Leviticus as Literature Legare Street Press

Important new insights into how various components and systems evolved Premised on the idea that one cannot know a science without knowing its history, History of Wireless offers a lively new treatment that introduces previously unacknowledged pioneers and developments, setting a new standard for understanding the evolution of this important technology. Starting with the background-magnetism, electricity, light, and Maxwell's Electromagnetic Theory-this book offers new insights into the initial theory and experimental exploration of wireless. In addition to the well-known contributions of Maxwell, Hertz, and Marconi, it examines work done by Heaviside, Tesla, and passionate amateurs such as the Kentucky melon farmer Nathan Stubblefield and the unsung hero Antonio Meucci. Looking at the story from mathematical, physics, technical, and other perspectives, the clearly written text describes the development of wireless within an avid scientific milieu. History of Wireless also goes into other key areas, including: The work of J. C. Bose and J. A. Fleming German, Japanese, and Soviet contributions to physics and applications of electromagnetic oscillations and waves Wireless telegraphic and telephonic development and attempts to achieve transatlantic wireless communications Wireless telegraphy in South Africa in the early twentieth century Antenna development in Japan: past and present Soviet quasi-optics at near-mm and sub-mm wavelengths The evolution of electromagnetic waveguides The history of phased array antennas Augmenting the typical, Marconi-centered approach,

History of Wireless fills in the conventionally accepted story with attention to more specific, less-known discoveries and individuals, and challenges traditional assumptions about the origins and growth of wireless. This allows for a more comprehensive understanding of how various components and systems evolved. Written in a clear tone with a broad scientific audience in mind, this exciting and thorough treatment is sure to become a classic in the field.

God only knows what possessed Bill Bryson, a reluctant adventurer if ever there was one, to undertake a gruelling hike along the world's longest continuous footpath—The Appalachian Trail. The 2,000-plus-mile trail winds through 14 states, stretching along the east coast of the United States, from Georgia to Maine. It snakes through some of the wildest and most spectacular landscapes in North America, as well as through some of its most poverty-stricken and primitive backwoods areas. With his offbeat sensibility, his eye for the absurd, and his laugh-out-loud sense of humour, Bryson recounts his confrontations with nature at its most uncompromising over his five-month journey. An instant classic, riotously funny, *A Walk in the Woods* will add a whole new audience to the legions of Bill Bryson fans.

"Exuberant, astute, and splendidly illustrated history of world art . . . draws fascinating parallels between artistic developments in Western and non-Western art."—Publishers Weekly In this beautifully written story of art, Julian Bell tells a vivid and compelling history of human artistic achievements, from prehistoric stone carvings to the latest video installations. Bell, himself a painter, uses a variety of objects to reveal how art is a product of our shared experience and how, like a mirror, it can reflect the human condition. With hundreds of illustrations and a uniquely global perspective, Bell juxtaposes examples that challenge and enlighten the reader: dancing bronze figures from southern India, Romanesque sculptures, Baroque ceilings, and jewel-like Persian manuscripts are discussed side by side. With an insider's knowledge and an unerring touch, Bell weaves these diverse strands into an invaluable introduction to the wider history of world art.

Chemistry and Other Stories, A Picador Paperback Original From the pre-eminent chronicler of this forgotten territory, stories that range over one hundred years in the troubled, violent emergence of the New South. In Ron Rash's stories, spanning the entire twentieth century in Appalachia, rural communities struggle with the arrival of a new era. Three old men stalk the shadow of a giant fish no one else believes is there. A man takes up scuba diving in the town reservoir to fight off a killing depression. A grieving mother leads a surveyor into the woods to name once and for all the county where her son was murdered by thieves. In the Appalachia of Ron Rash's stories, the collision of the old and new south, of antique and modern, resonate with the depth and power of ancient myths.

