MCNEIL ELLEN

The Pacific Reporter Delmar
Bottleneck (n): a person who
advocates for the creation or
perpetuation of government regulation,
particularly an occupational license, to
restrict entry into his or her occupation,
thereby accruing an economic
advantage without providing a benefit to
consumers. The Left, Right, and Center
all hate them: powerful special interests

that use government power for their own
private benefit. In an era when the Left
hates “fat cats” and the Right despises
“crony capitalists,” now there is an artful
and memorable one-word pejorative
they can both get behind: bottleneckers.
A “bottleneck” is anyone who uses
government power to limit competition
and thereby reap monopoly profits and
other benefits. Bottleneckers work with
politicians to constrict competition,
entrepreneurial innovation, and
opportunity. They thereby limit
consumer choice; drive up consumer

prices; and they support politicians who willingly overstep the constitutional limits of their powers to create, maintain, and expand these anticompetitive bottlenecks. The Institute for Justice's new book *Bottleneckers* coins a new word in the American lexicon, and provides a rich history and well-researched examples of bottleneckers in one occupation after another—from alcohol distributors to taxicab cartels—pointing the way to positive reforms.

Duped Simon and Schuster
"Ban Bak" is a definitive study of the discovery and destruction of a secret

Laotian logistics complex on the Ho Chi Minh Trail. Forward Air Controllers observed suspicious activity near the Ban Bak river crossing. CHECO reports of the "'COVEY Bomb Dump'" were flawed, but COVEY 257/Gary Beard corrects the record with first-person accounts by participants. Additional information, both historical and fictional, is provided by veteran authors whose writings lend both resource and context. Ban Bak is third of three FAC related volumes associated with FACs in the Vietnam War (Cleared Hot Vol. I and Cleared Hot Vol. II). BAN BAK extends these accounts by including tributes to fallen FACs, a Time-Line of Forward Air Controllers in history, an Lexicon of FAC Terms and Information, a classified report on "COMBAT INK" surveillance methods,

and an extensive bibliography of FAC related literature and sources useful to all readers of Vietnam history. Ban Bak is 474 pages long, A4 format, in soft binding only

Utah State Bulletin The Economist
The Great Disruption is a collection drawn from Adrian Wooldridge's influential Schumpeter columns in The Economist addressing the causes and profound consequences of the unprecedented disruption of business over the past five years. The Great Disruption has many causes. The internet is spreading faster than any previous technology. Emerging markets are challenging the west's dominance of innovation as well as manufacturing. Clever management techniques such as "frugal innovation" are forcing

companies to rethink pricing. Robots are advancing from the factory floor into the service sector. But these developments are all combining together to shake business life -- and indeed life in general -- to its foundations. The Great Disruption is producing a new class of winners, many of whom are still unfamiliar: Asian has more female billionaires and CEOs than Europe, for example. It is also producing a growing class of losers: old-fashioned universities that want to continue to operate in the world of talk and chalk; companies that refuse to acknowledge that competition is now at warp speed; and business people who think that we still live in the world of company man. It is forcing everybody to adapt or die: workers realize that they will have to jump from

job to job -- and indeed from career to career -- and institutions realize that they need to remain adaptable and flexible. The Great Disruption is all the more testing because it coincides with the Great Stagnation. The financial crisis has not only reduced most people's living standards in the west. It has also revealed that the boom years of 2000-20007 were built on credit: individuals and governments were borrowing money to pay for lifestyles that no longer had any real justification. Employees are having to cope with unprecedented change at a time when they are also seeing their incomes flat or declining. Companies are having to respond to revolutionary innovations even as they are seeing their overall markets contract. We are all having to

run faster in order to stay in the same place. This book begins with a long introduction explaining the thesis of the book and setting it in a broad historical context. It will also introduce readers to Joseph Schumpeter and explain why his ideas about creative destruction are particularly valuable today.

MILADY STANDARD ESTHETICS

FUNDAMENTALS, 11E International

Edition is the essential source for basic

esthetics training. This new edition

builds upon Milady's strong tradition of

providing students and instructors with

the best beauty and wellness education

tools for their future. The rapidly

expanding field of esthetics has taken a

dramatic leap forward in the past decade, and this up-to-date text plays a critical role in creating a strong foundation for the esthetics student. Focusing on introductory topics, including history and opportunities in skin care, anatomy and physiology, and infection control and disorders, it lays the groundwork for the future professional to build their knowledge. The reader can then explore the practical skills of a skin care professional, introducing them to the treatment environment, basic facial treatments, hair removal, and the technology likely to be performed in the salon or spa setting.

