VANESSA AMINA

Collection of Essays by Legal Advisers of States, Legal Advisers of International Organizations and Practitioners in the Field of International Law

BookRix
 This volume brings together a range of contributors from Europe and North America. All contributions were especially commissioned with a view to e- cidating a major multidisciplinary topic that is of concern to both academics and practitioners. The focus of the book is on expert judgment and its interaction with decision support systems. In the first part, the nature of expertise is discussed and characteristics of expert judges are described. Issues concerned with the eval- tion of judgment in the psychological laboratory are assessed and contrasted with studies of expert judgment in ecologically valid contexts. In addition, issues concerned with eliciting and validating expert knowledge are discussed. Dem- strations of good judgmental performance are linked to situational factors such as feedback cycles, and measurement of coherence and reliability in expert ju- ment is introduced as a baseline determinant of good

judgmental performance. Issues concerned with the representation of elicited expert knowledge in kno- edge-based systems are evaluated and methods are described that have been shown to produce improvements in judgmental performance. Behavioral and mathematical ways of combining judgments from multiple experts are compared and contrasted. Finally, the issues developed in the preceding contributions are focused on current controversies in decision support. Expert judgment is utilized as a major input into decision analysis, forecasting with statistical models, and expert s- tems.
Water and Tribal Settlement in South-East Arabia Springer Science & Business Media
 This comprehensive manual thoroughly covers every aspect of French grammar, from the basic to the most advanced level, and illustrates the grammatical structures with useful, practical and interesting examples. Up-to-date language and usage both on the formal and on the informal level is paired with cultural information about France, making the study of grammar a pleasant experience. The book offers its users clear and detailed explanations, as well as the opportunity to practice their reading, writing and speaking skills in numerous oral and written

exercises, which include translations, suggestions for communicative activities with a partner, and topics for written composition. *A Complete French Grammar for Reference and Practice* can be used as a classroom text in intermediate and advanced courses, as well as for reference and self-study. It is a reliable source of information for teachers and students alike, and addresses all those learners who want to speak and write French correctly.

Whenever a major earthquake strikes or a hurricane unleashes its fury, the devastating results fill our television screens and newspapers. Mary C. Comerio is interested in what happens in the weeks and months after such disasters, particularly in the recovery of damaged housing. Through case studies of six recent urban disasters—Hurricane Hugo in South Carolina, Hurricane Andrew in Florida, the Loma Prieta and Northridge earthquakes in California, as well as earthquakes in Mexico City and Kobe, Japan—Comerio demonstrates that several fundamental factors have changed in contemporary urban disasters. The foremost change is in scale, and as more Americans move to the two coasts, future losses will continue to be formidable because of increased development in these high-hazard areas. Moreover, the visibility of disasters in the news media will assure that response efforts remain highly politicized. And finally, the federal government is now expected to be on the scene with personnel, programs, and financial assistance even as private insurance companies are withdrawing disaster coverage from homeowners in earthquake- and hurricane-prone regions. Demonstrating ways that existing recovery systems are inadequate, Comerio proposes a rethinking of what recovery means, a comprehensive revision of the government's role, and more equitable programs for construction financing. She offers new criteria for a housing recovery policy as well as real financial incentives for preparedness, for limiting damage before disasters occur, and for providing a climate where private insurance can work. Her careful analysis makes this book important reading for policymakers, property owners, and anyone involved in disaster mitigation.

Papers presented at a seminar organized by the Institute of Social Sciences, New Delhi.

Spink & Son's Monthly Numismatic Circular Edward Elgar Publishing

The world has changed radically since 1989, when the General Assembly declared the period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions and treaties. This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration.

Vocabulaire synthétique de la langue française World Bank Publications

Companies are being forced to react to the growing individualization of demand. At the same time, cost management remains of paramount importance due to the competitive pressure in global markets. Thus, making enterprises more customer centric efficiently is a top management priority in most

industries. Mass customization and personalization are key strategies to meet this challenge. Companies like Procter&Gamble, Lego, Nike, Adidas, Land's End, BMW, or Levi Strauss, among others, have started large-scale mass customization programs. This book provides insight into the different aspects of building a customer centric enterprise. Following an interdisciplinary approach, leading scientists and practitioners share their findings, concepts, and strategies from the perspective of design, production engineering, logistics, technology and innovation management, customer behavior, as well as marketing.

Engagement and Dropping Out of School Univ of California Press

All over Europe, newspaper articles and TV programmes increasingly report on sometimes dramatic cases of workplace bullying. Unlike everyday conflicts at work, bullying is a long-lasting conflict where one person is systematically harassed by one or more colleagues or supervisors, resulting in severe damage to the victim's psychological and physical health. Research on workplace bullying started more than a decade ago but has increased during the last few years. This special issue on workplace bullying documents the most recent developments in research and practice in various European countries, and includes topics such as the role of personality in becoming a victim, bullying and the development of post-traumatic stress disorder (PTSD), conflict escalation and coping with bullying and the impact of organizational status on bullying behaviour.

#%Te Pract Bk Tol 1995 Gr 5 Sexual Harassment of Women

Voters in India are more vigilant in monitoring government at the local than at the national level. In state assembly elections voters reward incumbents for local income growth, and punish them for a rise in inequality, over their entire term in office. But in national elections voters behave myopically, rewarding growth in national income and a fall in inflation and inequality only in the year preceding the election.

Sustainability Science for Strong Sustainability SAGE

Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices

that have been the most successful in preventing and addressing sexual harassment in these settings.

