In this engaging study, the authors put casuistry into its historical context, tracing the origin of moral reasoning in antiquity, its peak during the sixteenth and early seventeenth century, and its subsequent fall into disrepute from the mid-

seventeenth century.

Readers' comments: A Fabulous, Important Book. Jesper Juul provides parents with such an amazing and absolutely vital approach to raising children that it rings true on every page. Some of what he suggests we as parents do is difficult, but all of it is right on about how we can raise confident, healthy, whole humans, right from the start. I was thrilled to have discovered a book that

allowed me to see different possibilities with child raising. Anyone with a child will gain immensely from reading this book, seeing themselves in his numerous examples, and learning how to move on from there. I am grateful for this book and highly recommend it. No Parent Should Be Without It. With tremendous wisdom and a warm, pragmatic eye, Mr. Juul helps us redefine the ways we look at a child's behavior and our relationship to our children and ultimately, each other. This is a book that doesn't offer easy answers or 'tricks' to help in the raising of your child.

This is a book that helps you see with a child's eye, hear with a child's ear, and feel with a child's heart in ways that feel so natural and obvious, you will wonder why you haven't thought of them before. It is a book that offers day-to-day skills along with the thinking that helps generate them. This groundbreaking book should be on the shelf of all parents everywhere. I cannot recommend it highly enough. If you have children - read this book! This is an amazing book that will surely turn upside down any thoughts you ever had about raising children. Even though you may not agree with all the views in this book, there is so much food for thought and new ideas that you will return to this book again and again for interesting and mind blowing advice.

Familienerziehung im historischen Wandel  
Meyer & Meyer Verlag

This highly interdisciplinary book studies historical famines as an interface of nature and culture. It will bring together researchers from the natural and social sciences as well as the humanities. With reference to recent interdisciplinary concepts (disaster studies, vulnerability studies, environmental history) it will

examine, how the dominant opposition of natural and cultural factors can be overcome. Such an integrated approach includes the "archives of nature" as well as "archives of man". It challenges deterministic models of human-environment interaction and replaces them with a dynamic, historicising approach. As a result it provides a fresh perspective on the entanglement of climate and culture in past societies.

Drawing on a wide variety of European sources, *Childhood in the Middle Ages* (1992) examines attitudes towards children, images of childhood, and the concept of the stages of childhood in medieval culture, from the nobility to the peasantry. It makes fascinating and illuminating reading for anyone interested in the social and cultural history of medieval Europe as well as the history of child-rearing and education.

Handbook of Parenting Springer-Verlag  
Seminar paper from the year 2015 in the subject Didactics - Common Didactics, Educational Objectives, Methods, grade:

1,3, University of Trier, language: English, abstract: Within the framework of this term paper, it will be explained, according to Wolfgang Klafki, what education-theoretical didactics is and what forms of education exist. The question of the meaning of categorical education and the function of didactic analysis will also be explored. Before theories and models of didactics can be explained and contexts understood, a basic understanding of what didactics is in the first place and which factors play a role here must first be established. The question of the meaning of didactics is not easy to answer. The word has its origins in the Greek "didáskein", which translates as "to teach" and "to instruct" or "to learn" and "to be taught". Already here it becomes clear that two elementary processes are interrelated and complement each other, which has not changed until today. Thus didactics is "the theory and practice of learning and teaching". The focus is on the interaction between teachers and learners. Didactics should therefore be a support for mutual interaction between teachers and learners. It is a science of action that is intended to provide teachers with a

practice-oriented way of acting. During the 20th century, educationalists such as Erich Weniger, Paul Heimann and especially Wolfgang Klafki (born 1927), who is considered the "father" of didactics, tried to narrow down and define the term in order to finally develop educational theoretical foundations and didactic theories and models.

The book addresses the complex

relationships among learning, education

and the community. It examines the

significance of the community for the

individual's development and the potential

that learning and education have for the

development of the community. The

volume gathers together the findings of a

number of quantitative and qualitative

studies conducted on different samples,

theoretical discussions set in comparative

international contexts. Although the

studies employ Slovenian samples and

analyse situations in this country, the

contributions address issues that are of

concern to the global research community.

Moreover, they respond to international debates and engage in the dialogue between the local/partial and the global/universal. The book is unique in its embeddedness in the intellectual continental European tradition that has been characterised by the failed historical experience of attempting collective unity through the community understood as a common identity in former Yugoslavia.

