MORSE CROSS

Deviat HarperCollins

The Creative Process in the Individual by Thomas Troward is a seminal work that delves into the principles underlying the creative power of the human mind. Published in 1915, this influential book explores the dynamics of thought and the individual's role in the creative process, offering profound insights into the nature of reality and personal growth.

Deviat Bloomsbury Publishing

What is creativity? Without creative powers mankind would still be living in caves, lacking new ideas or advancement, so it is important to understand and harness this power. Thomas Troward was a major pioneer in the New Thought movement, which bridges the gap between the inner world of thoughts and the physical universe.

The Creative Power of Mind The Floating Press

Unlock greater profits. Empower happier and more engaged staff. Foster loyalty and connection with customers. Save your

business... and the world. How? It all starts with a Purpose Upgrade. History shows that hard times can lead to the greatest opportunities for renewal. The Purpose Upgrade will support readers in leading enterprises that thrive by solving our most important problems. It shows how businesses can create more compelling benefits for customers, build meaningful livelihoods for colleagues, and unlock superior returns for investors by 'repurposing' and revitalising the activities they engage in. Meet the social entrepreneur who repurposed the previously 'boring' trade in office supplies to fund micro-finance initiatives that reach millions of the people most exposed to poverty, so that 'even a bad day at the office saves lives'. Learn how the leaders of a coal-mining business repurposed their enterprise first as an industrial chemicals company and then more spectacularly as a sustainable living business, generating unprecedented shareholder returns by aligning their objectives with the United Nations Sustainable Development Goals. They are now changing the lives of smallholder farmers, re-directing the food system to a more sustainable model, and harnessing the power of the world's biggest brands to provide more nutritious food on a healthier planet. And, most importantly, discover a unique methodology

that you can use to make a Purpose Upgrade an always-available event at any level of your own enterprise. There has never been a more urgent need to change our businesses to save the world or a more opportune time to change the world to save our businesses.

The Secret of Our Success Robinson

DevianteWeidenfeld & Nicolson

Hannibal BRILL

How do researchers use dynamic network analysis (DYRA) to explore, model, and try to understand the complex global history of our species? Reduced to bare bones, network analysis is a way of understanding the world around us — a way called relational thinking — that is liberating but challenging. Using this handbook, researchers learn to develop historical and archaeological research questions anchored in DYRA. Undergraduate and graduate students, as well as professional historians and archaeologists can consult on issues that range from hypothesis-driven research to critiquing dominant historical narratives, especially those that have tended to ignore the diversity of the archaeological record.

Devotion Hachette UK

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Mastery Penguin

11 Steps to Unlock your Creative Power is a book that will help you tap into your creativity, identify and release creative blocks, so your artistic and entrepreneurial energies flow abundantly. The handbook is written in an easy language, right to the point and helps you easily tap into your own creative potential - even if you have been blocked for ages and life times! Dr. Gabi Gal helps you unlock your innate creative life force and understand how to boost your projects and life experiences by unlocking your creative power. Get to know more about her work and get in touch www.gabigal.se

Your Creative Power Berghahn Books

The timeless and practical advice in *The Magic of Thinking Big* clearly demonstrates how you can: Sell more Manage better Lead fearlessly Earn more Enjoy a happier, more fulfilling life With applicable and easy-to-implement insights, you'll discover: Why believing you can succeed is essential How to quit making excuses The means to overcoming fear and finding confidence How to develop and use creative thinking and dreaming Why making (and getting) the most of your attitudes is critical How to think right towards others The best ways to make "action" a habit How to find victory in defeat Goals for growth, and How to think like a leader "Believe Big," says Schwartz. "The size of your success is determined by the size of your belief. Think little goals and expect little achievements. Think big goals and win big success. Remember this, too! Big ideas and big plans are often easier -- certainly no more difficult - than small ideas and small plans."

