Education under attack - 2010 Asian Development Bank

Growing up in the new South Africa is based on rich ethnographic research in one area of Cape Town, together with an analysis of quantitative data for the city as a whole. The authors, all based at the time in the Centre for Social Science Research at the University of Cape Town, draw on varied disciplinary backgrounds to reveal a world in which young people's lives are shaped by an often adverse environment and the agency that they themselves exercise. This book should be read by anyone, whether inside or outside of the university, interested in the well-being of young South Africans and the social realities of post-apartheid South Africa.

Climate-Smart Landscapes:

Multifunctionality in Practice Routledge

This open access book brings together discourse on children and peace from the 15th International Symposium on the Contributions of Psychology to Peace, covering issues pertinent to children and peace and approaches to making their world safer, fairer and more sustainable. The book is divided into nine sections that examine traditional themes (social construction and deconstruction of diversity, intergenerational transitions and memories of war, and multiculturalism), as well as contemporary issues such as Europe's

"migration crisis", radicalization and violent extremism, and violence in families, schools and communities. Chapters contextualize each issue within specific social ecological frameworks in order to reflect on the multiplicity of influences that affect different outcomes and to discuss how the findings can be applied in different contexts. The volume also provides solutions and hope through its focus on youth empowerment and peacebuilding programs for children and families. This forward-thinking volume offers a multitude of views, approaches, and strategies for research and activism drawn from peace psychology scholars and United Nations researchers and practitioners. This book's multi-layered emphasis on context, structural determinants of peace and conflict, and use of research for action towards social cohesion for children and youth has not been brought together in other peace psychology literature to the same extent. *Children and Peace: From Research to Action* will be a useful resource for peace psychology academics and students, as well as social and developmental psychology academics and students, peace and development practitioners and activists, policy makers who need to make decisions about the matters covered in the book, child rights advocates and members of multilateral organizations such as the UN.

What Do Science, Technology, and Innovation Mean from Africa?

Springer

Working conditions play an important role in a school's ability to attract, develop, and retain effective teachers. Data presented here describe a number of aspects of teachers' working

conditions, including workload, compensation, school and district support for teachers' professional development, school decision making, school safety, student readiness to learn, and public respect for teachers. Results of the study revealed: (1) teachers put in more than a 40-hour week, on average, counting time spent outside of school; (2) average salaries tend to be lower than those of many other professionals, but, adjusting for inflation, teachers' salaries increased substantially during the 1980s; (3) professional development is supported by most schools and districts; (4) more than four out of five teachers reported that they had substantial control over what they taught and the texts and materials they used, and over disciplining students; and (5) public school teachers are increasingly worried about school safety at both the elementary and secondary levels. As a group, public school teachers appear to face more difficult working conditions than private school teachers, such as larger classes and less perceived influence over important school policies. However, public school teachers earn substantially more than private school teachers on average. Conditions for public school teachers also vary depending on the school's size and location, and the percentage of low income students in the school. (Contains 24 references.) (ND)

Rurality, Social Justice and Education in Sub-Saharan Africa Volume I Springer

Contemporary Issues in Learning and Teaching looks at current issues across the three key areas of policy, learning and practice. It will help you to think critically on your Education course, and to make connections between the processes of learning and the

practicalities of teaching. The book addresses key issues in primary, secondary and special education, and includes examples from all four countries of the UK. The contributors reflect on current thinking and policy surrounding learning and teaching, and what it means to be a teacher today. Looking at the practice of teaching in a wider context allows you to explore some of the issues you will face, and the evolving expectations of your role in a policy-led environment. The book focuses on core areas of debate including: - education across different contexts and settings - teaching in an inclusive environment - Continuing Professional Development (CPD) for practitioners Each chapter follows the same accessible format. They contain case studies and vignettes providing examples and scenarios for discussion; introduction and summary boxes listing key issues and concepts explored in the chapter; key questions for discussion reflection; and further reading. This essential text will be ideal for undergraduate and postgraduate courses, including BEd/BA degrees, initial teacher-training courses, and Masters in Education programmes. All editors and contributors are based in the Faculty of Education at Glasgow University, UK.

Shadow Education Routledge

Climate-Smart Landscapes: Multifunctionality in Practice is about a 'landscape approach' to achieving multiple climate, social, development and environmental objectives. It builds on climate-smart landscapes as a growing platform and pathway towards achieving multi functionality. This book in 27 chapters draws strongly from practices, methods, examples and considerations for applying landscape approaches to achieve multifunctional

outcomes and in particular, address the complex challenge of climate change.

