The author sifts through evidence that depicts Austen not as a modest, retiring daughter, but rather as a rebellious, satirical, and wild woman. -- Back cover.

Trafalgar's Lost Hero John Wiley & Sons

"This surprising treat for lovers of naval history and real-life adventure traces Collingwood's exploits from his harsh coming of age at sea through his storied service in the American Revolution to the long and bitter struggle with Napoleon. Collingwood emerges as a wily and daring commander who was at his steely-eyed best when outgunned by the enemy. His coolness under fire is revealed in lively accounts of his rescuing Nelson from destruction and the entrapment of a 26-ship enemy fleet with a tiny, four-vessel squadron. At Trafalgar, he was seen calmly munching an apple as he led his squadron, guns blazing, into furious battle. It was Collingwood, himself devastated by the loss, who delivered the news of Nelson's death to a nation stunned by the tragic price of victory."

The Englishman's Magazine Bloomsbury Publishing

Admiral Lord Collingwood, the eldest son of a Newcastle merchant, went to sea in 1761 at the age of thirteen. In his nearly fifty years in the Navy he rose to become a fine seaman, a master of gunnery, a battle commander the equal of his friend – and rival in love – Nelson. He was also an

accomplished writer and wit, a doting father, inveterate gossip and consummate diplomat and strategist. Collingwood's service took him to Boston, where he lived and fought during the American War of Independence; to Antigua, where he and Nelson both fell in love with Mary Moutray; to Corsica; Sicily; and Menorca, where he began as a young midshipman and ended his career as the effective viceroy of the Mediterranean. ADMIRAL COLLINGWOOD is an intimate portrait of a forgotten British naval hero and a thrilling portrait of the glory years of the age of sail.

The definitive biography of the British naval officer who found the Antarctic shoreline in the early nineteenth century. Captain Cook claimed the honor of being the first man to sail into the Antarctic Ocean in 1773, which he circumnavigated the following year. Cook, though, did not see any land, and declared that there was no such thing as the Southern Continent. Fifty years later, an Irishman who'd been impressed into the Royal Navy at eighteen, and risen through the ranks to

the position of master, proved Cook wrong, discovering and charting parts of the Antarctic shoreline. He also discovered Elephant Island and Clarence Island, claiming them for the British Crown. Edward Bransfield's naval career included taking part in the Bombardment of Algiers in 1816 onboard the 50-gun warship HMS Severn. Then, in 1817, he was posted to the Royal Navy's Pacific Squadron off Valparaíso in Chile, and it was while he served there that the skipper of an English whaling ship, the Williams, was driven south by adverse winds and discovered what came to be known as the South Shetland Islands where Cook had said there was no land. Bransfield's superior officer, Captain Sherriff, decided to investigate further. He chartered Williams and sent Bransfield with two midshipmen and a ship's surgeon into the Antarctic—and the Irishman sailed into history. Despite many parts of Antarctica and an Antarctic survey vessel being named after him, and a Royal Mail commemorative stamp issued in his name, the full story of this remarkable man and his historic journey, have never been told—until now. Following decades of

research, Sheila Bransfield MA, a member of the UK Antarctic Heritage Trust, has produced the definitive biography of one of Britain's greatest maritime explorers. The book also includes a foreword by the Trust's patron the Princess Royal. "Bransfield's meticulous research gives us a detailed account of the daily routines of the Navy and the immense amount of maintenance required of a large wooden warship in the Age of Sail." —Historical Novel Society