Recueil Des Cours 1984 Pearson Higher Ed

Emile is a treatise on the nature of education and on the nature of man written by Jean-Jacques Rousseau, who considered it to be the "best and most important of all my writings". Due to a section of the book entitled "Profession of Faith of the Savoyard Vicar," Emile was banned in Paris and Geneva and was publicly burned in 1762, the year of its first publication. During the French Revolution, Emile served as the inspiration for what became a new national system of education. The work tackles fundamental political and philosophical questions about the relationship between the individual and society— how, in particular, the individual might retain what Rousseau saw as innate human goodness while remaining part of a corrupting collectivity. Its opening sentence: "Everything is good as it leaves the hands of the Author of things; everything degenerates in the hands of man." Rousseau seeks to describe a system of education that would enable the natural man he identifies in *The Social Contract* to survive corrupt society He employs the novelistic device of Emile and his tutor to illustrate how such an ideal citizen might be educated. Emile is scarcely a detailed parenting guide but it does contain some specific advice on raising children.[5] It is regarded by some as the first philosophy of education in Western culture to have a serious claim to completeness

øThe dynamism of science has been catalytic for human prosperity in recent history. Conventional perspectives of the ivory tower model of modern science are, however, rivalled by the failure of humanity to tackle global crises of an economic, environme

Survey of Lead in the Atmosphere of Three Urban Communities Oxford University Press, USA

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. The tenth edition of *Characteristics of Emotional and Behavioral Disorders of Children and Youth* follows the text's long-standing reputation for trusted research, a teacher-focused presentation, and clear explanations of the concepts related to students with EBD. Streamlined in this edition, the text offers a coherent conceptualization of the problems of students with emotional and behavioral disorders and the common challenges for teachers. Its four-part format examines the background of EBD, the origins of disordered behaviors, types of disorders and the procedures and problems associated with assessment. This edition includes over 150 new references, a unified chapter on assessment, a new emphasis on teaching social skills and a separately available companion casebook filled with cases and interviews from teachers in the field.

Marchés tropicaux et méditerranéens Legare Street Press

This book is a study of the traditional relationships that exist in Oman between land and social organization, and how they have evolved. The author starts with the theme of aridity and, using the extensive literature of the 1200 year old Ibadi community to supplement his field work, shows how the techniques of water exploitation have influenced the country's social organization and its political ideology. He describes how the settlement organization has evolved in two stages; the first in the years before Islam when the Persians irrigated the land using aflaj or horizontal water channels; the second after the Arabs had overthrown the Persians and, influenced by Ibadism, established a more democratic society dominated by a strong tribal structure in the villages. The tribal structure is then examined in detail and

the author shows how close the links are between the Islamic ideology, land use, and social organization. As a contribution to the human geography of Oman as well as to general knowledge of the Middle East the book will interest Arabists, Islamic historians and social anthropologists, as well as hydrologists and geographers.

New Complete French Grammar United Nations Publications

Some years ago we, the editors of this volume, found out about each other's deeply rooted interest in the concept of time, the usage of time, and the effects of shortage of time on human thought and behavior. Since then we have fostered the idea of bringing together different perspectives in this area. We are now, there fore, very content that our idea has materialized in the present volume. There is both anecdotal and empirical evidence to suggest that time con straints may affect behavior. Managers and other professional decision makers frequently identify time pressure as a major constraint on their behavior (Isen berg, 1984). Chamberlain and Zika (1990) provide empirical support for this view, showing that complaints of insufficient time are the most frequently report ed everyday minor stressors or hassles for all groups of people except the elderly. Similarly, studies in occupational settings have identified time pressure as one of the central components of workload (Derrich, 1988; O'Donnel & Eggemeier, 1986).

Wörterbuch der deutschen und französischen sprache ... Martinus Nijhoff Publishers

This dual-language dictionary lists over 20,000 specialist terms in both French and English, covering architecture, building, engineering and property terms. It meets the needs of all building professionals working on projects overseas. It has been comprehensively researched and compiled to provide an invaluable reference source in an increasingly European marketplace.

Sexual Harassment of Women National Academies Press

Dictionary of the French and English (English and French) languages Springer Science & Business Media

`This book was radically challenging when it was first published, and is only more so today as the concept of consumer collapses under the weight of its many meanings' - Madeleine Bunting, Columnist, *The Guardian* Western-style consumerism appears unstoppable. Yet it is has failed to deliver greater happiness and is now facing major environmental, population and political challenges. This book examines the key Western traditions of thinking about and being a consumer. Each chapter posits a consumer model with examples from the international community. Readers are invited to enter an exciting and radical analysis of contemporary consumerism which suggests that consumerism is fragile and consumers unpredictable. Updated with new material, this Second Edition looks at the impact of new technologies on consumerism and the consolidation of consumerism and 'consumer' language in spheres like education and health. The authors discuss the spread of consumerism to developing countries like India and the effect of demographic change and migration. The fallout from 9/11 and United States military hegemony is examined, as is the influence on consumerism of Islamic fundamentalism, the anti-globalization movement, environmental concerns and depleting natural resources. This book is of interest to advanced undergraduate, postgraduate and MBA students taking courses on behaviour, buyer behaviour, customer behaviour, consumers and society and retailing. Any one interested in better understanding consumerism will also find this book a fascinating read.

Dictionary of Building and Civil Engineering Routledge

This comprehensive guide to French grammar covers all the

fundamental aspects of the language, including vocabulary, pronunciation, verb conjugations, and sentence structure. The book is designed for beginners and intermediate learners of French, and is an essential tool for anyone seeking to improve their mastery of the French language. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We

appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Characteristics of Emotional and Behavioral Disorders of Children and Youth Springer Science & Business Media

This book explores the problematic relationship between education, social justice and the State, against the background of comparative education research. The book critiques the status quo of stratified school systems, and the unequal distribution of cultural capital and value added schooling. The authors address one of today's most pressing questions: Are social, economic and cultural divisions between the nations, between school sectors, between schools and between students growing or declining?