The Great Disruption Utah Geological Survey

The Congressional Record is the official

record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873) *California Safety News* Lulu.com Glenn Beck, the New York Times bestselling author of *The Great Reset*, revisits Thomas Paine's *Common Sense*. In any era, great Americans inspire us to reach our full potential. They know with conviction what they believe within themselves. They understand that all actions have consequences. And they

find commonsense solutions to the nation's problems. One such American, Thomas Paine, was an ordinary man who changed the course of history by penning *Common Sense*, the concise 1776 masterpiece in which, through extraordinarily straightforward and indisputable arguments, he encouraged his fellow citizens to take control of America's future—and, ultimately, her freedom. Nearly two and a half centuries later, those very freedoms once again hang in the balance. And now, Glenn Beck revisits Paine's powerful treatise with one purpose: to galvanize Americans to see past government's easy solutions, two-party monopoly, and illogical methods and take back our great country.

Hearings, Reports and Prints of the

Senate Committee on Interior and Insular Affairs Anchor

NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • A murder tale "from inside the

house where murder is born." Haunting, harrowing, and profoundly affecting, *Shot in the Heart* exposes and explores a dark vein of American life that most of us would rather ignore. It is a book that will leave no reader unchanged. Gary Gilmore, the infamous murderer immortalized by Norman Mailer in *The Executioner's Song*, campaigned for his own death and was executed by firing squad in 1977. Writer Mikal Gilmore is his younger brother. In *Shot in the Heart*, he tells the stunning story of their wildly dysfunctional family: their mother, a black sheep daughter of unforgiving Mormon farmers; their father, a drunk,

thief, and con man. It was a family destroyed by a multigenerational history of child abuse, alcoholism, crime, adultery, and murder. Mikal, burdened with the guilt of being his father's favorite and the shame of being Gary's brother, gracefully and painfully relates his story "from inside the house where murder is born... a house that, in some ways, [he has] never been able to leave." Shot in the Heart is the history of an American family inextricably tied up with violence, and the story of how the children of this family committed murder and murdered themselves in payment for a long lineage of ruin.

Journal of Insurance Information

Rowman & Littlefield

The 52 papers in this vary in content from summaries or state-of-knowledge

treatments, to detailed contributions that describe new species. Although the distinction is subtle, the title (Vertebrate Paleontology in Utah) indicates the science of paleontology in the state of Utah, rather than the even more ambitious intent if it were given the title "Vertebrate Paleontology of Utah" which would promise an encyclopedic treatment of the subject. The science of vertebrate paleontology in Utah is robust and intense. It has grown prodigiously in the past decade, and promises to continue to grow indefinitely. This research benefits everyone in the state, through Utah's museums and educational institutions, which are the direct beneficiaries.

Vertebrate Paleontology in Utah

Why do people confess to crimes they

did not commit? And, surely, those cases must be rare? In fact, it happens all the time—in police stations, workplaces, public schools, and the military.

Psychologist Saul Kassin, the world's leading expert on false confessions, explains how interrogators trick innocent people into confessing, and then how the criminal justice system deludes us into believing these confessions. *Duped* reveals how innocent men, women, and children, intensely stressed and befuddled by lawful weapons of psychological interrogation, are induced into confession, no matter how horrific the crime. By featuring riveting case studies, highly original research, work by the Innocence Project, and quotes from real-life exonerees, Kassin tells the story of how false confessions happen, and

how they corrupt forensics, witnesses, and other evidence, force guilty pleas, and follow defendants for their entire lives— even after they are exonerated by DNA. Starting in the 1980's, Dr. Kassin pioneered the scientific study of interrogations and confessions. Since then, he has been on the forefront of research and advocacy for those wrongfully convicted by police-induced false confessions. Examining famous cases like the Central Park jogger case and Amanda Knox case, as well as stories of ordinary innocent people trapped into confession, Dr. Kassin exposes just how widespread this problem is. Concluding with actionable solutions and proposals for legislative reform, *Duped* shows why the stigma of confession persists and how we can

reform the criminal justice system to make it stop.
