A mechanical wave is created when a source of causes a to

travel through a _____.

Chapter 17: Mechanical Waves and Sound

Chapter 17 Mechanical Waves and Sound. 17.3 Behavior of Waves; 47 Reflection. Reflection occurs when a wave bounces off a surface that it cannot pass through. Reflection does not change the speed or frequency of a wave, but the wave can be flipped upside down. 48 Refraction. Refraction is the bending of a wave as it enters a new medium at an angle.

Physical Science- Chapter 17 Mechanical Waves and Sound ...

Chapter 17: Mechanical Waves and Sound. the response of a standing wave to another wave of the same frequency, with dramatic increase in amplitude of the standing wave. This activity was created by a Quia Web subscriber.

Quia - Chapter 17: Mechanical Waves and Sound

ICP wordwise for chapter 17. STUDY. PLAY. amplitude. maximum displacement of a wave. transverse. type of mechanical wave whose direction of vibration is perpendicular to its direction of travel. period. the time required for one complete wave cycle.

Chapter 17 Wordwise Flashcards | Quizlet

502 Chapter 17 Observing Waves in a Medium

Objective After completing this activity, students will be able to

- describe a mechanical wave as a passage of energy through medium, with no net movement of the medium.

This lab can dispel the misconception that waves are parts of the medium that travel with the wave.

Skills Focus Inferring
