Women's Sexual Function and Dysfunction

Molière's anticlerical comedy Tartuffe is the unique prism through which Sheryl Kroen views postrevolutionary France in the years of the Restoration. Following the lead of the French men and women who turned to this play in the 1820s to make sense of their world, Kroen exposes the

crisis of legitimacy defining the regime in these years and demonstrates how the people of the time made steps toward a democratic resolution to this crisis. Moving from the town squares, where state and ecclesiastical officials orchestrated their public spectacles in favor of the monarchy, to the theaters, where the French used Tartuffe to mock the restored monarch and the church, this cultural history of the Restoration offers a rich and colorful portrait of a period in which critical legacies of the revolutionary period were played out and cemented. While most

historians have characterized the Restoration as a period of reaction and reversal, Kroen offers convincing evidence that the Restoration was a critical bridge between the emerging practices of the Old Regime, the Revolution, and the post-1830 politics of protest. She re-creates the atmosphere of Restoration France and at the same time brings major nineteenth-century themes into focus: memory and commemoration, public and private spheres, politics and religion, anticlericalism, and the formation of democratic ideologies and practices.

Some of the most compelling theoretical debates in the humanities today center on representations of sexuality. This volume is the first to focus on the topic -- in particular, the connections between nationhood, sex, and gender -- in the Lusophone, or Portuguese-speaking, world. Written by prominent scholars in Brazilian, Portuguese, and Lusophone African literary and cultural studies, the essays range across multiple discourses and cultural expressions, historical periods and theoretical approaches to offer a uniquely comprehensive perspective on the issues of sex and sexuality in the literature and culture of the Portuguese-speaking world that extends from Portugal to Brazil to Angola, Cape Verde, and Mozambique. Through the critical lenses of gay and lesbian studies, queer theory, postcolonial studies, feminist theory, and postmodern theory, the authors consider the work of such influential literary figures as Clarice Lispector and Silviano Santiago. An important aspect of the volume is the publication of a newly discovered-and explicitly homoerotic -- poem by Fernando Pessoa, published here for the first time in

the original Portuguese and in English translation. Chapters take up questions of queer performativity and activism, female subjectivity and erotic desire, the sexual customs of indigenous versus European Brazilians, and the impact of popular music (as represented by Caetano Veloso and others) on interpretations of gender and sexuality. Challenging static notions of sexualities within the Portuguese-speaking world, these essays expand our understanding of the multiplicity of differences and marginalized subjectivities that fall under the intersections of sexuality, gender, and race.

In this ground-breaking new study, Jacques Le Goff, arguably the leading medievalist of his generation, presents his view of the primacy of the Middle Ages in the development of European history. "[A] superb and necessary book. This provocative assessment from a lifetime of scholarship might help us to place ourselves, not just territorially, but in that other precious element of history: time." The Guardian "A book that never fails to be informative, readable and provocative. Le Goff... has been the bravest and best of champions for medieval history. This book... is in every sense an inspiration." BBC History Magazine Praised by prominent figures in Europe and history including: Rt Hon Christopher Patten, CH, Former Member of the

European Commission, and Neil Kinnock, Vice-President, European Commission. *Sexual Medicine in Primary Care* Aperture
 This book is the result of a study on demand-led plant variety design for changing markets in Africa, the purpose of which is to identify and share best practices in demand-led plant breeding from private and public sector breeding programmes worldwide. The intended audiences are professionals in plant breeding and related areas, such as seed production, who have interests in developing and disseminating new plant varieties as a way to increase productivity and profitability in crop agriculture, especially in Africa. The volume is also intended for use as a resource book for the education of postgraduate scholars in plant breeding and genetics, and for the continuing professional development of plant breeders. For this purpose, boxes are included in the main sections of each chapter that summarize its educational objectives and present the key messages and questions that are involved; in addition, there is a final box at the end of each chapter that summarizes its overall learning objectives.

 The first, definitive text on female sexual dysfunction, this major new book summarizes the current body of knowledge in the field, traces the history of developments in the area, and identifies work still needed in the future. Reflecting a multidisciplinary approach to the subject, the book details the methods and materials for ensuring the appropriate management of women with sexual health problems, and concentrates on the presentation of evidence-based data concerning the physiology, pathophysiology, diagnosis and treatment of sexual function and dysfunction in women. The inclusion of 'difficult cases' also enhances the use of text as a practical guide to all disciplines concerned with the field of female sexual dysfunction. This important work will become a key resource for basic science researchers, endocrinologists, gynecologists, psychologists, urologists, health care clinicians, and anyone else interested in women's sexual health. All proceeds are donated to the International Society for the Study of Women's Sexual Health.

 This book is not a panegyric of homosexuality. It is a scientific study led by Professor James Smalls who teaches art history in the prestigious University of Maryland, Baltimore. Abandoning all classical clichés and sociological approaches, the author highlights the sensibility particular to homosexuals. This book examines the process of creation and allows one to comprehend the contribution of homosexuality to the evolution of emotional perception. In a time when all barriers have been overcome, this analysis offers a new understanding of our civilisation's masterpieces.

