EBOOK: Economics, South African Edition  
Irwin/McGraw-Hill

Dornbusch, Fischer, and Startz has been a long-standing, leading intermediate macroeconomic theory text since its introduction in 1978. This revision retains most of the text's traditional features, including a middle-of-the-road approach and very current research, while updating and simplifying the exposition. A balanced approach explains both the potential and limitations of economic policy.

Macroeconomics employs a model-based approach to macroeconomic analysis and demonstrates how various models are connected with the goal of giving students the capacity to analyze current economic issues in the context of an economic frame of reference. The only pre-requisite continues to be principles of economics.

**Principles of Macroeconomics**

Irwin/McGraw-Hill

Calculus for Business, Economics, and the Social and Life Sciences introduces calculus in real-world contexts and provides a sound, intuitive understanding of the basic concepts students need as they pursue careers in business, the life sciences, and the social sciences. The new Ninth Edition builds on the straightforward writing style, practical applications from a

variety of disciplines, clear step-by-step problem solving techniques, and comprehensive exercise sets that have been hallmarks of Hoffmann/Bradley's success through the years.

**Microeconomics** Oxford University Press Mainstream textbooks present economics as an objective science free from value judgements; that settles disputes by testing hypotheses; that applies a pre-determined body of principles; and contains policy prescriptions supported by a consensus of professional opinion. The Economics Anti-Textbook argues that this is a myth - one which is not only dangerously misleading but also bland and boring. It challenges the mainstream textbooks' assumptions, arguments, models and evidence. It puts the controversy and excitement back into economics to reveal a fascinating and a vibrant field of study - one which is more an 'art of persuasion' than it is a science. The Economics Anti-Textbook's chapters parallel the major topics in the typical text, beginning with a boiled-down account of them before presenting an analysis and critique. Drawing on the work of leading economists, the Anti-Textbook lays bare

the blind spots in the texts and their sins of omission and commission. It shows where hidden value judgements are made and when contrary evidence is ignored. It shows the claims made without any evidence and the alternative theories that aren't mentioned. It shows the importance of power, social context and legal framework. The Economics Anti-Textbook is the students' guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on.

*Afrotopia* McGraw-Hill Ryerson

Imagine that there is a medication you could administer to your teens that would help regulate their moods, increase their sense of trust, and improve their overall brain function. Imagine, moreover, that it's free, has no negative side effects, and helps to boost the immune system. And it's available in an unlimited supply. It sounds too good to be true, but in *You're Ruining My Life!* Jennifer Kolari shows how her unique approach to parenting can have all these effects and more. Kolari's CALM technique is based on the therapeutic strategy of mirroring. Used regularly, it can strengthen the parent-child bond and build emotional independence. Kolari provides information, advice, sample conversations, and anecdotal examples to show how parents can turn what they have learned into everyday practices that help them to

reconnect with their teens so they can spend more time enjoying each other—and less time at war.

Study Guide for Microeconomics McGraw Hill

A vibrant meditation and poetic call for an African utopian philosophy of self-reinvention for the twenty-first century. In the recent aftermath of colonialism, civil wars, and the AIDS crisis, a new day finally seems to be shining on the African continent. Africa has once again become a site of creative potential and a vibrant center of economic growth and production. No longer stigmatized by stereotypes or encumbered by the traumas of the past—yet unsure of the

future—Africa has other options than simply to follow paths already carved out by the global economy. Instead, the philosopher Felwine Sarr urges the continent to set out on its own renewal and self-discovery—an active utopia that requires a deep historical reflection on the continent's vast mythological universe and ancient traditions, nourishes a cultural reinvention, and embraces green technologies for tackling climate change and demographic challenges. Through a reflection on contemporary African writers, artists, intellectuals, and musicians, Sarr elaborates Africa's unique philosophies and notions of communal value and economy deeply rooted in its ancient traditions and landscape—concepts such as ubuntu, the life force in Dogon culture; the Rwandan imihigo; and the Senegalese teranga. Sarr takes the reader on a philosophical journey that is as much inward as outward, demanding an elevation of the collective consciousness. Along the way, one sees the contours of an africanity, a contemporary Africa united as a continent through the creolization of its cultural traditions. This is Felwine Sarr's Afrotopia.
