JOSE CAROLYN

**Transformation of
Higher Education
Through Institutional
Online Spaces** LSU Press
This book focuses on soil
and water conservation at

global scale. It is a serious
environmental problem
that will threaten the
socio-economic well-being
of the majority of global
population in future. The
book examines the
current situation of land
degradation in multiple
regions of the world and
offers alternative

approaches to solve the
problems through sharing
advanced technologies
and lessons learned. It
provides comprehensive
assessment on
characteristics, level and
effect of degradation in
different regions. It's a
highly informative
reference both for

researchers and graduate students.

Race and the Wild

West Forest Service

In today's society, it is very common for decisions that influence us all to be made by a combination of interested parties, all with their own agenda. In this instance, how can we be sure that the decision is the correct one, not just decided by the group with the most political influence or most money? Such groups have now become fundamental deci

Creative Arts, Health, and Wellbeing Bloomsbury Publishing

"A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders,

Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction."--Publisher's description.

Wolves on the Hunt

Princeton University Press
For nearly half a century, celebrated historian Ron Tyler has researched, interpreted, and exhibited western American art. This splendid volume, gleaned from Tyler's extensive career of

connoisseurship, brings together eight of the author's most notable essays, reworked especially for this volume. Beautifully illustrated with more than 150 images, *Western Art, Western History* tells the stories of key artists, both famous and obscure, whose provocative pictures document the people and places of the nineteenth-century American West. The artists depicted in these pages represent a variety of personalities and artistic styles. According to Tyler, each

of them responded in unique ways to the compelling and exotic drama that unfolded in the West during the nineteenth century—an age of exploration, surveying, pleasure travel, and scientific discovery. In eloquent and engaging prose, Tyler unveils a fascinating cast of characters, including the little-known German-Russian artist Louis Choris, who served as a draftsman on the second Russian circumnavigation of the globe; the exacting and precise Swiss artist

Karl Bodmer, who accompanied Prince Maximilian of Wied on his sojourn up the Missouri River; and the young American Alfred Jacob Miller, whose seemingly frivolous and romantic depictions of western mountain men and American Indians remained largely unknown until the mid-twentieth century. Other artists showcased in this volume are John James Audubon, George Caleb Bingham, Alfred E. Mathews, and, finally, Frederic Remington, who

famously sought to capture the last glimmers of the “old frontier.” A common thread throughout Western Art, Western History is the important role that technology—especially the development of lithography—played in the dissemination of images. As the author emphasizes, many works by western artists are valuable not only as illustrations but as scientific documents, imbued with cultural meaning. By placing works of western art within these broader

contexts, Tyler enhances our understanding of their history and significance. *New Laboratories* Bloomsbury Publishing This book is the first comprehensive study combining and integrating advertising, culture and translation within the framework of colonial, Commonwealth, and postcolonial studies, and globalization. It addresses a number of controversial issues evident in two relatively young disciplines, as a result of decades of research and teaching in university

courses. A cross-cultural approach to translational issues and the translatability of advertising cohesively is adopted here, exploring the dynamics of the conflict between the ‘centre’ and the ‘periphery’. It introduces the concept of advertising English as lingua franca (AELF), marking new trends in the domain of varieties of English around the world (VEAW). The data examined here show the ambivalent polarity conditioning advertising and

translation: both have been mutually exclusive, and both have been subject to bans, censorship and ideological control, racism, propaganda, and stereotyping. In their fundamental principles and concepts of theories and applications, however, neither discipline can exist outside a free market and total freedom of expression and trust.

This handbook provides broad coverage of the languages indigenous to North America, with special focus on typologically interesting features and areal characteristics, surveys of current work, and topics of particular importance to communities. The volume is divided into two major parts: subfields of linguistics and family sketches. The subfields include those that are customarily addressed in discussions of North American languages (sounds and sound

structure, words, sentences), as well as many that have received somewhat less attention until recently (tone, prosody, sociolinguistic variation, directives, information structure, discourse, meaning, language over space and time, conversation structure, evidentiality, pragmatics, verbal art, first and second language acquisition, archives, evolving notions of fieldwork). Family sketches cover major language families and isolates and highlight

topics of special value to communities engaged in work on language maintenance, documentation, and revitalization.