Modeling the Past John Hunt Publishing

Our times are not just weird, but literally surreal: we live in a paranoid, increasingly authoritarian culture in which the real, the presumed and the purported are indistinguishable strands of a dense hallucinatory web of mediated spectacles. Surrealpolitik takes up cultural theorist Mark Fisher's challenge to expose capitalist realism's 'realism' as nothing of the sort. To subject the symbolic order to a surrealist mode of inquiry is to transgress taboos, reveal biases and inconsistencies, test assumptions and investigate the extent to which the real is, like our dreams - a fungible projection of our unconscious expectations. The nexus of dreams, hyperreality, paranoia, totalitarianism, terror, art, myth

and culture is where realpolitik becomes the surrealpolitik of the title.

The Runaway Species BEYOND BOOKS HUB

In an educational system founded on rigid standards and categories, students who demonstrate a very specific manifestation of intelligence flourish, while those who deviate tend to fall between the cracks. Too often, talents and interests that do not align with classroom conventions are left unrecognized and unexplored in children with extraordinary potential but little opportunity. For twice-exceptional (2e) children, who have extraordinary strengths coupled with learning difficulties, the problem is compounded by the paradoxical nature of their intellect and an unbending system, ill-equipped to cater to their unique learning needs. *Twice Exceptional: Supporting and Educating Bright and Creative Students with Learning Difficulties* provides cutting-edge, evidence-based approaches to creating an environment where twice-exceptional students can thrive. Viewing the 2e student as neither exclusively disabled nor exclusively gifted, but, rather, as a dynamic interaction of both, leading experts offer holistic insight into identification, social-emotional development, advocacy, and support for 2e students. With chapters focusing on special populations (including autism, dyslexia, and ADHD) as well as the intersection of race and 2e, this book highlights practical recommendations for school and social contexts. In expounding the unique challenges faced by the 2e population, *Twice Exceptional* makes a case for greater flexibility in our approach to education and a wider notion of what it means to be academically successful.

The Reformation resuscitated Crown Currency

Creativity is the most underdeveloped natural skill that lies within every human being. Developing it starts with laziness. No-one is ever truly lazy anymore. When we are presented with a state of boredom, the large majority of us pull out our phones or turn to some other form of media to pass the time. What this has created, are recent generations full of untapped creative potential just waiting to be unearthed through spending our free time doing the optimal lazy things. *The Middle Way: How To Strategically Use Laziness To Enhance your Creative Power* offers a unique perspective on the development of creativity, success, and fulfillment in one's life. In an era where efficiency, speed, and time is severely overvalued, *The Middle Way* teaches you why this type of thinking can be detrimental to your mental and physical health (and above all, detrimental to the pursuit of enhancing your creative skills). Content Creator, Videographer and Entrepreneur Cole Hastings argues that in order to live the most gratifying and stress-free creative life, the way you view the meaning of life, yourself, and the entire universe must first be altered. When this has been developed thoroughly, you can then adopt the "lazy" strategies that the most successful creatives use to shine and prosper within their areas of expertise. This book explores both the mindset shift required and the tools and tactics needed to make a living off of your creative gift. In this book, you will learn: - Why genuine free time is the most underutilized aspect of modern society - How every successful creative person thinks and acts (and how to do this in your own authentic way) - Why "giving it your all" is actually terrible advice - How to find out what you're meant to do on this planet - How to use the most popular social media platforms to your creative advantage - A culmination of philosophies that induce creativity, calmness, and curiosity within you and much more...

#1 NEW YORK TIMES BESTSELLER • "Is it as good as *Red Dragon* and *Silence of the Lambs*? No . . . this one is better."—Stephen

