How does Australia's unique geographical, cultural and historical position influence its approach to foreign policy? What key challenges does Australia face on the world stage, and how can it overcome them? Reflecting the messy reality of foreign policy decision-making, this book helps you to understand the changes and continuities in Australia's approach. For example, does the US withdrawal from Vietnam in 1973 and collapse of South Vietnam continue to cast a shadow over Australian foreign policy, or is it relevant only in understanding the dynamics of the

cold war? Using an Australian Strategic Culture framework, O'Keefe sheds light on the characteristics that make Australia behave in a way different to any other country and equips you with analytic skills to understand the main debates, such as: - In what sense could Australia be seen as a 'good' international citizen? - Have national interests trumped global responsibilities? - How does the intersection between civil society and public opinion interact with foreign policy making? This book is essential reading if you are a student of Australian foreign policy, as well as of broader Australian domestic politics and international relations.

 Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

The Climate Threat. Crisis for Democracy? University of Toronto Press
 From established sports journalist Ben Hunt, the very first biography of the up-and-coming British driver Lando Norris, published on the brink of the British Grand Prix. As the youngest ever British Formula 1 driver, Lando Norris is trailblazing his way through the world of motor racing. After signing as a junior driver for McLaren in 2017, he has since asserted himself as the team's brightest talent and an aspiring

world champion. Born to British and Belgian parents and raised in the idylls of south-west England, Lando's childhood reflects how even the calmest of upbringings can create an adrenaline junkie. As one of a new cohort of young drivers seeking to assert their dominance in the sport, Lando is a uniquely modern sportsman, who celebrates learning and personal development, but who nonetheless has the killer instinct required to take him to the very pinnacle of F1. In Lando Norris, motor sport aficionado and journalist Ben Hunt draws on his extensive driver and paddock access to seek to understand what makes Lando tick and examines how this young British driver has been well and truly raised in the mould of a champion.

In an age defined by divisive discourse and disinformation, democracy hangs in the balance. Let's Agree to Disagree seeks to reverse these trends by fostering constructive dialogue through critical thinking and critical media literacy. This transformative text introduces readers to useful theories, powerful case studies, and easily adoptable strategies for becoming sharper critical thinkers, more effective communicators, and critically media literate citizens.

Digital Innovation for Healthcare in COVID-19 Pandemic: Strategies and Solutions Hachette UK

A lively and multi-faceted account of Evelyn and William De Morgan, exploring a unique artistic partnership that spanned several cultural circles including the Pre-Raphaelites and Arts and Crafts movement. With a partnership spanning two centuries, the Pre-Raphaelite painter Evelyn (1855-1919) and Arts and Crafts potter and author William De Morgan (1839-1917) influenced several significant art movements in nineteenth-century Britain. Despite this, their impact has been relatively overlooked in comparison with their better-known contemporaries. Evelyn & William De Morgan is the first major publication devoted to the work of either artist and their unique relationship. It draws out each artist's individuality while providing a comprehensive view of the expanded cultural milieu in which they functioned, not least with regard to new attitudes towards Victorian marriage as a working partnership. The fully illustrated publication features numerous contributions which explore the reach of the De Morgans' partnership, their political and spiritual interests, and their immersion within several influential cultural circles of the day, including Pre-

Raphaelite, Arts and Crafts, and Aesthetic Movement groups. The book presents a lively and multifaceted account of the De Morgans and their creative partnership. Published in association with Delaware Art Museum Exhibition Schedule: Delaware Art Museum, Wilmington (October 22, 2022-January 29, 2023) Crocker Art Museum, Sacramento, CA (September 17, 2023-January 7, 2024) Museum of Fine Arts, St. Petersburg, FL (January 27, 2024-May 2024)

Sailor Talk Springer Nature

This is the first book-length treatment of the 'turncoat' John Poyer, the man who initiated the Second Civil War through his rebellion in south Wales in 1648. The volume charts Poyer's rise from a humble glover in Pembroke to become parliament's most significant supporter in Wales during the First Civil War (1642-6), and argues that he was a more complex and significant individual than most commentators have realised. Poyer's involvement in the poisonous factional politics of the post-war period (1646-8) is examined, and newly discovered material demonstrates how his career offers fresh insights into the relationship between national and local politics in the 1640s, the use of print and publicity by provincial interest groups, and the importance of local factionalism in understanding the course of the civil war in south Wales. The volume also offers a substantial analysis of Poyer's posthumous reputation after his execution by firing squad in April 1649. [Following the Mississippian Spread](#) Our Sunday Visitor

A key point in the book is the need to focus more seriously at the energy problem as the real problem behind global warming. The failure of global climate policies to reduce CO2 emissions and halt climate change has led an increasing number of scientist and activists to lose confidence in democracy's ability to handle climate change and led them to look to more authoritarian measures to meet the problem. The book documents these trends, also from a historical perspective, criticize them and sketches more democratic alternatives.