Global Degradation of Soil and Water Resources

Martinus Nijhoff Publishers
This book fills a gap in the historiographical and theoretical fields of race, gender, and war. In brief, *Race and Gender in Modern Western Warfare (RGMWW)* offers an introduction into how cultural constructions of identity are transformed by war and how they in

turn influence the nature of military institutions and conflicts. Focusing on the modern West, this project begins by introducing the contours of race and gender theories as they have evolved and how they are employed by historians, anthropologists, sociologists, and other scholars. The project then mixes chronological narrative with analysis and historiography as it takes the reader through a series of case studies, ranging from the early nineteenth century to the

Global War of Terror. The purpose throughout is not merely to create a list of so-called "great moments" in race and gender, but to create a meta-landscape in which readers can learn to identify for themselves the disjunctures, flaws, and critical synergies in the traditional memory and history of a largely monochrome and male-exclusive military experience. The final chapter considers the current challenges that Western societies, particularly the United

States, face in imposing social diversity and tolerance on statist military structures in a climates of sometimes vitriolic public debate. RGMWW represents our effort to blend race, gender, and military war, to problematize these intersections, and then provide some answers to those problems.

Advances in Dam Engineering University of Oklahoma Press
The International Tribunal for the Law of the Sea is an independent judicial body established by the

United Nations Convention on the Law of the Sea to adjudicate disputes arising out of the interpretation and application of the Convention. The Tribunal is open to States Parties to the Convention. It is also open to entities other than States Parties (States and international organizations non-parties to the Convention and natural or juridical persons) in cases provided for in the Convention or other agreements conferring jurisdiction on the

Tribunal. The Yearbook will give lawyers, scholars, students as well as the general public easy access to information about the jurisdiction, procedure and organization of the Tribunal and also about its composition and activities in 2004. The Yearbook is prepared by the Registry of the Tribunal and is also available in French (*Annuaire 2004*).
Self-Tracking Washington State University Press
Long before Confederation created a nation-state in northern

North America, Indigenous people were establishing vast networks and trade routes. Volcanic eruptions pushed the ancestors of the Dene to undertake a trek from the present-day Northwest Territories to Arizona. Inuit migrated across the Arctic from Siberia, reaching Southern Labrador, where they met Basque fishers from northern Spain. As early as the fifteenth century, fishing ships from western Europe were coming to Newfoundland for cod, creating the greatest transatlantic maritime link

in the early modern world. Later, fur traders would take capitalism across the continent, using cheap rum to lubricate their transactions. The contributors to *Before Canada* reveal the latest findings of archaeological and historical research on this fascinating period. Along the way, they reframe the story of the Canadian past, extending its limits across time and space and challenging us to reconsider our assumptions about this supposedly young country. Innovative and

multidisciplinary, *Before Canada* inspires interest in the deep history of northern North America. [Women's Bands in America IAP](#)
The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. The Quarterly Review publishes articles that utilize various methodologies that permit generalizable results which help guide

the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research briefs, editorials, reviews of programs and scholarly works, and columns. The Quarterly Review defines distance education as institutionally based formal education in which the learning group is separated and interactive technologies are used to unite the learning group. *Western Art, Western History* McGill-Queen's

Press - MQUP
The knowledge society arises from the combination of four interdependent elements: the production of knowledge through research, its transmission through education, its dissemination through information and communication technologies, and its exploitation through innovation. For this reason, higher education institutions (HEIs) are the main component of the formation of intellectual capital because they are

the key element of the knowledge society, so it is necessary that they continue to be the main source of the necessary skills that allow the increase of economic competitiveness, sustainability, and citizen welfare within the framework of quality education and equity. The Formation of Intellectual Capital and Its Ability to Transform Higher Education Institutions and the Knowledge Society is an essential research publication that provides systemic research on the

formation of intellectual capital in higher education and its impact on the knowledge society. Highlighting topics such as educational programs, management strategy, and educational studies, this book is meant for educators, educational technologists, students, researchers, professionals, and administrators.

