Studies In New Mexican Spanish

Houghton Mifflin
Harcourt
Current digital
processes of
production,

reproduction and
distribution of
information affect the
perception of time,
space, matter, senses
and identity. This book
explores the research
question: what are the
psycho-physiological
dimensions of the ways
people experience
their presence in the
world and the world's

presence in them? Because they deal principally with issues of perception and sentience, with a particular emphasis on art, there is in all chapters an invitation to experience a shift of perception. An embodied sensation of the world and a re-sensorialization of the environment are described to complement the visually-biased perspective with a renewed sense of humans' relationship to their spatial and material surrounding. As such, this book presents the topological reunion of sensation and cognition, of sense and sensibility and of body, self and world. The perception of the "Point of Being", to which the various

chapters of this book invite the reader, proposes an alternative to the "Point of View" inherited from the Renaissance; it offers a way to situate the sense of self through the physical, digital and electronic domains that shape physical, social, cultural, economic and spiritual conditions at the beginning of the twenty-first century. Nine authors explore different ways in which the paradigm of the Point of Being can bridge the interval, the discontinuity, between subjects and objects that began with the diffusion of the phonetic alphabet. The Point of Being is a signpost on that journey.
Response in the Living and Non-living
Ballantine Books

A collection of eight short stories in which a variety of special characters experience the transfiguring power of love.

The gap between psychotherapeutic practice and clinical theory is ever widening. Therapists still don't know what role interpersonal relations play in the development of the most common psychopathologies. Valeria Ugazio bridges this gap by examining phobias, obsessive-compulsions, eating disorders, and depression in the context of the family, using an intersubjective approach to personality. Her

concept of "semantic polarities" gives a groundbreaking perspective to the construction of meaning in the family and other interpersonal contexts. At no point is theory left in the wasteland of abstraction. The concreteness of the many case studies recounted, and examples taken from well-known novels, will allow readers to immediately connect the topics discussed with their own experience. *Silvae* Springer
The author's second collection of imaginative stories about the evolution of the universe transcends the boundaries of space and time while mixing comedy with higher mathematics.

In-fertilità. Un
approccio
multidisciplinare
ABRAMS

When they first met in 1925, Martin Heidegger was a star of German intellectual life and Hannah Arendt was his earnest young student. What happened between them then will never be known, but both would cherish their brief intimacy for the rest of their lives. The ravages of history would soon take them in quite different directions. After Hitler took power in Germany in 1933, Heidegger became rector of the university in Freiburg, delivering a notorious pro-Nazi address that has been the subject of considerable controversy. Arendt, a Jew, fled Germany the same year, heading first to Paris and then

to New York. In the decades to come, Heidegger would be recognized as perhaps the most significant philosopher of the twentieth century, while Arendt would establish herself as a voice of conscience in a century of tyranny and war. Illuminating, revealing, and tender throughout, this correspondence offers a glimpse into the inner lives of two major philosophers.

Infertilità due punto zero. Il concepimento difficile: dal generale al particolare Archipelago
A work by the Italian-Jewish writer, Primo Levi. It describes his arrest as a member of the Italian anti-fascist resistance during the

Second World War, and his incarceration in the Auschwitz concentration camp from February 1944 until the camp was liberated on 27 January 1945.

The Periodic Table

Houghton Mifflin
Harcourt

Giovanni Gentile was one of the most important and controversial thinkers of twentieth-century Italy. His philosophy and fascist ideas reflect the defining characteristics of the Italian romantic rebellion against European and English enlightenment thinking. The Ariadne's thread, which runs through and unifies all of Gentile's thought, originates accordingly from his neo-Hegelian reaction to the philosophy of Kant and

of Kant's immediate predecessors. The range of Gentile's ideas on pedagogy, logic, metaphysics, political theory, and aesthetics; the original way in which he developed and adapted the thoughts of Hegel, Fichte, and Marx; and finally, his description of himself as the philosopher of fascism all encourage us to revisit and re-evaluate his system. This book reveals how Gentile came to advocate his «actual idealism» and evaluates his systematic philosophy by making explicit inconsistencies that arise from within his system and by questioning his idealist assumptions.

