Play with art like never before in this exciting new activity book from the best-selling author of the Let's Make Some Great Art series. Marion Deuchars has created a surprising and engaging range of activities and games organized into seven sections of Drawing, Color, Shapes, Paint, Paper, Printing, and Pattern. Each section is not only a great opportunity to play, but also helps to shape and form artistic ability and confidence. Discover the joys of making your own marbled paper. Create your own language in pictures. Providing hours of endless fun and exploration, Art Play will bring out the artist in everyone.

De entre las grietas Pelican Publishing

A tradition rooted in the mythology of romanticism and its conception of the artist as a cultural hero would want to believe that everything pertaining to the life of a genius has to bear the mark of the sublime. Everything in their lives -gestures, decisions, personality traits, eccentricities, even the most dissonant mistakes- are thus transformed into esthetic substance. We would want their lives to be masterworks, a perfect coherence- and continuity between the work and its creator. Roland Barthes has criticized this conception as a basically bourgeois aberration - the perennial realism of the bourgeois culture, its need to identify the signified with the signifier. And then we learn about the real human dimension of these heroes- their pettiness, narcissism, avariciousness, arbitrariness, and childishness, all of which are no more than their human specificity. We are scandalized; either the work or the figure lies. A harmonious painting, a novel or masterful symphony cannot possibly be the product of a person capable of such spiritual smallness. Then we are left with two choices—to dismiss the work as an essentially hypocritical utterance, or to disqualify the creator as the accidental author of some work that happened to be marvelous but was simply by virtue of a great skill, not supported by an equally admirable human quality.

"With its gentle affirmations, inspirational quotes, fill-in-the-blank lists and tasks — write yourself a thank-you letter, describe yourself at 80, for example — The Artist's Way proposes an egalitarian view of creativity: Everyone's got it."—The New York Times "Morning Pages have become a household name, a shorthand for unlocking your creative potential"—Vogue Over four million copies sold! Since its first publication, The Artist's Way phenomena has inspired the genius of Elizabeth Gilbert and millions of readers to embark on a creative journey and find a deeper connection to process and purpose. Julia Cameron's novel approach guides readers in uncovering problems areas and pressure points that may be restricting their creative flow and offers techniques to free up any areas where they might be stuck, opening up opportunities for self-growth and self-discovery. The program begins with Cameron's most vital tools for creative recovery - The Morning Pages, a daily writing ritual of three pages of stream-of-conscious, and The Artist Date, a dedicated block of time to nurture your inner artist. From there, she shares hundreds of exercises, activities, and prompts to help readers thoroughly explore each chapter. She also offers guidance on starting a "Creative Cluster" of fellow artists who will support you in your creative endeavors. A revolutionary program for personal renewal, The Artist's Way will help get you back on track, rediscover your passions, and take the steps you need to change your life.

Journey back to where it all started in this deluxe collection showcasing the classic Topps trading cards from 1993—timed for the theatrical release of Jurassic World: Dominion When Jurassic Park was released almost 30 years ago, it was an immediate blockbuster and went on to become one of entertainment's largest multimedia franchises, with five more films, theme park attractions, and a robust consumer product program—including a set of trading cards released by Topps in 1993 to tie into the film. This comprehensive collection of the original trading card series—timed to publish alongside the release of Jurassic World: Dominion—includes the fronts and backs of all of these classic cards, plus the special chase cards and rare promotional material. The book also includes text and commentary by Gary Gerani, editor of the original series, and an afterword by Chip Kidd, who created and designed the cover of Michael Crichton's Jurassic Park, which became the iconic logo for the franchise.

How Do Dinosaurs Get Well Soon? Abrams

From a master of cinema comes this "gold mine of a book . . . a rocket ride to the potential future" of filmmaking (Walter Murch). Celebrated as an "exhilarating account" of a revolutionary new medium (Booklist), Francis Ford Coppola's indispensable guide to live cinema is a boon for moviegoers, film students, and teachers alike. As digital movie-making, like live sports, can now be

performed by one director—or by a collaborative team online—it is only a matter of time before cinema auteurs will create “live” movies to be broadcast instantly in faraway theaters. “Peppered with brilliant personal observations” (Wendy Doniger), *Live Cinema and Its Techniques* offers a behind-the-scenes look at a consummate career: from Coppola’s formative boyhood obsession with live 1950s television shows and later attempts to imitate the spontaneity of live performance on set, the book usefully includes a guide to presenting state-of-the-art techniques on everything from rehearsals to equipment. A testament to Coppola’s prodigious enthusiasm for reinvigorating the form, *Live Cinema* is an indispensable guide that “reenergizes . . . the search for a new way of storytelling” (William Friedkin).

Vehicles, vehicles, vehicles—nearly 100 of them—in all shapes and sizes! A giant crane hovers over a construction site, a space ship roars into space. . . . Supersized spreads feature marvelously detailed illustrations that just beg to be pored over again and again. Best of all, lots of flaps, popups, pull-tabs, and rotating wheels bring the various vehicles to life. Readers will poke into a ship’s hold, explore the innards of a garbage truck, and help demolish a house. Any child who’s ever been intrigued by the roar of an engine will adore this extraordinary collection of things on the go, from the everyday to the nearly outrageous—yes, there’s even a poop-scooper scooter!

NPR Best Books of 2018 A teen girl and her robot embark on a cross-country mission in this illustrated science fiction story, perfect for fans of *Ready Player One* and *Black Mirror*. In late 1997, a runaway teenager and her small yellow toy robot travel west through a strange American landscape where the ruins of gigantic battle drones litter the countryside, along with the discarded trash of a high-tech consumerist society addicted to a virtual-reality system. As they approach the edge of the continent, the world outside the car window seems to unravel at an ever faster pace, as if somewhere beyond the horizon, the hollow core of civilization has finally caved in.

Twenty-one philosophers join forces to investigate the implications of the Jurassic Park franchise for our lives, our values, and our future. Human beings live and thrive by modifying nature, but when do the risks of changing nature outweigh the likely benefits? If it’s true that “Life will find a way,” should we view any modified or newly reconstituted life as a hazard? The new scientific information we could gain by bringing back T. Rex or other dinosaurs is immense, including greater understanding of biology leading to immeasurable medical benefits, but should we choose to let sleeping dinosaurs lie? And if we do bring them back by reconstituting them from ancient DNA, are they really what they were, or is something missing? If life will find a way, then why isn’t the Dodo still around? How close are we, as a matter of fact, to achieving Jurassic Park? Are we really likely to see reconstituted dinosaurs or other ancient species in the near future? How do the different forces—human curiosity, profitability, and philanthropy—interact to determine what actually happens in such cases? What moral standards should be applied to those who try to bring back lost worlds? If velociraptors could talk, what would they tell us? The idea of bringing back the dead and the powerful is not limited to biological species. It also applies to bringing back old gods, old philosophies, old institutions, and old myths. If revived and once again let loose to walk the Earth, these too may turn out to be more dangerous than we bargained for.