Das Buch untersucht den sozialen Wandel von familialer Erziehung in drei Generationen im Zeitraum vom Kaiserreich bis zur Gegenwart. Die Ergebnisse der empirisch-qualitativen Generationenporträts münden in eine Theorie der Familienerziehung.

Grundlegende Annahme ist, dass Familienerziehung im Kontext von drei Generationen ein typisches Muster gegenwärtiger Zeit ist. Favorisiert wird ein Mehrebenenansatz, mit dem vertikal der Zeitraum über drei Generationen und horizontal in jeder Generation drei Generationen fokussiert werden. Untersucht wird, wie sich die Betreuungs- und Erziehungspraxis der Eltern und

Großeltern sowie die Lern- und Bildungsbedingungen der Kinder in familialen Generationsbeziehungen über drei Generationen vor dem Hintergrund der Sozialgeschichte vom Kaiserreich bis zur DDR und nach 1989 verändern und pädagogische Institutionen Einfluss nehmen. Angesetzt wird am Modell des Befehls- und Verhandlungshaushaltes, der um zentrale Inhalte erweitert und präzisiert wird. Diese münden in eine Theorie der Familienerziehung.

The Dictionary of German National Biography is unique, complete and comprehensive with biographies of 60,000 people from the German-speaking world. It covers not only individuals from Germany but also from Austria, Switzerland and other countries where German is or used to be spoken. Coverage stretches all the way from the time of Charlemagne to the present day and includes lesser-known as well as world-famous Germans. In order to ensure that entries were as objective as possible, only individuals whose life and works have come to an end were included.

Anna Bliesner-Steckmann stellt sich der Frage, wie Bildung respektive Didaktik beschaffen sein muss, damit ein moralisch-nachhaltiges Handeln nicht in eine normative Pädagogik mündet. Die Autorin stellt dazu den selbstaufgeklärten, mündigen Lernenden in den Fokus ihrer Arbeit und weist nach, dass es neben einer lerntheoretischen auch einer handlungstheoretischen Grundlegung auf psychologischer Basis bedarf. Ein zentrales Ergebnis ihrer interdisziplinären Studie ist das entwickelte Prozessmodell zu moralisch-nachhaltigem Urteilen und Handeln, aus welchem sich konkrete Hinweise für die Gestaltung pädagogischer Interventionen ableiten lassen.

Dutton Adult

One of the most enduring and controversial issues in American education concerns the place of individual beliefs and moral standards in the classroom. Noddings argues that public schools should address the fundamental questions that teenagers inevitably raise about the nature, value and meaning of life (and death), and to do so across the curriculum without limiting such existential and

metaphysical discussions to separate religion, philosophy or even history classes. Explorations of the existence of a God or gods, and the value and validity of religious belief for societies or individuals, she writes “whether they are initiated by students or teachers, should be part of the free exchange of human concerns—a way in which people share their awe, doubts, fears, hopes, knowledge and ignorance.” Such basic human concerns, Noddings maintains, are relevant to nearly every subject and should be both non-coercive and free from academic evaluation. “Nel Noddings probes the many ways in which children’s questions about God and gods, existence, and the meaning of life can and should be integrated into life in classrooms and the real world of the public schools.” —From the Foreword “This is a rich and sensitive book that will give teachers, administrators, parents, philosophers of education—any concerned citizen—the basis for more substantial discussion and concrete proposals.” —Free Inquiry “Impressive in its sweep of possibilities for exploration in the school curriculum and teacher education.” —Educational Theory *Klassiker der Sozialwissenschaften* GRIN

This volume explores the linguistic diversity and language variation in Berlin. The analytical focus is on the emergence of linguistic, cultural, political and spatial discourses and communities, or discursive and institutional responses to these. The volume provides new insights into language in its local but transnationally conditioned socio-economic embeddedness.

Children: The Challenge gives the key to parents who seek to build trust and love in their families, and raise happier, healthier, and better behaved children. Based on a lifetime of experience with children--their problems, their delights, their challenges--Dr. Rudolf Dreikurs, one of America's foremost child psychiatrists presents an easy to follow program that teaches parents how to cope with the common childhood problems that occur from toddler through preteen years. This warm and reassuring reference helps parents to understand their children's actions better, giving them the guidance necessary to

discipline lovingly and effectively.