Inspired by the
rhythms of the Periodic
Table, Primo Levi
assesses his life in
terms of the chemical
elements he associates
with his past. From his
birth into an Italian
Jewish family through
his training as a
chemist, to the pain

and darkness of the
Holocaust and its
aftermath, Levi reflects
on the difficult course
of his life in this
heartfelt and deeply
moving book.

**Ceramics of the
World** Simon and
Schuster

A novel of a delightful
eccentric on a search
for truth, by the
renowned author of
Invisible Cities. In *The
New York Times Book
Review*, the poet
Seamus Heaney
praised Mr. Palomar as
a series of "beautiful,
nimble, solitary feats of
imagination."

Throughout these
twenty-seven
intricately structured
chapters, the musings
of the crusty Mr.
Palomar consistently
render the world
sublime and ridiculous.
Like the telescope for
which he is named, Mr.

Palomar is a natural observer. "It is only after you have come to know the surface of things," he believes, "that you can venture to seek what is underneath." Whether contemplating a fine cheese, a hungry gecko, or a topless sunbather, he tends to let his meditations stray from the present moment to the great beyond. And though he may fail as an objective spectator, he is the best of company. "Each brief chapter reads like an exploded haiku," wrote Time Out. A play on a world fragmented by our individual perceptions, this inventive and irresistible novel encapsulates the life's work of an artist of the highest order, "the greatest Italian writer of the twentieth

century" (The Guardian).

Francesco Vezzoli

Clarendon Press
 Enchanting stories about the evolution of the universe, with characters that are fashioned from mathematical formulae and cellular structures. "Naturally, we were all there, - old Qfwfq said, - where else could we have been? Nobody knew then that there could be space. Or time either: what use did we have for time, packed in there like sardines?" Translated by William Weaver. A Helen and Kurt Wolff Book
The Book of Theseus
 Viking
 "Wonderful... Calvino's prose is sparkling as ever, and he approaches ideas with wit and an open mind, always ready to

challenge a stale point of view. This anthology will delight Calvino fans old and new.” —Publishers Weekly A rich collection of essays offering an extraordinary global view of Calvino’s approach to writing, reading, and interpreting literature. An extraordinary collection of essays, forewords, articles, and interviews, *The Written World and the Unwritten World* displays the remarkable intelligence and razor-sharp wit of prolific Italian writer Italo Calvino as he explores the meaning of literature in a rapidly changing world. From classics to contemporary literature, from tradition to the avant-garde, Calvino masterfully explores

reading, writing, and translating through careful and illuminating discussion of the works of Bakhtin, Brecht, Cortázar, Thomas Mann, Octavio Paz, Georges Perec, Salman Rushdie, Gore Vidal, and more. Drawn from *Mondo scritto e mondo non scritto* (2002), *Sulla fiaba* (1988), and other uncollected essays, this volume of previously untranslated work—now rendered in English by acclaimed translator Ann Goldstein—is a major statement in literary criticism.

Letters, 1925-1975

Taylor & Francis
A masterful collection about intimacy, loneliness, and time, each inspired by different works of art, spanning the entirety of the great Italian writer's career. In

Stories with Pictures, Antonio Tabucchi responds to photographs, drawings, and paintings from his dual homelands of Italy and Portugal, among other European countries. The stories in this collection spring forth from the shadows of Tabucchi's imagination, as he steps into worlds just hidden from view. From inscrutable masks of pre-Columbian gods, stamps of bright parrots and postcards of yellow cities, portraits of devilish Portuguese nuns, the way to these remote landscapes appear like a "train emerging from a thick curtain of heat." As we peer through the curtain, what we find on the other side rings distinctly human, a world charged with

melancholic longing for time gone by. "Sight, hearing, voice, word" Tabucchi writes, "this flow isn't in one direction, the current is back and forth."

Reading these stories, one feels the pendulum current, and the desire in this remarkable author to hold the real in the surreal.

