitutional comparatists face: that

they all must use the same words to express different meanings.
