Essentials of Nursing Practice Lippincott Williams & Wilkins

With the increasing number of complaints and court cases relating to healthcare disputes, healthcare practitioners (HCPs) are now facing more challenges and dilemmas in their daily practices. This book is unique in that most chapters are written jointly by two authors: one with legal training and one with a healthcare background. The balanced view offered thus allows readers to gain a thorough understanding of the concepts presented. Although most of the examples and scenarios are specific to medical doctors, the basic principles and ethical considerations as well as the enforcement of laws and regulations are, with some modifications, equally applicable to other HCPs, such as dentists, nurses, midwives, etc. Readers interested in healthcare law and ethics from numerous fields and stages of training, including legal and healthcare practitioners, trainees, postgraduate researchers and undergraduate students, will find this book both informative and practical as an aid to their work and studies.

The Practice of Professional Coaching

Change is the life-blood of consulting just as organizations endure only through successful change. The reality of this mutual need lies at the heart of what consulting is all about. Consultants solve problems created by the powerful forces of change in an organization's environment and in so doing, create change themselves. The Practice of Professional Consulting is a comprehensive examination of what has been called "the world's newest profession." In this practical resource Edward Verlander offers an overview of the industry and includes the most useful processes, tools, and skills used by successful consultants to produce solutions for their clients. The book also reveals why consulting is a growing and attractive career option. The best practices used by leading consulting firms are included in the book as well as the capabilities skillful consultant use in each stage of engagement. Verlander also recommends ways to ensure a consultant can solve a client's problems in a systematic, professional way. At the very heart of the book is the emphasis he puts on what is needed to become a truly trusted consultant. Filled with a wealth of must-have information from a wide range of consulting professionals, the book includes: a model of the consulting cycle; a diagnostic instrument for assessing consulting roles; ideas of how to develop political intelligence to navigate client organizations; tools for managing consulting meetings, risk assessment, and skills transfer; techniques in communications, emotional intelligence, presentations, and listening; and much more. Written for anyone wishing to start a consulting business, new employees at established consulting firms, facilitators of consulting training programs, and faculty at

business schools, this important resource provides an easy way to understand the stages, roles, and tasks of consulting found in any type of consulting and it provides simple and easy-to-use techniques and templates for implementation.

Healthcare Law and Ethics: Principles & Practices Springer Publishing Company Legal and Ethical Issues for the IBCLC is the only text that covers the day-to-day legal and ethical challenges faced by the International Board Certified Lactation Consultant (IBCLC) in the workplace--in any work setting or residence. Since lactation management crosses many disciplines in the healthcare arena, most IBCLCs carry other licenses and titles. Consequently, what they can and cannot do while performing their lactation consultant role is of vital importance, information that is often difficult to find. Legal and Ethical Issues for the IBCLC is a practical resource that provides guidance on what is proper, legal, and ethical IBCLC behavior. It reflects the 2011 IBLCE Code of Professional Conduct and discusses how to devise an appropriate, safe, legal, and ethical plan of action in the consultation of a breastfeeding dyad.

Research and scholarly communication is increasingly seen in the light of open science, making research processes and results more accessible and collaborative. This brings with it the chance to better connect research and society by introducing new avenues for engagement with citizens. This book presents the proceedings of the 19th International Conference on Electronic Publishing (Elpub), held in Valetta, Malta,

in September 2015. This year's conference explores the interplay of two dimensions of electronic publishing – the ever growing volume of digital collections and the improved understanding of the widest user group, citizens. This exciting theme encompasses human, cultural, economic, social, technological, legal, policy-related, commercial, and other relevant aspects. Echoing the conference agenda, the book covers a wide range of topics, including engagement with citizens and professionals, enhanced publishing and new paradigms, discovery and digital libraries, open access and open science, as well as the use and reuse of data. Addressing the most recent developments in these areas, the book will be of interest to practitioners, researchers and students in information science, as well as users of electronic publishing.

Professional Nursing E-Book John Wiley & Sons

This book explores important questions about the relationship between professional practice and learning, and implications of this for how we understand professional expertise. Focusing on work accomplished through partnerships between practitioners and parents with young children, the book explores how connectedness in action is a fluid, evolving accomplishment, with four essential dimensions: times, spaces, bodies, and things. Within a broader sociomaterial perspective, the analysis draws on practice theory and philosophy, bringing different schools of thought into productive contact, including the work of Schatzki, Gherardi, and recent developments in cultural historical activity theory. The book takes a bold view, suggesting practices and learning are entwined but distinctive phenomena. A clear and novel framework is

developed, based on this idea. The argument goes further by demonstrating how new, coproductive relationships between professionals and clients can intensify the pedagogic nature of professional work, and showing how professionals can support others' learning when the knowledge they are working with, and sense of what is to be learned, are uncertain, incomplete, and fragile.
