Single Parents and Their Children Simon and Schuster

When she was very young, Baby Halder was abandoned by her mother and left with a cruel, abusive father. She was married off at twelve to a man twice her age who beat her. At fourteen, she was a mother herself. Her early life was marked by overwhelming challenges and heartbreak until, exhausted and desperate, she fled with her three children to Delhi, to work as a maid in some of the city's wealthiest homes. Expected to serve her employers' every demand, she faced a staggering workload that often left her no time to care for her own children. But she never

complained, for such is the lot of the poor in modern-day India. Written without a trace of self-pity, *A Life Less Ordinary* is a shocking look deep inside a world of poverty and subjugation that few outsiders know about—and an inspiring true story of one remarkable woman's strength, courage, and determination to soar above her circumstances.

The Shift is not about what to eat or not eat. It's not about when to eat. It's about building thinking habits, proven through science, that help you lose weight. There are so many myths surrounding weight loss: Setbacks mean failure. Big results require big goals. You need to power through alone. You have to hate your body to lose weight. Happiness awaits you only at the end of the journey. All of these are untrue, unhelpful—and actually undermine long-term weight loss. Dr. Gary Foster's *7 Mindset Shifts* show you how to—and why you should—treat yourself in a way that feels better and primes you for likelier success. His argument and the techniques in each chapter, built on years of research and breakthroughs in cognitive behavioral therapy and positive psychology, can lead to results on the scale—but, more important, in your own thinking. *The Shift* flips old-fashioned weight-loss theory on its head, training you to recognize when your thinking is taking you away from your goals, to focus on action rather than outcome, and to value non-scale victories more than the number on the digital display. It's evidence-based motivation—and it really works! *The 7 Mindset Shifts* include

treating yourself with compassion, leaning into your strengths, appreciating the power of small steps (and more frequent rewards), finding your people, and truly relaxing into happiness and gratitude. “Diet thinking” isn’t habit-forming; mindset shifts are. And muscular yet kind mental habits, like the ones found in *The Shift*, are key to long-term, positive change.

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Walk the Talk Cambridge University Press

In the fourteen years of NDTV's *Walk The Talk* Shekhar Gupta has interviewed more than 600 stellar guests-an outstanding feature for one of Indian TV news channel's most respected shows is the wide diversity of its guests. These range from heads of states to national, regional and international politicians and public figures, from Indian and global film stars to Nobel Laureates, scientists, economists, sports stars (not limited to cricket), spiritual gurus, business tycoons, philanthropists and, of course, activists. This book focuses exclusively on political leaders and public figures. Many of these conversations are path-breaking, and some extremely rare. For example, leaders like Sonia Gandhi and former prime minister P.V. Narasimha Rao have never before engaged in freewheeling, recorded conversations in such detail. Others have broken new ground since-Narendra Modi, L.K. Advani, Pranab Mukherjee, Mayawati and even M. Karunanidhi. There are also global thought leaders and heads of state: David Cameron, Henry Kissinger, and Pushp Kamal Dahal 'Prachanda', among others. There is also the rarest of rare interviews with the former RSS chief K.S. Sudarshan. It was challenging to choose just twenty-five political personalities and voices to feature in this selection. And one criterion has been to try and pick those conversations that mark political shifts and change. Hopefully, these will help provide an understanding of recent political history, and how we have reached the point we are at today, in

the words of these very significant and interesting people.

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York.

Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807- c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

John L. Esposito is one of America's leading authorities on Islam. Now, in this brilliant portrait of Islam today-- and tomorrow-- he draws on a lifetime of thought and research to provide an accurate, richly nuanced, and revelatory account of the fastest growing religion in the world. Here Esposito explores the major questions and issues that face Islam in the 21st century and that will deeply affect global politics: Is Islam compatible with modern

notions of democracy, rule of law, gender equality, and human rights? How representative and widespread is Islamic fundamentalism and the threat of global terrorism? Can Muslim minority communities be loyal citizens in America and Europe? In the midst of these questions Esposito places an important emphasis on the issue of Islamophobia, the threat it poses, and its vast impact on politics and society in the US and Europe. He also turns the mirror on the US and Europe and paints a revealing portrait of how we appear to Muslims. Recent decades have brought extraordinary changes in the Muslim world, and in addressing these issues, Esposito paints a complex picture of Islam in all its diversity--a picture of urgent importance as we face the challenges of the coming century.

Live longer, be healthier and look good naked. Harness your inner bacteria! Did you know that 90 per cent of our body's cells are bacterial? Or that the bacteria that cause meningitis live in our body all the time, without troubling us at all? Or even that life as we know it on earth began because bacteria rode into our world on an asteroid? Health activist Ravi Mantha explains that, in order to remain in the pinkest health, we need to understand and maintain the human ecosystem - which includes looking after our bacteria. Prevent the onset of illnesses, he advises, rather than search for cures to diseases, as Western medicine tends to do. China followed the practice of preventive medicine until a hundred years ago, where doctors were paid if you were healthy, and not paid if you fell sick. In the US, this practice is being re-explored through the concept of 'concierge care'. Until ideas such as these become fashionable, and as long as public health care

systems are wanting, we must care for our own health. The first step to this: understanding the bacteria in our body. Combining the very latest in medical research with prevention and wellness techniques, *All About Bacteria* will shift your focus from pills and products, and move you along on the path to achieving and maintaining excellent health.

This book is a study of modern Bengali words based on the data obtained from a corpus of written texts. The author has used all kinds of data, information and examples from the Bengali corpus to shape up this text. He has made an empirical attempt to analyse Bengali words and other lexical items from the perspective of their surface orthographic representation to understand the internal structure of their composition with a focus on their functional roles in various contexts of their usage within texts. In order to achieve this goal, he has established a link between the internal composition and external representation of words within an interface of usage and function of words in texts. The issues addressed in the book include decomposition of words, interpretation of function of word-formative elements and analysis of lexico-semantic identities of the word-formative elements in relation to their function in words. *Holman New Testament Commentary: Acts* Lindhardt og Ringhof
