A celebration of mermaids, wildernesses of waves, and the creatures of the deep through poems by Langston Hughes and cut-paper collage illustrations by multiple Coretta Scott King Award winner Ashley Bryan. The great African American poet Langston Hughes penned poem after poem about the majesty of the sea, and the great African American artist Ashley Bryan, who's spent more than half his life on a small island, is as drawn to the sea as much as he draws the sea. Their talents combine in

this windswept collection of illustrated poems—from "The Negro Speaks of Rivers" to "Seascape," from "Sea Calm" to "Sea Charm"—that celebrates all things oceanic.

A New York Times Notable Book of the Year "Brilliantly breathes life not only into the perils of living at sea, but also into the hidden dangers of domesticity, parenthood, and marriage. What a smart, swift, and thrilling novel." —Lauren Groff, author of *Florida* Juliet is failing to juggle motherhood and her stalled-out dissertation on confessional poetry when her husband, Michael, informs her that he wants to leave his job and buy a sailboat. With their two kids—Sybil, age seven, and George, age two—Juliet and Michael set off for Panama, where their forty-four foot sailboat awaits them. The initial result is transformative; the marriage is given a gust of energy, Juliet emerges from her depression, and the children quickly embrace the joys of being at sea. The vast horizons and isolated islands offer Juliet and Michael reprieve - until they are tested by the unforeseen. A transporting novel about marriage, family and love in a time of unprecedented turmoil, *Sea Wife* is unforgettable in its power and astonishingly perceptive in its portrayal of optimism, disillusionment, and survival.

What do long-distance travelers gain from their voyages, especially when faraway lands are regarded as the source of esoteric knowledge? Mary Helms explains how various cultures

interpret space and distance in cosmological terms, and why they associate political power with information about strange places, peoples, and things. She assesses the diverse goals of travelers, be they Hindu pilgrims in India, Islamic scholars of West Africa, Navajo traders, or Tlingit chiefs, and discusses the most extensive experience of long-distance contact on record--that between Europeans and native peoples--and the clash of cultures that arose from conflicting expectations about the "faraway.". The author describes her work as "especially concerned with the political and ideological contexts or auras within which long-distance interests and activities may be conducted ... Not only exotic materials but also intangible knowledge of distant realms and regions can be politically valuable 'goods,' both for those who have endured the perils of travel and for those sedentary homebodies who are able to acquire such knowledge by indirect means and use it for political advantage." Originally published in 1988. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. This collection of essays on cultural astronomy celebrates the life and work of Clive Ruggles, Emeritus Professor of Archaeoastronomy at Leicester University. Taking their lead from Ruggles' work, the papers present new research focused on three core themes in cultural astronomy: methodology, case studies, and heritage. Through this framework, they show how the study of cultural astronomy has evolved over time and share new ideas to continue advancing the field. Ruggles' work in these areas has had a profound impact on the way that scholars approach evidence of the role of sky in both ancient and modern cultures. While the papers span many time periods and regions, they are

closely connected by these three major themes, presenting methodological investigations of how we can approach archaeological, textual, and ethnographic evidence; describing detailed archaeoastronomical case studies; or stressing the importance of global heritage management. This work will appeal to researchers and scholars interested in the history and development of cultural astronomy.

The concept of kinship is at the heart of understanding not only the structure and development of a society, but also the day-to-day interactions of its citizens. Kinship in Ancient Athens aims to illuminate both of these issues by providing a comprehensive account of the structures and perceptions of kinship in Athenian society, covering the archaic and classical periods from Drakon and Solon up to Menander. Drawing on decades of research into a wide range of epigraphic, literary, and archaeological sources, and on S. C. Humphreys' expertise in the intersections between ancient history and anthropology, it not only puts a wealth of data at readers' fingertips, but subjects it to rigorous analysis. By utilizing an anthropological approach to reconstruct patterns of behaviour it is able to offer us an ethnographic 'thick description' of ancient Athenians' interaction with their kin that offers insights into a range of social contexts, from family life, rituals, and economic interactions, to legal matters, politics, warfare, and more. The work is arranged into two volumes, both utilizing the same anthropological approach to ancient sources. Volume I explores interactions and conflicts shaped by legal and economic constraints (adoption, guardianship, marriage, inheritance, property), as well as more optional relationships in the field of

ritual (naming, rites de passage, funerals and commemoration, dedications, cultic associations) and political relationships, both formal (Assembly, Council) and informal (hetaireiai). Among several important and novel topics discussed are the sociological analysis of names and nicknames, the features of kin structure that advantaged or disadvantaged women in legal disputes, and the economic relations of dependence and independence between fathers and sons. Volume II deals with corporate groups recruited by patrification and explores the role of kinship in these subdivisions of the citizen body: tribes and trittyes (both pre-Kleisthenic and Kleisthenic), phratries, genê, and demes. The section on the demes stresses variety rather than common features, and provides comprehensive information on location and prosopography in a tribally organized catalogue.