Excavating the Histories of Slave-Trade and Pirate Ships Springer Nature

Winner of the 2016 Pulitzer Prize for Drama Now a major motion picture, available on Disney Plus. Goodreads best non-fiction book of 2016 From Tony Award-winning composer-lyricist-star Lin-Manuel Miranda comes a backstage pass to his groundbreaking, hit musical Hamilton. Lin-Manuel Miranda's groundbreaking musical Hamilton is as revolutionary as its subject, the poor kid

from the Caribbean who fought the British, defended the Constitution, and helped to found the United States. Fusing hip-hop, pop, R&B, and the best traditions of theater, this once-in-a-generation show broadens the sound of Broadway, reveals the storytelling power of rap, and claims the origins of the United States for a diverse new generation. HAMILTON: THE REVOLUTION gives readers an unprecedented view of both revolutions, from the only two writers able to provide it. Miranda, along with Jeremy McCarter, a cultural critic and theater artist who was involved in the project from its earliest stages - "since before this was even a show," according to Miranda - traces its development from an improbable performance at the White House to its landmark opening night on Broadway six years later. In addition, Miranda has written more than 200 funny, revealing footnotes for his award-winning libretto, the full text of which is published here. Their account features photos by the renowned Frank Ockenfels and veteran Broadway photographer, Joan Marcus; exclusive looks at notebooks and emails; interviews with Questlove, Stephen Sondheim, leading political commentators, and more than 50 people involved with the production; and multiple appearances by President Obama himself. The book does more than tell the surprising story of how a Broadway musical became an international phenomenon: It demonstrates that America has always been renewed by the brash upstarts and brilliant outsiders, the men and women who don't throw away their shot.

A 2022 SPE Outstanding Book Honorable Mention Improvement Science: Promoting Equity in Schools is intended for classroom teachers, school leaders, and district leaders charged with leading improvement efforts in schools. From questions such as "how do I develop a love of reading in my classroom?" to "how can I better manage student behavior during independent learning time?" to "what should we do to make sure kids of all races read at grade level by 3rd grade" to "how could we include families of all backgrounds as partners in learning" or "how do we increase our graduation rate among underserved students," this book shares real-life examples from those who are currently leading equity-focused improvement in our classrooms and schools. If you are curious about how Improvement Science has been used, or how others have succeeded—or failed—at equity-focused improvement efforts in our classrooms and in our schools, or if you're wondering how to spur discussions in school districts, universities, and communities about leading equity-focused improvement, this book is for you. Teachers, students, family members, community members, principals and superintendents will be inspired to embrace Improvement Science as a method to improve equity in their schools. The book helps people new to Improvement Science to understand the basic steps to implement the process. If you're a beginner, it provides some basic steps and a resource (<https://www.carnegiefoundation.org/our-ideas/six-core-principles-improvement/>) to help you understand the process better; for those with some experience, the book will be an excellent refresher and tool with functional suggestions to take your practice further. 1. Form a Team. 2. Examine Data. 3. Ask Why. 4. Read Research. 5. Get Perspective of Those Closest to the Problem. 6. Plan the Change. After you've done the above, then

it's time to test one idea, using short Plan Do Study Act cycles. These are short improvement cycles. Students are only in our classrooms generally for one year, so the cycles need to be short, perhaps even as short as one week, to ensure that every instructional move we are making truly does improve the experience of the students. Readers of Improvement Science: Promoting Equity in Schools will be taking an important step toward achieving the goal of producing socially just classrooms and schools. WATCH: Meet the Authors (ZOOM recording from #CPED21 Virtual Convening, 10/20/21). This book is the first to specifically trace the movement of Mississippian maize farmers throughout the US Midwest and Southeast. By providing a backdrop of shifting climatic conditions during the period, this volume also investigates the relationship between farmers and their environments. Detailed regional overviews of key locations in the Mississippi Valley, the Ohio Valley, and the peripheries of the Mississippian culture area reveal patterns and variation in the expression of Mississippian culture and interactions between migrants and local communities. Methodologically, the case studies highlight the strengths of integrating a variety of data sets to identify migration. The volume provides a broader case study of the links between climate change, migration, and the spread of agriculture that is relevant to archaeologists and anthropologists studying early agricultural societies throughout the world. Key

patterns of adaptation to and mitigation of the effects of droughts, for example, provide a framework for understanding the options available to societies in the face of climate change afforded by the time-depth of an archaeological perspective.

