What happens when we engage with fictional characters? How do our imaginative engagements bear on our actions in the wider world? Moving between the literary and the philosophical, Sophie Ratcliffe considers the ways in which readers feel when they read, and how they understand ideas of feeling. *On Sympathy* uses dramatic monologues based on *The Tempest* as its focus, and broaches questions about fictional belief, morality, and the dynamics between readers, writers, and fictional characters. The book challenges conventionally accepted ideas of literary identification and sympathy, and asks why the idea of sympathy has been seen as so important to liberal humanist theories of literary value. Individual chapters on Robert Browning, W. H. Auden, and Samuel Beckett, who all drew on Shakespeare's late play, offer new readings of some major works, while the book's epilogue tackles questions of contemporary sympathy. Ranging from the nineteenth century to the present day, this important new study sets out to clarify and challenge current assumptions about reading and sympathetic belief, shedding new light on the idea and ideal of sympathy, the workings of affect and

allusion, and the ethics of reading.

This book is the first in-depth investigation of the Goth subculture in Italy, focusing in particular on the city of Milan. It grows out of a three year research project - the first in Italy of this scope on the topic - based on the life histories of two dozen participants. In light of this, Simone Tosoni and Emanuela Zuccalà propose an innovative approach to the study of spectacular subcultures: contrarily to the most common accounts of the spectacular subcultures of the 80s, this book describes the experience of subcultural belonging as plural and internally diversified. In particular, three different variations - or 'enactments' - of goth are described in-depth: the politically engaged one; the one typical of the scene of the alternative music clubs spread all over northern Italy; and the one, common in the little towns surrounding Milan (but not limited to it), where participants used to 'enact' the dark subculture alone or in small groups. Their book argues that while these three different variations of goth shared the same canon of subcultural resources (music, style, patterns of cultural consumptions), they differed under relevant points of view, like forms of socialization, stance toward political activism, identity construction processes, and even their relationship with urban space. Yet, contrarily to the stress on individual differences in 'subcultural' belonging typical of post-subcultural theorists, the Milanese variations of goth appear to have been

socially shared, as socially shared were the different 'practices of enactment' of the subculture that characterized each of them.

Shocking true stories of those who walk among us . . . With the Kepler satellite observatory detecting new planets at an unprecedented rate and the powerful computers at NASA's Ames Research Center seeking signs of distant life, will a breakthrough discovery happen shortly—or has there already been a secret encounter with alien beings? Who might be coming next? And who walks among us today? Visits from otherworldly creatures, aliens living among us, abductions of humans to alien spacecraft, and accounts of interstellar cooperation since the UFO crash in Roswell are thoroughly investigated in *Real Aliens, Space Beings, and Creatures from Other Worlds*. Paranormal researcher extraordinaire Brad Steiger, an author of thousands of books and articles on the mysterious and unknown, looks into a wide host of otherworldly encounters from alleged eyewitness accounts of extraterrestrial beings working side by side with human scientists to the uncomfortable accusations of alien abductions. Disquieting testimonials, enlightening news articles, informative historical accounts and documents, this book chronicles more than 300 examples of alien encounters, conspiracy theories, and the influence of extraterrestrials on human events throughout history. This discussion of the theories and mysteries surrounding aliens is packed with thought-provoking stories and shocking revelations of alien involvement in the lives of Earthlings, such as ... Three Russian scientists who were monitoring the Apollo Moon Landing on July 20,

1969 claim that astronauts Armstrong and Aldrin were being closely observed by UFOs; Thousands of women all over the world claim to have been abducted for the purpose of bearing Hybrid Children; A family in Colorado repeatedly visited by aliens—with physical evidence and photographs to prove their story. From cattle and human mutilations to missing time experienced by UFO experiences, and from secret underground and even underwater alien facilities to government-alien conspiracies, each astonishing report is detailed with thorough research and recounted with a storyteller's crafted voice. *Real Aliens, Space Beings, and Creatures from Other Worlds* will leave the reader wondering who has visited us; who's coming to visit next; and who walks among us.

