This comprehensive inventory of all known sarcophagi from the Jewish catacombs of Rome, is the first specialized treatment of this subject in monograph form. It describes and analyses each sarcophagus and provides full reference material which it critically

examines. This work thus fills a lacuna in the literature on this field, which has up to now been confined to the treatment of early Christian and pagan sarcophagi of the period. ♦ We have here a complete overview of the Jewish sarcophagi of ancient Rome, all of them illustrated by photographs and provided with extensive bibliographies. This work thus fills a lacuna in the literature on this field. ♦ *Journal for the Study of Judaism* ♦ Until this book, however, no one has attempted to assemble all of the Jewish

sarcophagi separately in one place and to provide relevant information in the form of a well-ordered catalogue. For this reason, Konikoff's book provides a welcome resource for anyone interested in the material evidence of ancient Judaism and forms a good beginning for study of the sarcophagi, especially from a bibliographic point of view. ♦ Gnomon . Lacan - The Unconscious Reinvented University of Michigan Press

A pioneer of humanitarianism and founder of the International Red Cross, Henry Dunant was many things over his

lifetime. A devout Christian and social activist, an ambitious but failed businessman, a humanitarian genius, and a bankrupt recluse. In this biography, Corinne Chaponnière reveals the tumultuous trajectory of Henry's life. From his idyllic childhood in Geneva, she follows Henry through the horrors of the Battle of Solferino, his creation of the Red Cross and role in the Geneva Conventions, the disgrace of his bankruptcy and his resurrection as a Nobel Peace Prize winner. It shows how this champion of wounded soldiers and prisoners of war was not an unblemished picture of piety and goodness, but that his empathy and good works played out in tandem with his social ambition and personal drive. It shows how even the best of us fall on hard times, and that

the Red Cross was born out of humanitarian ideals coupled with a desire for personal success. This book reveals the story of Henry Dunant, blemishes and all, against the backdrop of the horrors of war, the weight of religion and the birth of humanitarianism in the 19th century.

In the aftermath of the Iranian revolution, rare-gem dealer Isaac Amin is arrested, wrongly accused of being a spy. Terrified by his disappearance, his family must reconcile a new world of cruelty and chaos with the collapse of everything they have known. As Isaac navigates the tedium and terrors of prison, forging tenuous trusts, his wife feverishly searches for him, suspecting, all the while, that their once-trusted housekeeper has turned on them and is now acting as an informer. And as his daughter, in a childlike attempt to stop

the wave of baseless arrests, engages in illicit activities, his son, sent to New York before the rise of the Ayatollahs, struggles to find happiness even as he realizes that his family may soon be forced to embark on a journey of incalculable danger. A page-turning literary debut, *The Septembers of Shiraz* simmers with questions of identity, alienation, and love, not simply for a spouse or a child, but for all the intangible sights and smells of the place we call home.

This book is a novel attempt to understand humanism as a socially meaningful cultural idiom in Late Renaissance East Central Europe. Through an exploration of geographical regions that are relatively little known to

an English reading public, it argues that late sixteenth-century East Central Europe was culturally thriving and intellectually open in the period between Copernicus and Galileo. Humanism was a dominant cluster of shared intellectual practices and cultural values that brought a number of concrete benefits both to the social-climber intellectual and to the social elite. Two exemplary case studies illustrate this thesis in substantive detail, and highlight the ambivalences and difficulties court humanists routinely faced. The protagonists Johannes Sambucus and Andreas Dudith, both born in the Kingdom of Hungary, were two of the major humanists of the Habsburg court, central figures in cosmopolitan networks of men learning and characteristic

representatives of an Erasmian spirit that was struggling for survival in the face of confessionalisation. Through an analysis of their careers at court and a presentation of their self-fashioning as savants and courtiers, the book explores the social and political significance of their humanist learning and intellectual strategies.