King, *The New York Times Book Review* You remember Hannibal Lecter: gentleman, genius, cannibal. Seven years have passed since Dr. Lecter escaped from custody. And for seven years he's been at large, free to savor the scents, the essences, of an unguarded world. But intruders have entered Dr. Lecter's world, piercing his new identity, sensing the evil that surrounds him. For the multimillionaire Hannibal left maimed, for a corrupt Italian policeman, and for FBI agent Clarice Starling, who once stood before Lecter and who has never been the same, the final hunt for Hannibal Lecter has begun. All of them, in their separate ways, want to find Dr. Lecter. And all three will get their wish. But only one will live long enough to savor the reward. . . . Praise for Hannibal "Interested in getting the hell scared out of you? Buy this book on a Friday . . . lock all doors and windows. And by Monday , you might just be able to sleep without a night-light."—*Newsday* "Strap yourself in for one heck of a ride. . . . It'll scare your socks off."—*Denver Post* "A stunner . . . writing in language as bright and precise as a surgeon's scalpel, Harris has created a world as mysterious as Hannibal's memory palace and as disturbing as a Goya painting. This is one book you don't want to read alone at night."—*The Atlanta Journal-Constitution* "Relentless . . . endlessly terrifying . . . 486 fast-paced pages, in which every respite is but a prelude to further furious action . . . Hannibal begins with a murderous paroxysm that leaves the reader breathless. . . . Hannibal speaks to the imagination, to the feelings, to the passions, to exalted senses and to debased ones. Harris's voice will be heard for a while."—*Los Angeles Times* "A pleasurable sense of dread."—*The Wall Street Journal* "Enormously satisfying . . . a smashing good time, turning the pages for thrills, chills, horror and finally, a bracing, deliciously wicked slap in the face . . . perhaps the very best the thriller/horror genre is capable of producing."—*San Diego Union-Tribune*

Twice Exceptional Oxford University Press

Why can some organizations innovate time and again, while most cannot? You might think the key to innovation is attracting exceptional creative talent. Or making the right investments. Or breaking down organizational silos. All of these things may help—but there's only one way to ensure sustained innovation: you need to lead it—and with a special kind of leadership. *Collective Genius* shows you how. Preeminent leadership scholar Linda Hill, along with former Pixar tech wizard Greg Brandeau, MIT researcher Emily Truelove, and *Being the Boss* coauthor Kent Lineback, found among leaders a widely shared, and mistaken, assumption: that a "good" leader in all other respects would also be an effective leader of innovation. The truth is, leading innovation takes a distinctive kind of leadership, one that unleashes and harnesses the "collective genius" of the people in the organization. Using vivid stories of individual leaders at companies like Volkswagen, Google, eBay, and Pfizer, as well as nonprofits and international government agencies, the authors show how successful leaders of innovation don't create a vision and try to make innovation happen themselves. Rather, they create and sustain a culture where innovation is allowed to happen again and again—an environment where people are both willing and able to do the hard work that innovative problem solving requires. *Collective Genius* will not only inspire you; it will give you the concrete, practical guidance you need to build innovation into the fabric of your business.

Where Good Ideas Come From John Wiley & Sons

Award-winning author Tanita S. Davis delivers a heartwarming and humorous middle grade tale about a young Black girl who finds her own voice through vlogging and learns to speak out. Perfect for fans for Sharon M. Draper and Lisa Greenwald. JC shines like a 4th of July sparkler. She has the best ideas, the

biggest, funniest laugh, and the party starts when she arrives. Serena St. John is proud to be known as her best friend. Everything changes when JC returns from the hospital with a new kidney—and a new best friend. Out of the spotlight of JC's friendship, suddenly things aren't quite so sparkly in Serena's world. Lonely Serena works on perfecting her vlogs, hoping to earn a shot at becoming a classroom reporter. If she can be smart and funny on video, why can't she manage that in real life? If only she could always pause, edit, or delete conversations. It would be so much easier to say the right thing at the right time . . . instead of not saying what she should, or, even worse, blurting out a secret that wasn't hers to share. Life doesn't have a pause button—but as Serena discovers her voice through vlogging, she learns that she's not just there to reflect JC's light—she's fully capable of shining on her own.

Collective Genius Penguin

Beau Lotto, the world-renowned neuroscientist, entrepreneur, and two-time TED speaker, takes us on a tour of how we perceive the world, and how disrupting it leads us to create and innovate. Perception is the foundation of human experience, but few of us understand why we see what we do, much less how. By revealing the startling truths about the brain and its perceptions, Beau Lotto shows that the next big innovation is not a new technology: it is a new way of seeing. In his first major book, Lotto draws on over two decades of pioneering research to explain that our brain didn't evolve to see the world accurately. It can't! Visually stunning, with entertaining illustrations and optical illusions throughout, and with clear and comprehensive explanations of the science behind how our perceptions operate, *DeviatE* will revolutionize the way you see yourself, others and the world. With this new understanding of how the brain functions, *DeviatE* is not just an illuminating account of the neuroscience of thought, behavior, and creativity: it is a call to action, enlisting readers in their own journey of self-discovery.

