Life is a roller coaster ride of experiences, revelations and memories. Instances and hurdles of emotions pursue expressions in poetry. Maples and gulmohars is a compendium of poems and it mirrors the journey of a lady, who has transcended the tests of sands of time. The verses divulge the innocence of a carefree child, the passions of an unrequited lover, the kindling spirits of a warrior, the melancholies for the deceased, the frozen moments of the cobwebbed photographs, the insanities of the lost mind, the perfections of an 'imperfect' woman, the anguished voices of the masculinity, the celebration of motherhood, the pilgrim who is yearning to find the gist of life, The hermit who is about to attain Nirvana and many personas which one may have come across in life. The poems reflect the lanes of Nostalgic bygone days like the drizzly petals

of Gulmohar Speckled along the kerb roads. Then it takes a leap and gets struck with the unfair gimmicks of life. The lines finally curtain with the strength and endurance of the Maple leaves. Mixed with diverse kinds of feelings and perspectives, the poems shift to and fro in different time lines and it is the perfect alchemy for the readers.

**Mahatma Gandhi and Mass Media** Writersgram Studies have indicated that employers across the globe face difficulties in filling critical roles, sparking a worldwide "war for talent." "Actinomycetes are a versatile group of Gram positive bacteria widely distributed in the terrestrial and aquatic environments. The specialty of the actinomycetes is that they

have a mycelial appearance unlike most bacteria. This group of bacteria is well known for their ability to produce a range of bioactive molecules, including antibiotics and various kinds of enzymes. As they are known for their ability to produce various antibiotics, the actinomycetes are widely explored by various research groups in search of novel drug molecules. Since the cultivation and maintenance of actinobacteria are not that easy as in the case of other bacteria, they are rather underexplored. With the frequent emergence of multidrug resistant bacteria, which are outpacing the discovery of new antibiotics, there is a renewed interest in actinomycetes from special habitats such as extreme habitats in the marine environment, salt pans, geothermal springs, permanently frozen polar environments etc. Endophytic actinomycetes are also attracting the attention of current researchers in this field. This book titled "A Closer Look at Actinomycetes" is a compilation of articles which deals with interesting topics such as "actinomycetes as

microbial drug factories", endophytic fungi from special habitats of Pakistan as well as strategies for exploration of actinomycetes diversity and the taxonomy of actinomycetes should be of great interest to those who are interested in Actinomycetes research. People with interest in general microbiology will also find it an interesting read"--

The places to where Malayalees have migrated are different. And so are the problems in each place. But the aims of all those people are the same to become rich so as to lead a luxurious life and to give the most excellent education to their children. According to the places where they settle down either permanently or temporarily, they are

called nonresidents (going for employment purposes only) or immigrants. But who are the real nonresidents? And who are the real immigrants?

A practical and hopeful examination of how colleges and universities can create the best possible experience for students and faculty. There are few higher education leaders today that command more national respect and admiration than Freeman A. Hrabowski III, the outspoken president of the University of Maryland, Baltimore County. Named one of America's Best Leaders by US News & World Report and one of Time's 100 Most Influential People in the World, Hrabowski has led a community

transformation of UMBC from a young, regional institution to one of the nation's most innovative research universities. In The Empowered University, Hrabowski and coauthors Philip J. Rous and Peter H. Henderson probe the way senior leaders, administrators, staff, faculty, and students facilitate academic success by cultivating an empowering institutional culture and broad leadership for innovation. They examine how shared leadership enables an empowered campus to tackle tough issues by taking a hard look in the mirror, noting strengths and weaknesses while assessing opportunities and challenges. The authors dig deeply into these tough issues in higher education ranging from course redesign to group-based and experiential learning, entrepreneurship and civic engagement, academic inclusion, and faculty diversity. The authors champion a holistic approach to student success, focusing on teaching and learning while offering an array of financial, social, and academic supports for students of all backgrounds. Throughout

the book, the authors emphasize the important role of analytics in decision-making. They also explore how community members and senior leaders can work together to create an inclusive campus through a more welcoming and supportive racial climate, improved Title IX processes, and career support for faculty of all backgrounds. Ultimately, *The Empowered University* is as much a case study of the authors' work as it is an examination of institutional change, inclusive excellence, and campus-community partnerships. Arguing that higher education can play a unique role in addressing the fundamental divisions in our society and economy by supporting individuals in reaching their full potential, the authors have developed a provocative guide for higher education leaders who want to promote healthy and productive campus communities. *Handbook of Research on New Dimensions of Gender Mainstreaming and Women Empowerment* IGI Global
