The 2013 EIFLE Book of the Year! Selected as a finalist for the Best Book Awards by the USA Book News! Visit www.themissingsemester.com to read more testimonials from academic and financial professionals. Choices we make every day have financial consequences—in some cases, BIG financial consequences. Understanding these critical decisions requires understanding their long-term effects. The Missing Semester provides a short course on the essentials for making wise financial decisions and gaining

financial freedom. Although designed with the recent college graduate in mind, *The Missing Semester* is relevant to a much wider audience. Those who bypassed college, or who are already in the working world, may better relate to some of the topics discussed. For those still in college or high school, this is a chance to get a head-start on peers and an independent life. *The Missing Semester* is based on the principle of ownership—ownership of your financial future. It begins with the premise that your financial future is your responsibility, and that you cannot plan for or expect help. The book shows how to build a strong financial foundation, prepare for the unexpected, and confront challenges.

After more than fifteen years of teaching,

Rebekah Nathan, a professor of anthropology at a large state university, realized that she no longer understood the behavior and attitudes of her students. Fewer and fewer participated in class discussion, tackled the assigned reading, or came to discuss problems during office hours. And she realized from conversations with her colleagues that they, too, were perplexed: Why were students today so different and so hard to teach? Were they, in fact, more likely to cheat, ruder, and less motivated? Did they care at all about their education, besides their grades? Nathan decided to put her wealth of experience in overseas ethnographic fieldwork to use closer to home and apply to her own university. Accepted on the strength of her high school transcript, she took a sabbatical and enrolled as a freshman for the

academic year. She immersed herself in student life, moving into the dorms and taking on a full course load. She ate in the student cafeteria, joined student clubs, and played regular pick-up games of volleyball and tag football (sports at which the athletic fifty-something-year-old could hold her own). Nathan had resolved that, if asked, she would not lie about her identity; she found that her classmates, if they were curious about why she was attending college at her age, never questioned her about her personal life. Based on her interviews and conversations with fellow classmates, her interactions with professors and with other university employees and offices, and her careful day-to-day observations, *My Freshman Year* provides a compelling account of college life that should be read by students, parents, professors, university administrators, and anyone else concerned about the state of higher education in America today. Placing her own experiences and those of her classmates into a broader context drawn from national surveys of college life, Nathan finds that today's students face new challenges to which academic institutions have not adapted. At the end of her freshman year, she has an affection and respect for students as a whole that she had previously reserved only for certain individuals. Being a student, she discovers, is hard work. But she also identifies fundamental misperceptions, misunderstandings, and mistakes on both sides of the educational divide that negatively affect the college experience. By focusing on the actual experiences of students, *My Freshman Year* offers a refreshing alternative to the frequently divisive debates surrounding the political, economic, and cultural significance of higher education--as well as a novel perspective from which to look at the achievements and difficulties confronting America's colleges and universities in the twenty-first century.

Serena Mitchell, very unlike her free-spirited sister played by the rules. Poised, polite and polished, she observed the world behind square frames and a guarded heart. But then she met Landon West and she learned some rules were highly overrated. Fast forward three months: Serena Mitchell has changed. She was in love. With her boss. With her father's best friend. A father who is dangerously close to finding out their secret. This wasn't supposed to happen. She wasn't prepared to lose anything at the end of the school year except mind numbing orgasms. Not her father. Not the love of her life. And certainly not her heart. *Second Semester* can be read as a stand-alone and the second in the *Campus Tales Series*

My rebound wasn't supposed to be the best sex of my life. He definitely wasn't supposed to walk into class Monday morning on my first day of college. He wasn't supposed to be my teacher. He did things to my body that no man had ever done before. Things I wanted him to do again And again. And again. But the man I had in my bed two days ago was now off limits. He was my teacher. I was his student. I couldn't have him... I wanted him anyway. *First Semester* is a 50,000 word standalone novel and the first in *The Campus Tales series*.

Developing and Sustaining Successful First-Year Programs First-year programs and interventions have become critical launching pads for student success and retention in higher education. However, these programs often flounder not because of what they are trying to do, but because of the ways in which they are implemented. *Developing and Sustaining Successful First-Year Programs* offers faculty, academic administrators, and student affairs professionals a comprehensive and practical resource that includes step-by-step guidance for developing new first-year programs and enhancing existing programs. The book

explores the key elements that contribute to sustained student success and the programs that have the capacity to continue to meet student needs while making the most of scarce resources. The authors show how to create and sustain critical partnerships, put in place the needed organizational structures, and include strategies for developing effective assessments and evaluations. *Developing and Sustaining Successful First-Year Programs* is filled with illustrative examples and profiles of successful programs from a range of institutions that vary in size, type, selectivity, and culture. Examples of common programs and interventions include summer bridge programs, student orientation, first-year seminars, learning communities, residential programs, developmental education, and many more. Based in scholarly literature, theory, and practice, the book highlights the initiatives that facilitate the transition, learning, development, and success of new college students.