Introducing Economics M.E. Sharpe

In all parts of Asia, households devote considerable expenditures to private supplementary tutoring. This tutoring may contribute to students' achievement, but it also maintains and exacerbates social inequalities, diverts resources from other uses, and can contribute to inefficiencies in education systems. Such tutoring is widely called shadow education, because it mimics school systems. As the curriculum in the school system changes, so does the shadow. This study documents the scale and nature of shadow education in different parts of the region. Shadow education has been a major phenomenon in East Asia and it has far-reaching economic and social implications.

Building a Resilient and Sustainable Agriculture in Sub-Saharan Africa

UNESCO Publishing

Cash transfers have become a key social protection tool in developing countries and have expanded dramatically in the last two decades. However, the impacts of cash transfers programmes, especially in Sub-Saharan Africa, have not been substantially documented. This book presents a detailed overview of the impact evaluations of these programmes, carried out by the Transfer Project and FAO's From Protection to Production project. The 14 chapters include a review of eight country case studies: Kenya, Ghana, Ethiopia, Zambia, Zimbabwe, Lesotho, Malawi, South Africa, as well as a description of the innovative research methodologies, political economy issues and good practices to design cash transfer

programmes. The key objective of the book is to enhance the understanding of these development programmes, how they lead to a broad range of social and productive impacts and also of the role of programme evaluation in the process of developing policies and implementing programmes.

First published in 2012. Routledge is an imprint of Taylor & Francis, an informa company.

The Fundamentals of Teaching Practice SAGE

What is transformation in contemporary South African higher education? How can it be facilitated through research and pedagogic practices? These questions are addressed in this edited collection by established academics and emerging research students from nine South African universities. The chapters give us access to students' worlds; how they construct, experience and navigate their complex spheres, on and off campus.

Official Telephone Directory New York : Academic Press

This book helps language teachers become more aware of their teaching beliefs, attitudes, and practices. The hardback edition helps teachers explore their teaching beliefs, attitudes, and practices. It provides teachers with the kind of knowledge and guidelines that can empower them to make more informed teaching decisions. As such, teacher educators will find this a practical book to use in training courses.

Growing Up in the New South Africa

Springer Science & Business Media

The Cancer in Sub-Saharan Africa volume brings together population-based cancer incidence data from 25 cancer registries in 20 sub-Saharan African countries that are part of the African Cancer Registry Network. The

compiled data in this volume, presented and commented upon by covered population and by anatomical site, are of tremendous value to the assessment of the pattern and evolution of cancer in Africa, as a means of elucidating, confirming, and evaluating causes of the disease.

Governing Africa's Forests in a Globalized World ASB Partnership for The Tropical Forest margins

This concise, applied, and very clearly written introduction to qualitative research methods can be used effectively in a semester, or year-long course. This introductory-level text provides the reader with a background for understanding the uses of qualitative research in education (and other professions) examining its theoretical and historical underpinnings, and providing the "how-to's" of doing qualitative research. This new edition places qualitative research within current debates about research methods and alternative ways of knowing. While the authors approach the subject from a sociological perspective, they also take care to reflect the many changes in conceptualization of qualitative research brought by post-structural and feminist thought. New to This Edition: - Rewritten Chapter 5, "Data Analysis, " places more emphasis on the interpretive aspect of research and research writing. - Expanded coverage of action or practitioner research (Chapter 7) highlights a topic that is of immediate use. - Added emphasis on technology and qualitative analysis software in qualitative research helps students to use and incorporate technology efficiently. Links to useful research websites have also been integrated throughout. - Expanded coverage of such topics as formal research designs,

work with different cultures, critical race theory, and the debate over quantitative vs. qualitative research. - New end-of-chapter summaries, questions, and field assignments have been added to make this text easy to use with students. - A new Instructor's Manual/Test Bank is available online to adopters by contacting your local representative. *The Conditions of Learning* Zed Books Ltd.

Make economics resonate to high school students. This practical handbook will help economics and social studies teachers foster critical thinking by introducing students to the real-life dimensions of the major controversies in contemporary economics. Filled with useful teaching tips and user-friendly information on finding engaging materials and activities for the classroom, the book also includes detailed coverage of the Voluntary National Content Standards for economics. "Introducing Economics" is a one-stop resource for high school teachers who want to make economics relevant to their students' lives. It includes more than 50 sections with lists of suggested "Activities and Resources," many with Internet links. It features boxed "Hints for Clear Teaching" tips for presenting particularly difficult topics. It provides an annotated resource guide to more than 30 organizations involved in economics education, with associated Internet links. It follows the flow of topics in a typical economics course. It addresses real-life topics that are ignored or glossed-over in traditional textbooks - economics and the environment, the distribution of income and wealth, discrimination, labor unions, globalization, the power of corporations, and more. It offers critical guidance for meeting all 20 Voluntary National

Content Standards in economics, and also provides an overview of the political and intellectual history and contemporary state of economics education.