French Connections examines how the movement of people,

ideas, and social practices contributed to the complex processes and negotiations involved in being and becoming French in North America and the Atlantic World between the years 1600 and 1875. Engaging a wide range of topics, from religious and diplomatic performance to labor migration, racialization, and both imagined and real conceptualizations of “Frenchness” and “Frenchification,” this volume argues that cultural mobility was fundamental to the

development of French colonial societies and the collective identities they housed. Cases of cultural formation and dislocation in places as diverse as Quebec, the Illinois Country, Detroit, Haiti, Acadia, New England, and France itself demonstrate the broad variability of French cultural mobility that took place throughout this massive geographical space. Nevertheless, these communities shared the same cultural root in the midst of socially and politically fluid

landscapes, where cultural mobility came to define, and indeed sustain, communal and individual identities in French North America and the Atlantic World. Drawing on innovative new scholarship on Louisiana and New Orleans, the editors and contributors to French Connections look to refocus the conversation surrounding French colonial interconnectivity by thinking about mobility as a constitutive condition of culture; from this perspective, separate

“spheres” of French colonial culture merge to reveal a broader, more cohesive cultural world. The comprehensive scope of this collection will attract scholars of French North America, early American history, Atlantic World history, Caribbean studies, Canadian studies, and frontier studies. With essays from established, award-winning scholars such as Brett Rushforth, Leslie Choquette, Jay Gitlin, and Christopher Hodson as well as from new, progressive thinkers such as Mairi Cowan,

William Brown, Karen L. Marrero, and Robert D. Taber, French Connections promises to generate interest and value across an extensive and diverse range of concentrations. Crown Jewel Wilderness CRC Press Nontimber forest products (NTFPs) are fundamental to the functioning of healthy forests and play vital roles in the cultures and economies of the people of the United States. However, these plants and fungi used for food, medicine, and other

purposes have not been fully incorporated into management, policy, and resource valuation. This report is a forest-sectorwide assessment of the state of the knowledge regarding NTFPs science and management information for U.S. forests and rangelands (and hereafter referred to as the NTFP assessment). The NTFP assessment serves as a baseline science synthesis and provides information for managing nontimber forest resources in the United States. In addition,

this NTFP assessment provides information for national-level reporting on natural capital and the ecosystem services NTFPs provide. The report also provides technical input to the 2017 National Climate Assessment (NCA) under development by the U.S. Global Change Research Program (USGCRP). *The Northwest Ordinance* IGI Global
The surge in the demand for higher education is closely connected with the liberalization and globalization of education.

Websites and social media have been chosen for promotional purposes for obvious reasons – they are globally accessible. For rapid communication of a significant amount of information, virile institutional websites and social media spaces with promotional messages have become very important assets for higher institutions and their stakeholders. Transformation of Higher Education Through Institutional Online Spaces presents multidisciplinary and

interdisciplinary approaches to promotional discourses as presented on higher institution online spaces. Covering topics such as brand building and marketing, content marketing, curriculum marketing, digital marketing, higher education digital marketing, and higher education marketing campaigns, this book is ideal for educational website managers, educational institution managers, public relations units, researchers,

academicians, practitioners, instructors, and students. *Actors and Performers Yearbook 2019* Bloomsbury Publishing Actors and Performers Yearbook is an established and respected directory that enables actors to find work in stage, screen and radio. It is the only directory to provide detailed information for each listing and specific advice on how to approach companies and individuals, saving hours of further research. From

agents and casting directors to producing theatres, showreel companies and photographers, *Actors and Performers Yearbook* editorially selects only the most relevant and reputable contacts for the actor. *Actors and Performers Yearbook* features articles and commentaries, providing valuable insight into the profession: auditions, interviews and securing work alongside a casting calendar and advice on contracts and finance. This is an incredibly useful