"Infertilità due punto zero. Il concepimento difficile: dal generale al particolare", un'opera di Valentina Berruti, Katia Carlini, Alessia Greco

Semantic Polarities and Psychopathologies in the Family Vintage

Il presente volume include scritti ispirati dal Convegno "Infertilità: un approccio multidisciplinare", tenutosi a Roma il 5 e il 6 maggio 2017, presso

l'Aula Magna della Facoltà di Medicina e Psicologia dell'Università degli Studi di Roma "La Sapienza". Obiettivo del Convegno è stato quello di promuovere il confronto interdisciplinare tra ginecologi, medici di medicina generale, ostetriche, psicologi, biologi e giuristi sui temi inerenti l'infertilità, la sterilità e le tecniche di Procreazione Medicalmente Assistita (PMA). All'interno di una prospettiva bio-psico-sociale, sono stati presentati diversi modelli di intervento multidisciplinare, focalizzando l'attenzione sulle connessioni tra teoria e prassi. Nello specifico, è stato affrontato il tema del ruolo della psicologia nei percorsi

di PMA, nell'ottica di promuovere un intervento olistico di supporto al paziente in questo complesso momento di vita, ma anche di sostenere l'efficacia del lavoro dell'équipe terapeutica.

The Point of Being
Houghton Mifflin
Harcourt

"A little masterpiece of originality and clarity."—George Steiner "A necessary book."—Roberto Saviano "A wonderful little book that will delight you."—François Busnel International Best Seller / Now in English for the First Time In this thought-provoking and extremely timely work, Nuccio Ordine convincingly argues for the utility of useless knowledge and against the contemporary

fixation on utilitarianism—for the fundamental importance of the liberal arts and against the damage caused by their neglect. Inspired by the reflections of great philosophers and writers (e.g., Plato, Dante, Montaigne, Shakespeare, Borges, and Calvino), Ordine reveals how the obsession for material goods and the cult of utility ultimately wither the spirit, jeopardizing not only schools and universities, art, and creativity, but also our most fundamental values—human dignity, love, and truth. Also included is Abraham Flexner’s 1939 essay “The Usefulness of Useless Knowledge,” which originally prompted Ordine to write this book. Flexner—a founder and

the first director of the Institute for Advanced Study in Princeton—offers an impassioned defense of curiosity-driven research and learning. La galassia sommersa University of Chicago Press
An important collection of around 500 aphorisms (greguerías), which are a landmark of innovative literary technique akin to that of Futurism. Ramón Gómez de la Serna introduced Spain to European avant-garde literature with this new genre, presented here in a stunningly thorough representation of an influential form and including an in-depth analysis by the translator. The book also includes a list of other works by Gómez

de la Serna in English translation, two brief bibliographies, and a keyword index.

Darkest Italy Houghton Mifflin

In the following three chapters, Ferraris examines the universalization of the domain of interpretation with Heidegger, the development of Heideggerian philosophical hermeneutics with Gadamer and Derrida, and the relation between hermeneutics and epistemology, on the one hand, and the human sciences, on the other.

Theologia Mystica

HarperCollins

Multi-generational Family Therapy reveals the limits of the medical model in treating mental and relational problems. It

instead provides a toolkit for therapists, observing family functioning over at least three generations to explore the developmental history of the family in order to discover links between past trauma and broken emotional bonds, and current problems experienced by family members. Maurizio Andolfi honours the voices of children in therapy and enlists them as the key to unlocking unresolved family issues. The book provides an experiential model of intervention that centres on creativity and humanity as the best way to build an alliance and work with a family in crisis. Demonstrating with case examples, Andolfi outlines the relational

skills and inner self of the therapist, focusing on the ability to be direct, authentic and emphatic. The use of relational questioning, silence, body language, physical contact and movement in therapy are explored in depth. Multi-generational Family Therapy will be of

interest to anyone working with individuals, couples and families including child, adolescent and adult psychotherapists, psychiatrists, psychologists and counsellors. It will also prove useful to private practitioners, social workers, doctors, paediatricians and educators