From Exclusion to Inclusion Springer Nature

This book explores rurality and education in sub-Saharan Africa through a lens of social justice. The first in a two-volume project, this book explores the possibilities and constraints of rural social justice in diverse educational contexts: how should rurality be defined? How does education shape and reshape what it means to be rural? Drawing chapters from a diverse range of contributors in sub-Saharan Africa, the two volumes are underpinned by a robust social justice approach to rural schooling and its intersections with access, gender, colonialism, social mobility and dis/ability. Ultimately, these volumes reflect the need to shift conceptions of rurality from colonial and conservative stereotypes to an appreciation of rurality as locations in space and time, with their own unique attributes and opportunities. Harnessing indigenous African concepts of justice to open up conversations into teaching and knowledge production in higher education, this book will be of interest to scholars of rurality and education, as well as wider discussions on decolonising the academy.

Handbook of Vocational Education and Training Food & Agriculture Org.

This book is an intellectual journey into epistemology, pedagogy, physics, architecture, medicine and metallurgy. The focus is on various dimensions of African Indigenous Knowledge (AIK) with an emphasis on the sciences, an area that has been neglected in AIK discourse. The authors provide diverse

views and perspectives on African indigenous scientific and technological knowledge that can benefit a wide spectrum of academics, scholars, students, development agents, and policy makers, in both governmental and non-governmental organizations, and enable critical and alternative analyses and possibilities for understanding science and technology in an African historical and contemporary context.

Education Management in Early Childhood Development UNESCO Publishing

This handbook brings together and promotes research on the area of vocational education and training (VET). It analyzes current and future economic and labor market trends and relates these to likely implications for vocational education and training. It questions how VET engages with the growing power of human development approaches and with the sustainable development agenda. Equity and inclusion are discussed in a range of ways by the authors and the consideration of the construction of these terms is an important element of the handbook. It further addresses both the overall notion of system reform, at different scales, and what is known about particular technologies of systems reform across a variety of settings. Vocational learning and VET teacher/trainer education are discussed from a comparative perspective. National and comparative experiences are also shared on questions of equity and efficiency in funding in terms of those that fund and are funded, and for a range of funding methodologies. As well as reviewing existing gaps, this handbook is looking forward in identifying promising new directions in research and environment. Areas covered: The Changing World of

Work | Editors: Margarita Pavlova and Salim Akoojee Skills for Sustainable Human Development | Editor: Lesley Powell Planning and Reforming Skills Systems | Editor: Robert Palmer Private Training Markets | Editors: Michael Gessler, Larissa Freund and Susanne Peters Vocational Learning | Editors: Karen Evans and Natasha Kersh Competence and Excellence | Editor: Kirby Barrick Measuring Learning and Instructional Performance | Editor: Esther Winther Supporting Learners | Editor: Joy Papier VET Teacher/Trainer Education | Editor: Volker Wedekind

African Indigenous Knowledge and the Sciences IARC Scientific Publications

Many countries around the world are engaged in decentralization processes, and most African countries face serious problems with forest governance, from benefits sharing to illegality and sustainable forest management. This book summarizes experiences to date on the extent and nature of decentralization and its outcomes, most of which suggest an underperformance of governance reforms, and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests. Findings are grouped into two thematic areas: decentralization, livelihoods and sustainable forest management; and international trade, finance and forest sector governance reforms. The authors examine diverse forces shaping the forest sector, including the theory and practice of decentralization, usurpation of authority,

corruption and illegality, inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits, and discuss related outcomes on livelihoods, forest condition and equity. The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions, and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns. Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice.

Internationalisation of African Higher Education Allyn & Bacon

In line with current trends in Zimbabwe's teaching profession, the thrust of this book is to support student teachers, newly qualified and even experienced teachers in their classroom discourses.

Transforming Transformation in Research and Teaching at South African Universities MIT Press

A book for anyone who recognizes that teachers, their teaching practice, knowledge and skill should be a focal point of research efforts. The contributions to this volume are internationally authored by leading academics. A range of innovative research methodologies are represented and explained. The book articulates the special professional skills and knowledge that teachers have and need. It will inspire teachers and researchers alike in understanding the art of teaching.
