This paper contains the designs of high opening bottom trawls which could be suitable for 50-180 hp small-scale fishing trawlers operating in coastal waters and large lakes. All necessary information for the construction of these trawls as well as for the preparation and adjustment of their rigging is supplied. This information is especially intended for small-scale fisheries skippers, and skipper-owners, as well as fishing net makers. Fishery officers, technicians, instructors, extension workers, especially in developing countries, are also likely to be interested.

The Construction Manuals from Edition Detail are among the most important reference works in the specialist literature. The latest volume shows the potential of the material concrete and documents

comprehensively the technical principles of using concrete in construction. Chapters cover the history of the material, the properties of concrete, reinforced concrete, and prestressed concrete, the treatment of its surface. Also covered are the basic principles of statics for large and small structures, and the building requirements with respect to heat, damp, sound-proofing and fire protection according to the most recent norms and standards. Finally a large number of built examples are presented from illustrations of the complete structure down to detailed plans, showing the broad spectrum of applications for concrete in contemporary building. All plans have been specially produced by the editorial department Detail for this book and for ease of comparison, they have been drawn to the same scale.

**Chilton's Chrysler Dodge/Plymouth Repair Manual 1988-1992** Walter de Gruyter

The author, William H. Dooley, the Principal of the Lowell Industrial School, was asked in 1908 by the Lynn Commission on Industrial Education to make an investigation of European shoe schools and to assist the Commission in preparing a course of study for the proposed shoe school in the American city of Lynn. A close investigation showed that there were several textbooks on shoemaking published in Europe, but that no general textbook on shoemaking had been issued in this country adapted to meet the needs of industrial, trade, and commercial schools or those who have just entered the rubber, shoe, and leather trades. This book was thus written to serve this need.
