 Determination of Acetic Acid ... Finally,  
 the mass percent of acetic acid in the  
 vinegar can be determined from the  
 mass of the acetic acid in the sample  
 and mass of the vinegar solution that  
 was titrated. ( 5 ) mass % =  $\frac{\text{mass of acetic acid in sample}}{\text{mass of vinegar solution titrated}} \times 100$ . Lab Investigation  
 2 - How Much Acetic Acid is in  
 Vinegar? While analyzing vinegar and the

percent composition of acetic acid in it, an acid/base reaction was performed by adding NaOH, a base, to vinegar, the acid. NaOH was added in small amounts at a time to a beaker containing 5.00 mL of vinegar and 20.0 mL of deionized water. The concept of titration in this lab was to determine the concentration of acetic acid in vinegar by adding base to the solution until the mixture was basic.

Determination of Acetic Acid In Vinegar Lab Explained ... $\text{CH}_3\text{COOH}(\text{aq}) + \text{NaOH}(\text{aq}) \rightarrow \text{CH}_3\text{COONa}(\text{aq}) + \text{H}_2\text{O}(\text{l})$  By adding the sodium hydroxide, which is a basic solution, to the acetic acid, which is an acidic solution, a neutralization reaction occurs. An indicator known as phenolphthalein, is also added to the vinegar.

Titration of Vinegar Lab Answers |

SchoolWorkHelperLab report DETERMINATION OF CONCENTRATION OF ACETIC ACID IN VINEGARLab report DETERMINATION OF CONCENTRATION OF ACETIC ACID ...To determine the amount of acetic acid in vinegar (typically 4-5% by mass) we will use an acid-base titration (neutralization reaction). In this experiment we titrate acetic acid with sodium hydroxide (a strong base). The reaction of acetic acid with sodium hydroxide is shown below:

Equation 3.  $\text{HC}_2\text{H}_3\text{O}_2(\text{aq}) + \text{NaOH}(\text{aq}) \rightarrow \text{NaC}_2\text{H}_3\text{O}_2(\text{aq}) + \text{H}_2\text{O}(\text{l})$

The Determination of Acid Content in VinegarTo determine the molarity and percent by mass of acetic acid in vinegar. Vinegar is essentially a solution of acetic acid ( $\text{HC}_2\text{H}_3\text{O}_2$ ) in water. The concentration of acetic acid

in vinegar may be expressed as a molarity (in mol/L):  $\text{Molarity} = \frac{\text{Moles of Acetic Acid}}{\text{Volume of Vinegar (in L)}}$  or as a mass percent.<sup>11</sup> Titration of Vinegar (Experiment) - Chemistry LibreTexts Formal Lab Report of Vinegar Lab. There is one formal lab report required for the Chem-C125 lab and it is this one. University. Indiana University - Purdue University Indianapolis. Course.