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does

sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Discover why and how schools must become places where thinking is valued, visible, and actively promoted As educators, parents, and citizens, we must settle for nothing less than environments that bring out the best in people, take learning to the next level, allow for great discoveries, and propel both the individual and the group forward into a lifetime of learning. This is something all teachers want and all students deserve. In *Creating Cultures of Thinking: The 8 Forces We Must Master to Truly Transform Our Schools*, Ron Ritchhart, author of *Making Thinking Visible*, explains how creating a culture of thinking is more important to learning than any particular curriculum and he outlines how any school or teacher can accomplish this by leveraging 8 cultural forces: expectations, language, time, modeling, opportunities, routines, interactions, and environment. With the techniques and rich classroom vignettes throughout this book, Ritchhart shows that creating a culture of thinking is not about just adhering to a particular set of practices or a general expectation that people should be involved in thinking. A culture of thinking produces the feelings, energy, and even joy that can propel learning forward and motivate us to do what at times can be hard and challenging mental work.

Leaving Little Havana Novel Units, Incorporated

Revolution uprooted six-year-old Cecilia from her comfortable middle-class Cuban home and dropped her into the low-income neighborhood of Miami's Little Havana. Her philandering father focused on rebuilding his career, chasing the American promise of wealth and freedom from the past. Her mother spiraled into madness trying to hold the family together and get him back. Neglected and trapped, Cecilia rebelled against her conservative culture and embraced the 1960s counter-culture - seeking love, attention and a place of her own in America. But immigrant children either thrive or self-destruct in a new land. How will Cecilia beat the odds? While most memoirs by Cuban-Americans revolve around childhood scenes in Cuba and explore the experiences of a young man, *Leaving Little Havana* is the first refugee memoir to focus on a Cuban girl growing up in America, rising above the obstacles and clearing a path to her American Dream. "Leaving Little Havana is the compelling story of a Cuban girl seeking a new life in the U.S. with her family as the Cuban revolution unfolds in the early sixties. 'Cecilita's' personal account, and sexual awakening, is transparent, sad, and triumphant, sprinkled with anecdotes of an emerging Cuban-American landscape. In short, this book is a colorful reminiscence of historical scenes on both sides of the Straits of Florida, providing closure to a Cuban American journalist coming to terms with her turbulent past." - Guarione M. Diaz, President Emeritus, Cuban American National Council "Cecilia Fernandez's memoir of growing up Cuban in Miami is not only fascinating reading, it tells more about the story of Cubans in this U.S. than a truckload of sociology textbooks - and is a thousand times more entertaining!" - Dan Wakefield, author of *New York in the Fifties* "Leaving Little Havana is a candid, touching, and engaging memoir of a young Cuban exile's coming of age. Cecilia Fernandez writes with passion and intensity, both of her missteps and her triumphs, casting fresh light on the American experience in the process." - Les Standiford, author of *Havana Run and Bringing Adam Home* "Cecilia Fernandez gives us a coming of age story told with wide open eyes and vivid details of growing up in Little Havana. Broken-hearted more times than she can count, she gradually finds a path to new beginnings and the infinite promises of the American Dream. A poignant and important chronicle of the Miami Cuban immigrant journey." - Ruth Behar, author of *Traveling Heavy: A Memoir in Between Journeys* "Every so often along comes a book that seizes you by the collar and arrests you on the spot. From page one, *Leaving Little Havana* is a brilliant, voice-driven book that will make your heart skip a few beats. My experience reading this book was similar to the first time I read *The House on Mango Street* by Sandra Cisneros when you instantly know you are reading a classic, a story so achingly beautiful and unforgettable you relish every last word as if it were the buzzing of a hummingbird at your lips feeding you honey. This book is about family, about what happens to family in exile, about how people come into a great world of struggle and manage to get by and survive. The author has a great gift for capturing that world-known enclave of Miami we love and call Little Havana. This might be the book that puts it on the literary map for good and forever." - Virgil Suárez, author of *Latin Jazz, The Cutter, and 90 Miles: Selected and New Poems*