The Serendipity Mindset Book Tree

This enlightening examination of creativity looks "at art and science together to examine how innovations . . . build on what already exists and rely on three brain operations: bending, breaking and blending" (*The Wall Street Journal*) *The Runaway Species* is a deep dive into the creative mind, a celebration of the human spirit, and a vision of how we can improve our future by understanding and embracing our ability to innovate. David Eagleman and Anthony Brandt seek to answer the question: what lies at the heart of humanity's ability—and drive—to create? Our ability to remake our world is unique among all living things. But where does our creativity come from, how does it work, and how can we harness it to improve our lives, schools, businesses, and institutions? Eagleman and Brandt examine hundreds of examples of human creativity through dramatic storytelling and stunning images in this beautiful, full-color volume. By drawing out what creative acts have in common and viewing them through the lens of cutting-edge neuroscience, they uncover the essential elements of this critical human ability, and encourage a more creative future for all of us. "The *Runaway Species* approach[es] creativity scientifically but sensitively, feeling its roots without pulling them out." —*The Economist*

Dare to be Creative! Penguin

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has

enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.

The Unholy Consult Edward Elgar Publishing

This volume investigates the implications of breaking ritual rules, of failed performances and of the extinction of ritual systems. The essays thus break new ground in the comparative analysis of rituals and introduce new perspectives to ritual studies.

Handbook of Transdisciplinarity: Global Perspectives Yale University Press

World-renowned neuroscientist Beau Lotto reveals the truths of human perception and devises a cognitive toolkit for how to succeed in a world of uncertainty. Perception is the foundation of human experience, but few of us understand how our own perception works. By revealing the startling truths about the brain and perception, Beau Lotto shows that the next big innovation is not a new technology: it is a new way of seeing. In his first major book, Beau Lotto draws on over a decade of

pioneering research to show how our brains play tricks on us. With an innovative combination of case studies and optical- and perception-illusion exercises, *DEVIATE* will revolutionise the way you see the world. With this new understanding of how the brain works and its perceptive trickery, we can apply these insights to every aspect of life and work. *DEVIATE* is not just an engaging look into the neuroscience of thought, behaviour and creativity: it is a call to action, enlisting readers in their own journey of self-discovery.

The Creative Power Hypothesis Gabi Gal

Creativity is critical. *Out of Our Minds* explores creativity: its value in business, its ubiquity in children, its perceived absence in many adults and the phenomenon through which it disappears — and offers a groundbreaking approach for getting it back.

Author Sir Ken Robinson is an internationally recognised authority on creativity, and his TED talk on the subject is the most watched video in TED's history. In this book, Sir Ken argues that organisations everywhere are struggling to fix a problem that originates in schools and universities. Organisations everywhere are competing in a world that changes in the blink of an eye — they need people who are flexible enough to adapt, and creative enough to find novel solutions to problems old and new. *Out of Our Minds* describes how schools, businesses and communities can work together to bring creativity out of the closet and realise its inherent value at every stage of life. This new third edition has been updated to reflect changing technologies and demographics, with updated case studies and coverage of recent changes to education. While education and training are the keys to the future, the key can also be turned the other way; locking people away from their own creativity. Only by actively fostering creativity can businesses unlock those doors and achieve their true potential. This book will help you to: Understand the importance of actively promoting creativity and innovation. Discover why creativity stagnates somewhere between childhood and adulthood. Learn how to re-awaken dormant creativity to help your business achieve more. Explore ways in which we can work together to keep creativity alive for everyone. Modern business absolutely demands creativity of thought and action. We're all creative as children — so where does it go? When do we lose it? *Out of Our Minds* has the answers, and clear solutions for getting it back.