Trotz der Pluralisierung von Lebensformen gehören eine dauerhafte Liebe und die gemeinsame Elternschaft weiterhin zu den wichtigsten Lebenszielen. Um die vielfältigen Verunsicherungen, die mit dem sozialen Wandel einhergehen, zu überwinden und die Kontinuität ihrer Beziehungen zu sichern, greifen immer mehr Paare und Eltern auf Ratgeber zurück. Aber welche Leitbilder von Liebe, Zweierbeziehung, Elternschaft und Geschlecht vermitteln die Ratgeber? Die Beiträge dieses Bandes untersuchen erstmals eine große Zahl von Beziehungs- und Erziehungsratgebern im Zeitvergleich und legen ihre jeweiligen kulturellen Legitimationsmuster offen.

*Centuries of Childhood* Balboa Press  
"Olympic Education" is not only a text book for students and teachers in physical and sport education but also for course instructors and coaches in children's youth sport programmes, as well as for executives in sports federations. It answers the question, what the term "Olympic" really means in the broader context of the Olympic Games movement

and as a global purpose and new challenge for a balanced physical, social and moral education. Olympic education has a traditional vision and an important future mission that is relevant for all children and youths, in schools as well as in sport clubs. In five parts and fifteen chapters, the book shows why the Olympic ideals are a modern challenge not only for a new physical and sport education but also for the development of essential life skills for today. It introduces pedagogical and didactical fundamentals for an Olympic education, in order to bring motor abilities, social behaviour and moral actions in sports and everyday life back together again - in the mind, learning and actions of children and youths, but also of grown-ups in the social settings where young people live.

In jungster Zeit ist die kontroverse Debatte um die Integration von Migranten und den gesellschaftlichen Umgang mit Menschen anderer kultureller Herkunft wieder aufgebrochen. Meinungsmacher schlagen Alarm, die Rede ist vom "sozialen Sprengstoff". Kaum ins Blickfeld gerat

dabei, dass wesentliche Integrationsleistungen in den Familien der Migranten selbst erbracht werden. Zwischen den Stuhlen der eigenen und fremden Kultur sehen sich die Familien besonderen Belastungen ausgesetzt. Ob in den Eltern-Kind-Beziehungen, in Erziehungsfragen, im Verhältnis der Generationen und der Weitergabe von Werten, Normen und Einstellungen oder im Hinblick auf die Frage der ethnischen Identität - hier liegen zahlreiche Konfliktpotenziale, die in und von den Familien bewältigt werden müssen. Das Buch analysiert aus interdisziplinärer Perspektive, welche Problembewältigungspotentiale in den Familien vorhanden und welche Hilfen notwendig sind, damit Integration gelingen kann. Das Buch liefert so nicht nur Analysen einer angewandten Kulturpsychologie, sondern vor allem auch praxisrelevantes Grundlagenwissen für die Arbeit in interkulturellen Problembereichen.

The long-anticipated new version of the internationally recognized Early Childhood

Environment Rating Scale®, ECERS-3, focuses on the full range of needs of preschool- and kindergarten-aged children. This widely used, comprehensive assessment tool measures both environmental provisions and teacher-child interactions that affect the broad developmental needs of young children, including: Cognitive Social-emotional Physical Health and safety ECERS-3 also includes additional items assessing developmentally appropriate literacy and math activities. Designed for preschool, kindergarten, and child care classrooms serving children 3 through 5 years of age, ECERS-3: Provides a smooth transition for those already using ECERS-R. Emphasizes the role of the teacher in creating an environment conducive to developmental gains. Is designed to predict child outcomes more accurately and with greater precision. Provides a stronger method of distinguishing between good and truly excellent programs. Offers a complete training program with ongoing support available at the Environment Rating Scales Institute (ERSI) website ([www.ersi.info](http://www.ersi.info)). ECERS-3 is appropriate for state and district-wide QRIS and

continuous improvement; program evaluation by directors and supervisors; teacher self-evaluation; monitoring by agency staff; and teacher education. The established reliability and long term

evidence of validity of the ERS family of instruments make this new version of ECERS particularly useful for RTTT-ELC accountability and research. Suitable for

use in inclusive and culturally diverse programs, ECERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Literacy Learning Activities Interaction Program Structure