History of Hermeneutics BoD - Books on Demand

The Book of Samuel is universally acknowledged as one of the supreme achievements of biblical literature. Yet the book's anonymous author was more than an inspired storyteller. The author was also an uncannily astute observer of political life and the moral compromises and contradictions that the struggle for power inevitably entails. The Beginning

of Politics mines the story of Israel's first two kings to unearth a natural history of power, providing a forceful new reading of what is arguably the first and greatest work of Western political thought. Moshe Halbertal and Stephen Holmes show how the beautifully crafted narratives of Saul and David cut to the core of politics, exploring themes that resonate wherever political power is at stake. Through stories such as Saul's madness, David's murder of Uriah, the rape of Tamar, and the rebellion of Absalom, the book's author deepens our understanding not only of the necessity of sovereign rule but also of its costs--to the people it is intended to protect and to those who wield it. What emerges from the meticulous analysis of these narratives includes such themes as the

corrosive grip of power on those who hold and compete for power; the ways in which political violence unleashed by the sovereign on his own subjects is rooted in the paranoia of the isolated ruler and the deniability fostered by hierarchical action through proxies; and the intensity with which the tragic conflict between political loyalty and family loyalty explodes when the ruler's bloodline is made into the guarantor of the all-important continuity of sovereign power.--

The textual monuments of Greco-Roman antiquity, as is well known, were a staple of Europe's educated classes since the Renaissance. That the Reformation ushered in a new understanding of human fate and history is equally a commonplace of modern scholarship. The present study probes attitudes towards Greek antiquity by of a group of Lutheran humanists. Concentrating on

Philipp Melanchthon, several of his colleagues and students, and a broader Melanchthonian milieu, a Lutheran understanding of Pagan and Christian Greek antiquity is traced in its sixteenth century context, positing it within the framework of Protestant universal history, pedagogical concerns, and the newly made acquaintance with Byzantine texts and post-Byzantine Greeks - demonstrating the need to historicize Antiquity itself in Renaissance studies and beyond.

In the following three chapters, Ferraris examines the universalization of the domain of interpretation with Heidegger, the development of Heideggerian philosophical hermeneutics with Gadamer and Derrida, and the relation

between hermeneutics and epistemology, on the one hand, and the human sciences, on the other.

Lutheran Humanists and Greek Antiquity
BRILL

Traditionally, the history of Ancient Greek literature ends with Antiquity: after the fall of Rome, the literary works in ancient Greek generally belong to the domain of the Byzantine Empire. However, after the Byzantine refugees restored the knowledge of Ancient Greek in the west during the early humanistic period (15th century), Italian scholars (and later their French, German, Spanish colleagues) started to use Greek, a purely literary language that no one spoke, for their own texts and poems. This habit persisted with various ups and downs throughout the centuries,

according to the development of Greek studies in each country. The aim of this anthology - the first one of this kind - is to give a selective overview of this kind of humanistic poetry in Ancient Greek, embracing all major regions of Europe and trying to concentrate on remarkable pieces of important poets. The ultimate goal of the book is to shed light on an important and so far mostly neglected aspect of the European heritage.

In *Symbolism and Interpretation*, Tzvetan Todorov examines two aspects of discourse: its production, which has traditionally been the domain of rhetoric, and its reception, which has always been the object of hermeneutics. He analyzes the diverse theories of symbolism and interpretation that have been elaborated over the centuries and considers their contribution to a general theory of verbal symbolism, discussing a wide range of thinkers, from the Sanskrit philosophers and Aristotle to the German Romantics and contemporary semioticians. Todorov begins by examining general ideas of linguistic symbolism and the interpretive

process. He then turns to a detailed consideration of two of the most influential and pervasive interpretative strategies in Western thought: the patristic exegesis of Augustine and Aquinas, and the philological exegesis foreshadowed in the work of Spinoza, developed by Wolf, Ast, Boeckh, and Lanson, and criticized by Schleiermacher. Todorov clarifies in masterly fashion the intricacies of the many schools of thought and refines the concepts crucial to critical theory today, including the distinctions between language and discourse, direct and indirect meaning, sign and symbol. Ably translated by Catherine Porter, *Symbolism and Interpretation* provides a coherent and innovative framework that is indispensable to the study of

semiotics, its history, and its future.

In this book, Pierre Duhem explores the evolution of the idea of chemical combination, from the ancient Greeks to the modern era. He argues that the notion of pure substances combining in fixed proportions is a relatively recent development, and that throughout history, there have been many different ideas about what chemical combination entails.