professional tool in an industry where contacts and networking are key to career survival. The listings detailed in this edition have been thoroughly updated alongside fresh advice from industry experts. [The Languages and Linguistics of Indigenous North America](#) Cambridge Scholars Publishing "Includes access to Oxford Medicine Online"--Cover. **Quarterly Review of Distance Education** IGI Global On the Korean peninsula, there exist two sovereign

states—the Republic of Korea (ROK or South Korea) and the Democratic People's Republic of Korea (DPRK or North Korea)—both of whom hold separate membership at the United Nations. This book discusses the construction of "one Korea" and highlights the potential benefits of unification for the Koreans and the international community. Arguing that Korean unification is intrinsically international in nature, the authors outline how the process and outcome

would impact upon the policies of the four major powers—the U.S., China, Russia, and Japan. In addition, the authors highlight the possible far-reaching repercussions of unification on the political and economic dynamics of Northeast Asia. Making a case for the two Koreas and interested powers to plan and orchestrate their acts for sustained peace and gradual unification on the Korean peninsula, this book examines the Korean question and the related issue of peace building in Northeast Asia

from a global perspective. It will be of interest to students and scholars researching politics and international relations. Advertising Culture and Translation Penguin Expansion of water resources is a key factor in the socio-economic development of all countries. Dams play a critical role in water storage, especially for areas with unequal rainfall and limited water availability. While the safety of existing dams, periodic re-evaluations and life extensions are

the primary objectives in developed countries, the design and construction of new dams are the main concerns in developing countries. The role of dam engineers has greatly changed over recent decades. Thanks to new technologies, the surveillance, monitoring, design and analysis tasks involved in this process have significantly improved. The current edited book is a collection of dam-related papers. The overall aim of this edited book is to improve modeling, simulation and

field measurements for different dam types (i.e. concrete gravity dams, concrete arch dams, and embankments). The articles cover a wide range of topics on the subject of dams, and reflect the scientific efforts and engineering approaches in this challenging and exciting research field. Navigating by the Southern Cross Springer Nature As the settler state of Canada expanded into Indigenous lands, two traditions clashed in a

bruising series of asymmetrical encounters over land use and ownership. One site of conflict was Kahnawà:ke. The *Laws and the Land* delineates the establishment of a settler colonial relationship from early contact ways of sharing land; land practices under Kahnawà:ke law; and ultimately the Canadian invasion in the guise of the Indian Act, private property, and coercive pressure to assimilate. This meticulously researched book is

connected to larger issues of human relations with environments, communal and individual ways of relating to land, legal pluralism, historical racism and inequality, and Indigenous resurgence. *Passenger and Merchant Ships of the Grand Trunk Pacific and Canadian Northern Railways* IGI Global Build a Successful Art Career 2015 Artist's & Graphic Designer's Market is the must-have reference guide for any artist who wants to establish or expand a

career in fine art, illustration, or graphic design. Thousands of successful artists have relied on us to help develop their careers and navigate the changing business landscape. The 2015 Artist's & Graphic Designer's Market introduces a whole host of new features and guarantees the most up-to-date, individually verified market contacts possible. Expand your art business with these resources: • A FREE 1-year subscription to ArtistsMarketOnline.com,

where you can find industry contacts, track your submissions, get the latest art and design news, and much more (PLEASE NOTE: Free subscriptions are NOT included with the e-book edition of this title) • Complete, up-to-date contact information for more than 1,700 art market resources, including galleries, magazines, book publishers, greeting card companies, ad agencies, syndicates, art fairs, and more • Articles on the

business of freelancing-- from basic copyright information to tips on promoting your work • Information on grants, residencies, organizations, publications, and websites that offer support and direction for visual artists of all types • NEW! Informative articles on setting goals, getting organized, building a resume, and mastering marketing and branding • NEW! Special features on defamation, alternative

art show venues, art rentals, art and wine workshops, and art fairs • NEW! Inspiring and informative interviews with successful professionals including children's book author-illustrator Tomie dePaola, graphic designer Mikey Burton, and fantasy illustrator John Howe Check out ArtistsMarketOnline.com for more interviews, tips for selling your work, and our easy-to-use searchable database of markets!