 Anatomically correct: Bourgerie's monumental and unsurpassed treatise We owe a great debt to Jean Baptiste Marc Bourgerie (1797-1849) for his Atlas of Anatomy, which was not only a massive event in medical history, but also remains one of the most comprehensive and beautifully illustrated anatomical treatises ever published in any language. In 1830, having received his doctorate in medicine three years prior, Bourgerie began work on

his magnificent atlas in cooperation with illustrator Nicolas Henri Jacob (1782-1871), a student of the French painter Jacques Louis David. The first volumes were published the following year, but completion of the treatise required nearly two decades of dedication; Bourguery lived just long enough to finish his labor of love, but the last of the treatise's eight volumes was not published in its entirety until five years after his death. The four parts of Bourguery's treatise cover descriptive anatomy, surgical anatomy and techniques (exploring in detail nearly all the major operations that were performed during the first half of the 19th century), general anatomy and embryology, and microscopic anatomy. Jacob's spectacular hand-colored, life-size lithographs are remarkable for their clarity, color, and aesthetic appeal, reflecting a combination of direct laboratory observation and illustrative research; the images are to this day unsurpassed in anatomical illustration. Kundalini's power lies dormant in humans until it is awakened. The awakened Kundalini expresses the primal divine impulse and ultimately joins the individual with the divine. The development of the book parallels the development of the Kundalini within. Part One exposes the awakening and unfolding of the Kundalini; Part Two describes the piercing of the energy centers and the stages of ascent through the body; and Part Three examines Kundalini's relation to sexual expression. The book provides a deep understanding of Tantra and of the underlying purpose of Tantracism. The author carefully considers the Caryakrama practices of sexual expression as a means of awakening and controlling Kundalini. Silburn draws together passages from the Trika, Krama, and Kaula systems ranging through Abhinavagupta and Lalla and provides both translation and commentary for them. Chapters on the Chakras, the Nadis, and on mantras further elucidate the topic and lead to a forceful conclusion: Kundalini is the source of ultimate human knowledge and power.

A definitive and fascinating introduction to the life, ideas, and impact of the founder of Islam. Maxime Robinson's Muhammad has long been regarded as one of the touchstones of scholarship on the founder of Islam. Thirty years after first being published in English, it remains the definitive introduction to the Prophet's life. Drawing on wide-ranging scholarship and imaginative insight into the Prophet's personality, family, background, and wider society, Rodinson's Muhammad offers a vivid account of how he spread the word of Islam, created a sect and state, and defeated his enemies, establishing the first great Muslim military power -- a power which was soon to control territory stretching all the way from the Pyrenees to the borders of China. For anyone who wants to understand the historical roots of one of the world's great religions, Rodinson's Muhammad provides the ideal guide to a fascinating and timely subject. -

For the past 25 years, the AIDS pandemic has inflicted excruciating pain upon

humanity, having ravaged the lives of millions of people around the world. Over the past few years, however, a quiet global revolution has enabled millions infected by HIV to live healthy lives through the free antiretroviral treatment program initiated by the Global Fund to Fight AIDS, Tuberculosis and Malaria. In Access to Life, eight of the world's leading photojournalists, all members of Magnum Photos, follow 30 individuals in nine countries before, and four months after, they began the antiretroviral treatment, documenting the transformative effect on their bodies, their lives, and the lives of their families. Here are the faces, voices, and stories representing millions of people who would otherwise be dead if not for access to free life-saving drugs. But there are also the stories of those individuals for whom treatment came too late showing how the fight to bring access to AIDS treatment is still a difficult one.

Doctors Pellet, Cannoni and Pech have joined forces to write a masterly work on the subject of otoneurosurgery and tumors of the base of the skull. The anatomic illustrations, derived from their meticulous dissections, are of excellent quality and a credit to the famed tradition of French neuroanatomists of the past. It is evident that the operative techniques described by these surgeons indicate that they have spent a great deal of time in the dissecting-room and that they have

completely mastered the temporal bone. A perfect knowledge of the fundamental anatomy of the petrous bone is essential before embarking on the difficult surgical procedures in this region of the brain and base of the skull. Reading this work makes it abundantly clear that the results of this type of surgery are vastly improved when neurosurgeons and otologists combine their skills. Each of these specialists brings his unique experience and entire knowledge to the operation for the greater benefit of the patient. We wish to congratulate Doctors Pellet, Cannoni and Pech on the publication of this excellent work. March 1990 William F. House, MD William E. On May 1st, 1998 Professor P.W.Pestman retired from academic teaching. His contributions to the field of papyrology are well known: he has continually stressed the importance of Egyptian sources for the study of Greek and Roman Egypt, and the

importance of studying the Greek and Egyptian documentation together, in context. Indeed, he has been among the first to link the formerly separate Greek and Egyptian documentation, establishing modern papyrological practice. He has thus given an Egyptian face to Graeco-Roman society, to complement the Greek face that had previously dominated papyrology. The present volume contains twelve contributions by members and alumni of the Papyrologisch Instituut that illustrate the two faces of Graeco-Roman Egypt and show how they may be tied together.

Today's rapidly flowing global economy, hit by recession following the financial crisis of 2008/9, means the geographical economic perspective has never been more important. An Introduction to Economic Geography comprehensively guides you through the core issues and debates of this vibrant and exciting area, whilst also exploring the range of approaches and paradigms currently invigorating the wider discipline. Rigorous

and accessible, the authors demystify and enliven a crucial subject for geographical study. Underpinned by the themes of globalisation, uneven development and place, the text explores the diversity and vitality of contemporary economic geography. It balances coverage of 'traditional' areas such as regional development and labour markets with insight into new and evolving topics like neoliberalism, consumption, creativity and alternative economic practices. An Introduction to Economic Geography is an essential textbook for undergraduate students taking courses in Economic Geography, Globalisation Studies and more broadly in Human Geography. It will also be of key interest to anyone in Planning, Business and Management Studies and Economics.