Ethnozoology: Animals In Our Lives represents the first book about this discipline, providing a discussion on key themes on human-animal interactions and their implications, along with recent major advances in research. Humans share the world with a bewildering variety of other animals, and have interacted with them in different ways. This variety of interactions (both past and present) is investigated through ethnozoology, which is a hybrid discipline structured with elements from both the natural and social sciences, as it seeks to understand how humans have perceived and interacted with faunal resources throughout history. In a broader context, ethnozoology, and its companion discipline, ethnobotany, form part of the larger body of the science of

ethnobiology. In recent years, the importance of ethnozoological/ethnobiological studies has increasingly been recognized, unsurprisingly given the strong human influence on biodiversity. From the perspective of ethnozoology, the book addresses all aspects of human connection, animals and health, from its use in traditional medicine, to bioprospecting derivatives of fauna for pharmaceuticals, with expert contributions from leading researchers in the field. - Draws on editors' and contributors' extensive research, experience and studies covering ethnozoology and ethnobiology - Covers all aspects of human-animal interaction through the lens of this emerging discipline, with coverage of both domestic and wild animal topics - Presents topics of great interest to a variety of researchers including those in wildlife/conservation (biologists, ecologists, conservationists) and domestic-related disciplines (psychologists, sociologists)

In the early 1990s people around the small town of Elkhorn, Wisconsin, claimed to see strange, hairy, wolf-headed creatures that sometimes walked upright and seemed not afraid of man. The canid sensation was soon dubbed Beast of Bray Road, after the location of the first reported sightings. Author Linda Godfrey began investigating this story and soon found herself in the middle of a national sensation. Nobody has ever been able to prove whether the beast is a flesh-and-blood werewolf or will-o'-the-wisp, demon dog, or noble animal. But the author gives the reader plenty to chew on. Make up your own mind, if you do so at all, only after the marrow has been extracted and well digested.

Knowing the Certainty I Lym Al-Yaqeen By the Perfect Wisdom of the Holy Revelation of the Holy Quran Oxford University Press, USA

The principle, omne agens agit sibi simile, "every agent causes something similar to itself," is fundamental to Scholastic metaphysics, and especially natural theology. In fact, it is only upon its vasis that inferences can be made from creaturely characteristics to the nature of the Creator. However, omne agens agit sibi simile, is taken for granted even by an author such as Saint Thomas Aquinas, who never feels any need to justify its validity, in spite of the fact that "there is hardly a phrase which occurs more often in Saint Thomas," as Etienne Gilson remarked. Tracing the historical roots of omne agens agit sibi simile is an indispensable first step in

trying to explain the import of this principle in Scholastic Thought. The first part of the book is devoted to this task. It argues that the mediaeval metaphysics of causal similarity is rooted in a conception of the cosmos which goes back to the Presocratics, and according to which being is essentially circular, or self-reflexive. This conception was further elaborated by Plato, Aristotle, the Neoplatonists, and their mediaeval successors. The second part examines *omne agens agit sibi simile* in Thomistic metaphysics. Without neglecting Aquinas's sources, it attempts to elucidate the structure of his thought in the light of contemporary philosophical questions. It is stressed, for instance, that in Aquinas's thought, causality involves a process of 'concealing revelation' of the cause in and through its effect? an idea which was later to become a central element in Heidegger's philosophy.

Encyclopedia of Film Themes, Settings and Series OUP Oxford

Taxidermy and the Gothic: The Horror of Still Life is the first extended study of the Gothic's collusion with taxidermy. It tells the story of the emergence in the long nineteenth century of the twin golden ages of the Gothic genre and the practice of taxidermy, and their shared rhetorical and narratological strategies, anxieties, and sensibilities. It follows the thread into twentieth- and twenty-first-century culture, including recent horror film, fiction, television, and visual arts to argue that the Gothic and taxidermy are two discursive bodies, stuffed and stitched together. Moving beyond the well-worn path that treats taxidermy as a sentimental art or art of mourning, this book takes readers down a new dark trail, finding an overlooked but rich tradition in the Gothic that aligns it with

the affective and corporeal work of horror and the unsettling aesthetics, experiences, and pleasures that come with it. Over the course of four chapters, it argues that in addition to entwined origins, taxidermy's uncanny appearance in Gothic and horror texts is a driving force in generating fear. For taxidermy embodies the phenomenological horror of stuckness, of being there. In sum, taxidermy's imbrication with the Gothic is more than skin deep: these are rich discourses stuffed by affinities for corporeal transgressions, the uncanny, and the counterfeit.

