Eureka helps students to truly understand math, connect it to the real world, and prepare them to solve problems they haven't encountered before. The team of teachers and mathematicians who created Eureka Math believe that it is not enough for students to know the process for solving a problem; they need to know why that process works. Eureka presents math as a story, one that develops from grades PK through 12. In A Story of Units, our elementary curriculum, this sequencing has joined with the methods of instruction that have been proven to work, in this

nation and abroad.

Volume 1 of Bold Ventures illuminates patterns among eight prominent U.S. innovations: California's science education reform, ChemCom, Contemporary Precalculus, Kids Network, Project 2061, NCTM Standards, Urban Mathematics Collaboratives, and Voyage of the Mimi. Patterns included changing conceptions of school science and mathematics, new strategies for effecting reform, greater emphasis on teachers as designers and objects of change, and underplayed attention to equity issues and project evaluation.
