When a science camp is attacked by a mysterious threat, Ben and Gwen must go undercover as campers to find out who or what is responsible. To have any chance of saving the day, they'll need to follow the grisly trail of science experiments gone wrong.

Doom Dimension Scholastic Inc.
After a family friend bought one of his drawings for 20p, six-year-old Jack came up with the idea to 'draw anything' in return for donations to the hospital that treats his two-year-old brother. His parents set up a website and thought they might make £100. After two weeks, Jack had over 500 picture requests and had raised over £10,000 for the Sick Kids Friends

Foundation. Parents Ed and Rose with Jack, Toby and Noah appeared on the *Fern Britton Show* and Jack's project was featured on Russell Howard's *Good News* four times. Coverage by STV news, BBC news, and CBBC Newsround have all helped spread the word about this creative and generous little boy. Jack is slowly but steadily drawing the requested pictures which range from a 'dinosaur diving into a pool of jelly' (#1) to 'my (extremely bald) friend Brian dancing like a crazy man' (#80). He doesn't draw every day, only when he wants to, and his parents estimate that he'll finish at the end of August. For the latest drawings, or to make a donation yourself, visit jackdrawsanything.com.

West African Economic and Monetary Union (WAEMU) Egmont Books (UK)

This Selected Issues paper on West African Economic and Monetary Union presents external stability assessment report. The current account deficit declined in 2014. Although gross international reserve coverage has increased slightly, part of the current account deficit has been financed by a decline in commercial banks' net foreign assets. Contingent on the implementation of government's consolidation plans, and helped by a favorable oil price outlook, the current account deficit would further gradually

decline and be matched by enough financial inflows in the medium term. According to various metrics, the real exchange rate appears to be broadly aligned with fundamentals. International reserve coverage should increase to provide stronger buffers against immediate short-term risks. Structural competitiveness and investment efficiency improvements will be essential to ensure that the planned large investment programs translate into growth and export gains as well as increased private inflows into the region.