[Chase's Calendar of Events 2020](#) Liverpool University Press

Television and film have always been connected, but recent years have seen them overlapping, collaborating, and moving towards each other in ever more ways. Set amidst this moment of unprecedented synergy, this book examines how television and film culture interact in the 21st century. Both media appear side by side in many platforms or venues, stories and storytellers cross between them, they regularly have common owners, and they discuss each other constantly. Jonathan Gray and Derek Johnson examine what happens at these points of interaction, studying the imaginary borderlands between each medium, the boundary maintenance that quickly envelops much discussion of interaction, and ultimately what we allow or require television and film to be.

Offering separate chapters on television exhibition at movie theaters, cinematic representations of television, television-to-film and film-to-television adaptations, and television producers crossing over to film, the book explores how each zone of interaction invokes fervid debate of the roles that producers, audiences, and critics want and need each medium to play. From *Game of Thrones* to *The TV Set*, *Bewitched* to the *Marvel Cinematic Universe*, hundreds of TV shows and films are discussed. *Television Goes to the Movies* will be of interest to students and scholars of television studies, film studies, media studies, popular culture, adaptation studies, production studies, and media industries.

[The Freemason and Masonic Illustrated. A Weekly Record of Progress in Freemasonry](#) Theatre Communications Group

The shutdown in economic activity due to the coronavirus disease (COVID-19) crisis has resulted in a short-term decline in global carbon emissions, but the long-term impact of the pandemic on the transition to a low-carbon economy is uncertain. Looking at previous episodes of financial and economic stress to draw implications for the current crisis, we find that tighter financial constraints and adverse economic conditions are generally detrimental to firms' environmental

performance, reducing green investments. The COVID-19 crisis could thus potentially slow down the transition to a low-carbon economy. In light of the urgent need to reduce global greenhouse gas emissions, these findings underline the importance of climate policies and green recovery packages to boost green investment and support the energy transition. Policies that support the sustainable finance sector, such as improved transparency and standardization, could further help mobilize green investments.

[Formula One 2021](#) Bloomsbury Publishing
Offering clear strategies rooted in research and expert recommendations, the new edition of *First Aid for Teacher Burnout* empowers teachers to prevent and recover from burnout while finding success at work in a sustainable way. Each chapter explores a different common cause of teacher burnout and provides takeaway strategies and realistic tips. Chapter coverage includes fighting low morale, diminishing stress, streamlining grading, reducing workload, leveraging collaboration, using technology to your advantage, managing classroom behavior, advocating for support from your administration, securing the help of parents and community, and more. New in this edition, the author expands on discussion about teacher activism, using digital resources, as well as a wealth of tips throughout for those teaching virtually. Full of reflection exercises, confessions from real teachers, and veteran teacher tips, this accessible book provides easy-to-implement steps for alleviating burnout problems so you can enjoy peace and success in your teaching.

"One of the most joyous and clear-eyed approaches to playing a character that I have ever read...I was already in awe of his performance; now I'm in awe of his humanity and attention to detail, and willingness to share the hard work and magic that goes into it." —Lin-Manuel Miranda, from his Foreword
Hamilton and Me is a unique, behind-the-scenes account of preparing for, rehearsing and performing in one of the most important cultural phenomena of our time. When Lin-Manuel Miranda's groundbreaking musical *Hamilton* opened in London's West End in December 2017, it was as huge a hit as it had been in its original production off and on Broadway. Lauded by critics and audiences alike, the show would go on to win a record-equaling seven Olivier Awards—including Best Actor in a Musical for Giles Terera, for his portrayal of Aaron Burr. For Terera, though, his journey as Burr had begun more than a year earlier, with his first audition in New York, and continuing through extensive research and preparation, intense rehearsals, previews, and finally opening night itself. Throughout this time he kept a journal, recording his experiences of the production and the process of creating his award-winning performance. This book, *Hamilton and Me*, is that journal. It is also deeply personal, as Terera reflects on experiences from his life that he drew on to shape his acclaimed portrayal. Illustrated with photographs and featuring an exclusive foreword by Lin-Manuel Miranda, this book is essential reading for all fans of *Hamilton*—offering fresh, first-hand insights into the music and characters they know and love so well—and for aspiring and current performers or students, and anyone who wants to discover what it really felt like to be in the room where it happened.
