"Animal Internet is a most important book.
This excellent work could be a strong
catalyst for people to rewild, to reconnect
and become re-enchanted with all sorts of
mysterious and fascinating animals, both
local and distant. By shrinking the world it
will bring humans and other animals
together in a multitude of ways that only a
few years ago were unimaginable." —Marc
Bekoff, University of Colorado, author of
*Rewilding Our Hearts: Building Pathways
of Compassion and Coexistence* "An
original book that goes against the trend

to stubbornly keep nature and technology
divided from one another."—Der Spiegel
"Animal Internet is one of the most
interesting books that I've read in recent
years."—Bavarian Radio "What Pschera
describes sounds futuristic but it's already
widespread reality . . . Pschera's book is
not just popular science: he describes not
only the status quo, but also thinks about
an ongoing transformation."—Wired.de
Some fifty thousand creatures around the
globe—including whales, leopards,
flamingoes, bats, and snails—are being
equipped with digital tracking devices. The
data gathered and studied by major

scientific institutes about their behavior will warn us about tsunamis, earthquakes and volcanic eruptions, but also radically transform our relationship to the natural world. With a broad cultural and historical perspective, this book examines human ties with animals, from domestic pets to the soaring popularity of bird watching and kitten images on the web. Will millennia of exploration soon be reduced to experiencing wilderness via smartphone? Contrary to pessimistic fears, author Alexander Pschera sees the Internet as creating a historic opportunity for a new dialogue between man and nature. Foreword by Martin Wikelski, Director, Max Planck Institute for Ornithology Alexander Pschera, born in 1964, has published several books on the internet and media. He studied German, music, and philosophy at Heidelberg University. He lives near Munich where he writes for the German magazine Cicero as well as for German radio.