Nessun genere musicale è mai riuscito a creare così tanta arte e cultura al di fuori del suo contesto, come ha fatto il rap. Questo è stato possibile grazie al fatto che la musica rap affonda le sue radici in una formidabile "subcultura", nata a New York agli inizi degli anni Settanta e poi diffusasi in tutto il mondo dalla metà degli anni Ottanta in poi". Partendo dalle fondamenta di questo fenomeno culturale, o meglio, "subculturale", il saggio di Simone Nigrisoli mette in luce gli aspetti e i processi che hanno portato l'Hip Hop a rappresentare uno dei movimenti musicali (e non solo) più interessanti degli ultimi quarant'anni. Dai suoi primi passi, mossi nei sobborghi delle metropoli americane, fino al suo approdo in Europa e in gran parte del mondo. Un lavoro significativo che si auspica possa interessare non solo gli addetti ai lavori e il loro pubblico ma anche chi, a livello accademico, studia le molteplici forme delle produzioni socio-culturali umane. Simone Nigrisoli è un giornalista pubblicista iscritto all'ordine della Valle d'Aosta. Abita a Roma, dove svolge le attività di giornalista, scrittore e fotografo. Ha studiato a Urbino nella

città di Raffaello Sanzio, dove si è laureato in Scienze delle Comunicazioni all'Università Carlo Bo. Nella sua carriera ha collaborato diversi anni con il Resto del Carlino, scrivendo nelle pagine di arte, cultura, cronaca e politica.

 Generazione Afro: musica e stile di vita di una subcultura giovanile degli anni Ottanta è il frutto di uno scavo prodotto all'incrocio tra la storia, la filosofia e la teoria politica teso a dimostrare che tra le subculture protagoniste negli anni Ottanta della scena nazionale è esistito un movimento di giovani che, oltre alla predilezione per i vagabondaggi e per la vita in comune, è stato caratterizzato anche dalla passione per un genere molto particolare di musica dance: un genere musicale che è stato denominato "afro" e che in questo lavoro è all'origine dello stesso aggettivo con cui si è scelto di definire il raggruppamento di giovani che intorno a esso è cresciuto e si è sviluppato. Si è trattato di un movimento che è stato quasi del tutto ignorato dalla ricerca sui fenomeni giovanili del nostro Paese, forse come conseguenza del fatto che è stato assimilato a una delle più tarde manifestazioni della controcultura hippy oppure è stato annoverato entro le culture da club sorte nel nostro Paese negli ultimi decenni del secolo scorso. Lo scavo effettuato in questo libro ha prodotto invece un'immagine della "generazione afro" come una vera e propria "subcultura", nell'accezione a partire dalla quale negli anni Settanta questo concetto è stato definito dal Centre for Contemporary Cultural Studies dell'Università inglese di Birmingham; una subcultura di cui sono stati indagati lo stile di vita e i modi di impiego del tempo libero e che, a parere dell'autrice, rappresenta in Italia uno dei più importanti anelli di giunzione tra il

fenomeno hippy degli anni Sessanta e quello dei raver che si è affermato negli anni Novanta.

Ethnozoology Crossing Press

Con 'new wave' si definisce un movimento musicale e artistico incredibilmente eterogeneo, sviluppatosi tra la seconda metà degli anni Settanta e i primi Ottanta; difficile immaginare qualcosa in comune tra i Duran Duran di Rio e i Joy Division di Love Will Tear Us Apart, eppure c'è: sfruttando l'energia, gli stimoli e il dinamismo ancora in circolazione del punk, numerose band hanno scelto di reinventare estetiche e suoni, creando così un'onda musicale nuova e multiforme. Dall'Italia agli Stati Uniti, dal Regno Unito all'Europa, Gabriele Merlini, scrittore di talento e appassionato esperto musicale, racconta un percorso composto di aneddoti, suggestioni, reportage: in modo lieve e pungente costruisce la storia - parziale, perché inesauribile, e di parte, perché come non parlare delle band amate - di autori e gruppi che hanno condiviso un tempo ancora capace di sorprendere per stimoli, capacità creativa e inaspettate similitudini con il presente.

A comprehensive guide to cryptozoology—the quest to identify animals that have not been officially catalogued by science and to place these unknown animals into their proper zoological categories. In this fascinating two-volume encyclopedia, author George M. Eberhart provides a comprehensive catalog of nearly 1,000 cryptids—unknown animals usually reported through eyewitness accounts and not yet described by science. Cryptids are the stuff of folklore, hoaxes, and genuine scientific breakthroughs. There are 400 now-classified cryptids once considered either extinct or pure fantasy. The cryptozoologist's job is to strip away the myth, misidentification, and mystery—and separate fact from fiction. Mysterious Creatures covers everything from dinosaurs and the emala-ntouka, an elephant-killing dinosaur-like animal of central Africa, to searches for the Loch Ness monster, Bigfoot, and other cryptozoological hoaxes. Entries about specific animals include the derivation or meaning of each cryptid's name, its scientific name, variant names, a physical description, behavior, description of tracks, habitat, significant sightings, present status, and possible explanations. Illustrations and photographs accompany many entries. The book also includes resources and references for further information.