Which dimensions of the religious experience of the ancient Greeks become tangible only if we foreground its local horizons? This book explores the manifold ways in which Greek religious beliefs and practices are encoded in and communicate with various local environments. Its individual chapters explore 'the local' in its different forms and formulations. Besides the polis perspective, they include numerous other places and locations above and below the polis-level as well as those fully or largely independent of the city-state. Overall, the local emerges as a relational concept that changes together with our understanding of the general or universal forces as they shape ancient Greek religion. The unity and diversity of ancient Greek religion becomes tangible in the manifold ways in which localizing and generalizing forces interact with each other at different times and

in different places across the ancient Greek world.

Time has always held a fascination for human beings, who have attempted to relate to it and to make sense of it, constructing and deconstructing it through its various prisms, since time cannot be experienced in an unmediated way. This book answers the needs of a growing community of scholars and readers who are interested in this interaction. It offers a series of innovative studies by both senior and younger experts on various aspects of the construction of time in antiquity. Some articles in this book contain visual material published for the first time, while other studies update the field with new theories or apply new approaches to relevant sources. Within the study of antiquity, the book covers the disciplines of Classics and Ancient History, Assyriology, Egyptology, Ancient Judaism, and Early Christianity, with thematic contributions on rituals, festivals, astronomy, calendars, medicine, art, and narrative.

In *As Long as It's Fun*, the biography of Lin and Larry Pardey, Herb McCormick recounts their remarkable sailing career—from their early days in Southern California to their two circumnavigations to their current life in a quiet cove in New Zealand. Through interviews with their families, friends, and critics, McCormick delves deeply into the couple's often-controversial opinions, sometimes-tenuous marriage, and amazing list of accomplishments. *As Long as It's Fun* is as much a love story as it is a sea yarn, and, like all such stories, it's not without complications . . . which makes it not only a sailing tale but also a human one.

Few people would want to test their mettle in an ice-encrusted boat with Ernest Shackleton, sail the Straits of Magellan with Joshua Slocum, or watch with Owen Chase as an angry whale sends his ship to the bottom, thousands of miles from the nearest land. But it's quite another thing to read these true accounts while settled into a favorite chair. Shackleton and Chase persevered in the face of travails that would have given even Job pause. Their stoic accounts are stronger and more dramatic for their total lack of affection, their frankness, and their lack of ego. Their gripping stories are custom made for the imaginative reader who seeks adventure in a more controlled environment, safe and warm, and well fed. Civilized readers with their armchairs anchored firmly to the living room floor. Rich in drama and history, here are fifteen stories that will entertain, inform, and inspire--enduring stories that have attracted generations of readers. The Rough Guide to Dubai (Travel Guide eBook) Cambridge University Press

"People have told us how lucky we are, to get to sail far away. My typical response is to say luck has little to do with it, that we've worked so very hard, made many difficult decisions, and given up so much for so many years to get to this place on the Earth. But on nights like this, under a sky full of stars and our spinnaker full of warm trade wind pulling us deeper into the South Pacific Ocean, I see how very lucky we truly are to be here together." In 2011, the Johnson family of four left their comfortable home in the Pacific Northwest, trading it in for a life of unpredictability, adventure, and joy aboard their 38-foot sailboat, Wondertime. With their two young daughters, Sara and Michael sailed north to Canada, south to Mexico, then west across the Pacific, eventually landing in New Zealand. All along the way, Sara kept an online journal of their travels and trials, her stories followed by hundreds of friends and family members. Now, the best of her stories, essays, and voyage logs are collected in this freshly-edited volume for all to enjoy. Much more than a typical travel log, this is the story of a family's journey into uncertainty, and coming out on the other side knowing that the only thing that's truly certain is the importance of treasuring time with the ones you love. *Chase's Calendar of Events 2008* Cambridge University Press No detailed description available for "American Universities and Colleges".