You go into teaching with high hopes: to inspire students, to motivate them to learn, to help them love your subject. Then you find yourself facing a crowd of expectant faces on the first day of the first semester, and you think "Now what do I do?" Practical and lively, *On Course* is full of experience-tested, research-based advice for graduate students and new teaching faculty. It provides a range of innovative and traditional strategies that work well without requiring extensive preparation or long grading sessions when you're trying to meet your own demanding research and service requirements. What do you put on the syllabus? How do you balance lectures with group assignments or discussions—and how do you get a dialogue going when the students won't participate? What grading system is fairest and most efficient for your class? Should you post lecture notes on a website? How

do you prevent cheating, and what do you do if it occurs? How can you help the student with serious personal problems without becoming overly involved? And what do you do about the student who won't turn off his cell phone? Packed with anecdotes and concrete suggestions, this book will keep both inexperienced and veteran teachers on course as they navigate the calms and storms of classroom life.

The hilarious and heartwarming, respectful and thought-provoking memoir of a college student's semester at Liberty

University, the "Bible Boot Camp" for young evangelicals, that will inspire believers and nonbelievers alike. No drinking. No smoking. No cursing. No dancing. No R-rated movies. Kevin Roose wasn't used to rules like these. As a sophomore at Brown University, he spent his days fitting right in with Brown's free-spirited, ultra-liberal student body. But when Roose leaves his Ivy League confines to spend a semester at Liberty University, a conservative Baptist school in Lynchburg, Virginia, obedience is no longer optional. Liberty is the late Reverend Jerry Falwell's "Bible Boot Camp" for young evangelicals, his training ground for the next generation of America's Religious Right. Liberty's ten thousand undergraduates take courses like Evangelism 101 and follow a forty-six-page code of conduct that regulates every aspect of their social lives. Hoping to connect with his evangelical peers, Roose decides to enroll at Liberty as a new transfer student, chronicling his adventures in this daring report from the front lines of America's culture war. His journey takes him from an evangelical hip-hop concert to a spring break mission trip to Daytona Beach (where he learns to preach the gospel to partying coeds). He meets pastors' kids, closet doubters, Christian rebels, and conducts what would be the last print interview of Rev. Falwell's life.

Teaching First-Year College Students is a thoroughly expanded and updated edition of Teaching College Freshmen, which has become a classic in the field since it was published in 1991. The book offers concrete suggestions about specific strategies and approaches for faculty who teach first-year courses. The new edition is based on the most current research on teaching and learning and incorporates information about the demographic changes that have occurred in student populations since the first edition was published. The updated strategies are designed to help first-year students adjust effectively to both the academic and nonacademic pressures of college. The authors also help faculty understand first-year students and show how their experiences in high school have prepared^{3/4}or not prepared^{3/4}them for the world of higher education.

James "JD" Dawson grew up in the hood, but left a life of violence three thousand miles behind to make something of himself at University of Atlanta. But when the freshman got off to a fool's start—kicking it with his new homeboys, showing up late to class, not studying and checking out the shorties—JD was assigned a tutor, the luscious Katrina Turner. She made studying real fun. But if JD wanted to get with a girl like Katrina, he'd also have to learn to grow up.

The revised syllabus for core courses in CBCS / Semester system is being followed by all the universities in Andhra Pradesh, from the academic year 2020 - 2021. This book strictly covers the new curriculum for Course I (Semester I - 1st year, 1st semester) under this syllabus

Second Semester Peterson Nelnet Company

The book explores the journey of 10 international students to better understand their experiences at a U.S. educational institution and how they constructed and revealed these experiences in this particular socio-academic space. The study features a series of three interviews during the semester that the participants were enrolled in a mainstream first-year writing

course; their stories not only capture their experiences but reveal inspiring stories that “give voice” to students outside the dominant cultural and linguistic community. This study raises questions about how to support international students: In what ways can it inform our practices and policies relative to the internationalization of education and the development of global perspectives and competencies? What does it reveal that could impact daily instruction of L2 writing, particularly when it comes to international students’ need to meet the expectations of “university-level writing” in U.S. institutions of higher education? On an individual level, what can we learn from these students and about ourselves as a result of our interactions?
