"Everyone who's  
involved in financial  
markets must  
understand Point and  
Figure charting in order

to get the full picture,  
whatever your view of  
technical analysis". -  
Jim Rogers, author of  
Hot Commodities and  
Investment Biker "An  
invaluable road map  
for managing risk in  
the markets. Tom's  
methodology has given  
us the discipline and  
confidence to look  
around corners for our  
clients for almost  
twenty years." - James

A. Parish, President and COO, Morgan Keegan & Co., Private Client Group "Tom Dorsey continues to be one of the foremost authorities on Point and Figure charting. His relative strength analyses are essential for investors and traders alike. Furthermore, I always want to know what his NYSE Bullish Percent Indicators is "saying." - Lawrence G. McMillan, President, McMillan Analysis Corp., [www.optionstrategist.com](http://www.optionstrategist.com) "Tom Dorsey has done it again... he has taken his 30-plus years of unending devotion, talents, and insights in technical analysis and applied them to Exchange Traded Funds. He begins with the history of ETFs, explains how different they are from mutual

funds, and then applies his expertise in Point and Figure charting to help traders and investors time their purchases and sales." - Ralph J. Acampora, CMT, Director of Technical research, Knight Capital "Reading Tom Dorsey's Point & Figure Charting is the like procuring a road map before you begin a journey. It's a comprehensive look at how to succeed in the markets. This book is not only essential but easy to follow for everyone." - Paulo Pinto, CEO, Dif Broker "Point and Figure Charting has become a valuable part of my daily trading routine. As an investment professional, it makes perfect sense to use Tom's methods in conjunction with fundamental analysis."

Now more than ever, people are being affected by the fluctuations in the global economy and by financial uncertainty - with major impacts on

their savings, portfolios and pensions. Fully updated for this fourth edition, *How the Stock Market Works* tells investors what is being traded and how, who does what with whom, and how to evaluate a particular share or bond in light of rival claims from critics and admirers. From the practical consequences of being a shareholder to a basic coverage of the taxation regime, the book provides a wealth of information on individual product types as well as the key players themselves.

To make a success trading in stocks every man should learn everything he can about the stock market and the ways to operate in the market

in order to make the greatest success. He should learn to take the smallest risk possible and then try to make the greatest profits possible. The more a man studies and learns the greater success he will have. We quote Proverbs 1: 5- "The wise man will Increase learning." Again, Proverbs 2: 11- "Discretion shall preserve these; understanding shall keep thee. "Proverbs 3: 9- "Give instructions to a wise man and he will become wiser. Teach a just man and he will increase in learning." The "Book of the Lambs" says that the fear of the market is the beginning of knowledge. Many people do not realize that without preparation and knowledge the stock

market is dangerous and that it is easier to make losses than it is to make profits. However, the risks in stock speculation or investment are no greater than in any other line of business if you understand and apply the proper rules to speculative trading, and the profits compared to risks are greater than in any other business.

When I wrote TRUTH  
 OF THE STOCK TAPE in  
 1923, it was because  
 there was a demand  
 for a book of that kind.  
 People needed the help  
 that I could give them  
 and the benefit of my  
 experience and  
 knowledge. In that  
 book I gave the best I  
 had and received my  
 reward. People  
 appreciated my efforts.  
 They bought the book  
 then and they are still  
 buying it. They say it is  
 a good book and more  
 than worth the money.  
 That is very gratifying  
 to me. After the 1929  
 bull market culminated  
 there was a demand  
 for a new book to meet  
 changed conditions  
 under the so-called  
 "New Era," so I wrote  
 WALL STREET STOCK  
 SELECTOR in the spring  
 of 1930. I gave freely  
 of my knowledge and  
 the benefit of years of

experience. This book helped others to protect their principal and make profits. People who read the book pronounced it one of the best. It is still selling, and again I have been rewarded. No man can learn all there is to know about forecasting the trend of stocks in 3, 5, 10, or 20 years, but if he is a deep student and hard worker, he learns more and knowledge comes easier after years of experience. I knew more about determining the trend of stocks in 1923 than I did in 1911. Seven more years of experience gave me more knowledge and enabled me to write the WALL STREET STOCK SELECTOR in 1930 and give my readers the benefit of my increased

knowledge. Now, after five more years have elapsed, my experience and practical test of new rules have enabled me to learn more of value since 1930. The 1929-1932 panic and what has followed since, gave me valuable experience and I have gained more knowledge about detecting the right stocks to buy and sell. I cannot lose if I pass this knowledge on to those who will appreciate it.

**Truth of the Stock Tape** John Wiley & Sons

W. D. Gann's justly famous work on the trading of commodities. "I am writing this book to supply a universal demand: and give rules that will forecast the trend of commodities.

Conditions have changed rapidly during the last few years and will change more rapidly after this great war is over than ever before in history. Men will return to the soil of Mother Nature to make a living. Investors and speculators will have to look for new ways to make money in the future and will find it more difficult in the stock market; therefore, the necessities of life, the basic commodities, will offer greater opportunities than investments in stocks and bonds, providing the trader knows the rules to follow. "My object is to write something that will be helpful to people in trade lines and to those who have long years of experience in the commodity market,

as well as the inexperienced trader who wants knowledge and needs to learn the ways to start right, and to protect his capital and make profits. Life affords no greater pleasure than that of helping others who are trying to help themselves. "I am going to give the best of my forty years of experience in this book, and I hope to show others the way to help themselves and follow mathematical rules in the commodity market, which will result in profits. I do not believe in gambling or reckless speculation, but am firmly convinced, after years of experience, that if traders will follow rules and trade on definite indications, that speculation can be made a profitable

profession. Trading in commodities is not a gambling business, as some people think, but a practical, safe business when conducted on business principles. "I offer this book to the public with a sincere conviction that if they put in the time studying, they will derive great benefits."

Most people buy a stock because they hope it will go up and they will make profits. They buy on tips, or what someone else thinks, without any concrete knowledge of their own that the stock will advance. Thus they entered the market wrong and did not recognize this mistake or attempt to correct it until too late. Finally they sell because they fear the

stock will go lower and often they sell out near low levels, getting out at the wrong time, making two mistakes, getting in the market at the wrong time and getting out at the wrong time. One mistake could have been prevented: they could have gotten out right after getting in wrong. They do not realize that operating in Stocks and Commodities is a business or a profession, the same as engineering or the medical profession.
