"Muhammad Ali as you've never seen him...a new graphic novel mixes comic book art and rarely seen photography... powerful combination" - The New York Times Award-winning writer JD Morvan and renowned photographer Abbas' stunning graphic novel masterpiece which uses iconic photos to uniquely illustrate the historical 'Rumble in the Jungle' boxing match between Muhammad Ali and George Foreman. "The drawings and photos allow us to revel in the imagery and history of that unforgettable night, and the torrid pace

of the storytelling, the many flashbacks allow us to see the full context of the fight" - The Ring On the 30 th October 1974, the most famous boxing match of the 20 th Century took place. Nicknamed the "Rumble in the Jungle", it pitted Muhammad Ali, desperate to win back his world champion belt, and George Foreman, the current holder, against each other. Foreman had just KO'd the only two boxers to have ever beaten Ali. By his own admission, Ali was terrified of facing him in the ring... Now, the photojournalist Abbas immortalises this legendary meeting, having kept his photos in his personal archives for 36 years before unveiling them to the world. In a cross between a documentary, photo report and graphic novel, this book reveals the context of

the most powerful photographs taken by one of the greatest photographers of the Magnum Photos agency. Enriched by the testimony of Abbas himself, Jean-David Morvan's script is rigorously brought to life by artist Rafael Ortiz. "[A] gritty, action-packed hybrid work of photography and comics art ... lands plenty of punches" - Publishers Weekly

 "They don't have syntax, so we can eat them." According to Richard Sorabji, this conclusion attributed to the Stoic philosophers was based on Aristotle's argument that animals lack reason. In his fascinating, deeply learned book, Sorabji traces the roots of our thinking about animals back to Aristotelian and

Stoic beliefs. Charting a recurrent theme in ancient philosophy of mind, he shows that today's controversies about animal rights represent only the most recent chapter in millennia-old debates. Sorabji surveys a vast range of Greek philosophical texts and considers how classical discussions of animals' capacities intersect with central questions, not only in ethics but in the definition of human rationality as well: the nature of concepts; how perceptions differ from beliefs; how memory, intention, and emotion relate to reason; and to what extent speech, skills, and inference can serve as proofs of reason. Focusing on the significance of ritual sacrifice and the eating of meat, he explores religious contexts of the treatment of animals in ancient Greece

and in medieval Western Christendom. He also looks closely at the contemporary defenses of animal rights offered by Peter Singer, Tom Regan, and Mary Midgley. *Animal Minds and Human Morals* sheds new light on traditional arguments surrounding the status of animals while pointing beyond them to current moral dilemmas. It will be crucial reading for scholars and students in the fields of ancient philosophy, ethics, history of philosophy, classics, and medieval studies, and for everyone seriously concerned about our relationship with other species. This study of Nebuchadnezzar's madness in Daniel 4 demonstrates how the

elements which the biblical author borrowed from Ancient Near Eastern myth commanded the attention of early Jewish and Christian exegetes.

This is the fascinating story of a group of reformers who tried to go too fast, bungled their reform, and so changed the course of history. Hengel's thesis is that Hellenistic influences were, and had been for centuries, smoothly penetrating Judaism even in Jerusalem; there was respect on both sides between Jew and Greek. Then the Greek party tried to go too fast, make Hellenization obligatory and outlaw the Law. This occasioned a furious defensive reaction; Judaism clammed up, became xenophobic and rigoristic, producing the attitude which in its turn created the defensive reaction of anti-Semitism which has stained so many centuries. The defensive rigidity set up in Judaism made it unable to

respond to Jesus' creative reinterpretation of the Law, and so led to the rejection of Christianity. This is a truly important scholarly work. The exhaustive collection of evidence will make it a fundamental textbook for the period' (The Tablet). 'A foundation book and essential as a source book and as a guide to trends in present research' (The Expository Times). Martin Hengel was Professor of New Testament and Early Judaism in the University of Tubingen.
