times – notably the ship trackway between Diolkos and the Isthmus of Corinth around 600 BC – it would take several thousand years before the first fare-paying passenger service was launched in the early nineteenth century. Some two hundred years on, it is possible to travel by train to some of the world's most remote and remarkable destinations, and track the many wonderful

legacies of the Earth's extensive history – man-made and otherwise. From prehistoric rock formations to skyscraper cities, slow steam engines to high-speed bullet trains, let *A History of the World in 500 Railway Journeys* be your guide. Through its beautifully illustrated pages, and 500 awe-inspiring railway journeys, you can chart your own transcontinental itinerary

through time. Chug through canyons, steam past ancient monuments, speed through cities, luxuriate in the railcars of presidents and queens, or make express connections between key historical moments or epic eras, *A History of the World in 500 Railway Journeys* has it all. A must-read for travellers, railfans and history buffs alike, offering inspiration and information in

equal measure.

The German National Railway in World War II

Schiffer Publishing The Second World War made the greatest demands on the German Reichsbahn (national railway). Year after year, great quantities of

war materiel were transported and almost always delivered. At times the trains rolled over nearly the entire continent of Europe. This heavily illustrated book documents the everyday life along the German rail lines on many war fronts. This is the first book of its kind in English for both the railroad fan as well as the military historian.

Dziga Vertov
The LEGO Trains Book
Dziga Vertov was one of the greatest innovators of Soviet cinema.

The radical complexity of his work—in both sound and silent forms—has given it a central place within contemporary	theoretical inquiry. Vertov's writings, collected here, range from calculated manifestos setting forth his heroic vision of film's	potential to dark ruminations on the inactivity forced upon him by the bureaucratization of the Soviet state.
