In the aftermath of Alexander the Great's conquests in the late fourth century B.C., Greek garrisons and settlements were established across Central Asia, through Bactria (modern-day Afghanistan) and into India. Over the next three hundred years, these settlements evolved into multiethnic, multilingual communities as much Greek as they were indigenous. To explore the lives and identities of the inhabitants of the Graeco-Bactrian and Indo-Greek kingdoms, Rachel Mairs marshals a variety of evidence, from archaeology, to coins, to documentary and historical texts. Looking particularly at the great city of Ai Khanoum, the only extensively excavated Hellenistic period urban site in Central Asia, Mairs explores how these ancient people lived, communicated, and understood themselves. Significant and original, *The Hellenistic Far East* will highlight Bactrian

studies as an important part of our understanding of the ancient world.

The first scholarly examination of underground music in the digital age
Sounds of the Underground Titan Publishing Company
In basements, dingy backrooms, warehouses, and other neglected places around the world music is being made that doesn't fit neatly into popular or classical categories and genres, whose often extreme sounds and tiny concerts hover on the fringes of these commercial and cultural mainstreams. The term "underground music" as it's being used here connects various forms of music-making that exist outside or on the fringes of mainstream institutions and culture, such as noise, free improvisation, and extreme metal. This is music that makes little money, that's noisy and exploratory in sound and that's largely independent from both the market and from traditional high art institutions. It sometimes exists at the fringes of these commercial and cultural institutions, as for example with experimental metal or

improv, but for the most part it's removed from the mainstream, "underground," as we see with noise artists such as Werewolf Jerusalem or Ramleh, obscure black metal artists such as Lord Foul, and improvisers such as Maggie Nicols. In response to a lack of previous scholarly discussion, Graham provides a cultural, political, and aesthetic mapping of this broad territory. By outlining the historical background but focusing on the digital age, the underground and its fringes can be seen as based in radical anti-capitalist politics or radical aesthetics while also being tied to the political contexts and structures of late capitalism. The book explores these various ideas of separation and captures, through interviews and analysis, a critical account of both the music and the political and cultural economy of the scene.

Unravelling the genealogies and permutations of conspiracist worldviews, this work shows how this web of urban legends has

spread among sub-cultures on the Internet and through mass media, and how this phenomenon relates to larger changes in American culture.

On les appelle les Observateurs. Ils sont là depuis l'aube des temps, présent à tous les grands moments de l'Humanité. Ils ont pour mission d'être très discrets, presque invisibles, et de ne surtout jamais agir. Ils peuvent seulement prendre des notes dans leur carnet de cuir noir. C'est l'un de ceux-ci que vous tenez entre les mains. Il appartenait à l'Observateur nommé Septembre. C'est lui qui était chargé de surveiller Walter Bishop, l'un de nos plus brillants scientifiques. Ce faisant, il aussi suivi les destins de Peter Bishop, de l'agent spécial

Olivia Dunham, de la division Fringe, de William Bell et de Massive Dynamic. Il a été le témoin privilégié de toutes les mystérieuses affaires qui ont failli mener deux univers à la destruction totale. Ce sont toutes ces notes, soigneusement classées et répertoriées, ainsi que diverses archives top secrètes, que vous allez découvrir dans ce dossier exclusif.

This volume presents the first comprehensive study of the Kushite concepts of order in the state and in the cosmos as they were conceptualized in royal and temple texts, in urban architecture, in the structure of temple iconography, and in the relationship between the society and the temples as places of popular worship, archives of historical memory, and centres of cultural identity.

This archaeological report provides a comprehensive study of the excavations carried out at Amheida

House B2 in Egypt's Dakhleh Oasis between 2005 and 2007, followed by three study seasons between 2008 and 2010. The excavations at Amheida in Egypt's western desert, begun in 2001 under the aegis of Columbia University and sponsored by NYU since 2008, are investigating all aspects of social life and material culture at the administrative center of ancient Trimithis. The excavations so far have focused on three areas of this very large site: a centrally located upper-class fourth-century AD house with wall paintings, an adjoining school, and underlying remains of a Roman bath complex; a more modest house of the third century; and the temple hill, with remains of the Temple of Thoth built in the first century AD and of earlier structures. Architectural conservation has protected and partly restored two standing funerary monuments, a mud-brick pyramid and a tower tomb, both of the Roman period. This volume presents and discusses the architecture, artifacts and ecofacts recovered from B2 in a holistic manner, which has rarely before been attempted in a full

report on the excavation of a Romano-Egyptian house. The primary aim of this volume is to combine an architectural and material-based study with an explicitly contextual and theoretical analysis. In so doing, it develops a methodology and presents a case study of how the rich material remains of Romano-Egyptian houses may be used to investigate the relationship between domestic remains and social identity.

The development of Kushite concepts of order in the state and the cosmos forms the focus of László Török's latest volume. Taking a wide variety of textual and iconographical evidence as his points of departure, the author sheds light on the formation of, and interaction between basic concepts such as inhabited space, sacred space, sacred landscape, historical memory and political legitimacy. The author traces this development by discussing the royal and temple texts, urban architecture, the structure of temple iconography, and the relationship between the society and the temples as places of popular worship, archives

of historical memory, and centres of cultural identity. This volume presents the first comprehensive study on the subject.

The history of globalisation is usually told as a history of shortening distances and acceleration of the flows of people, goods and ideas. Channelling Mobilities refines this picture by looking at a wide variety of mobile people passing through the region of the Suez Canal, a global shortcut opened in 1869. As an empirical contribution to global history, the book asks how the passage between Europe and Asia and Africa was perceived, staged and controlled from the opening of the Canal to the First World War, arguing that this period was neither an era of unhampered acceleration, nor one of hardening borders and increasing controls. Instead, it was characterised by the channelling of mobilities through the differentiation, regulation and bureaucratisation of movement. Telling the stories of tourists, troops, workers, pilgrims,

stowaways, caravans, dhow skippers and others, the book reveals the complicated entanglements of empires, internationalist initiatives and private companies.

This book is about the transformation of Europe into "Eurabia," a cultural and political appendage of

the Arab/Muslim world. Eurabia is fundamentally anti-Christian, anti-Western, anti-American, and antisemitic. The institution responsible for this transformation, and that continues to propagate its ideological message, is the Euro-Arab Dialogue, developed by European and Arab politicians and intellectuals over the past thirty years.--From publisher description.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing

museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century. *Le Deuxième Sexe* Cambridge University Press

Journal of American Folklore

A classic work in political philosophy, intellectual history and economics, *The Road to Serfdom* has inspired and infuriated politicians and scholars for half a century. Originally published in 1944, it was seen as heretical for its passionate warning against the dangers of state control over the means of

production. For Hayek, the collectivist idea of empowering government with increasing economic control would lead not to a utopia but to the horrors of Nazi Germany and Fascist Italy. This new edition includes a foreword by series editor and leading Hayek scholar Bruce Caldwell explaining the book's origins and publishing history and assessing common misinterpretations of Hayek's thought. Caldwell has also standardized and corrected Hayek's references and added helpful new explanatory notes. Supplemented with an appendix of related materials and forewords to earlier editions by the likes of Milton Friedman, and Hayek himself, this new edition of *The Road to Serfdom* will be the definitive version of Friedrich Hayek's enduring masterwork.
