Lastly, the

volume presents Cloud and Cluster Computing, Data Fusion Techniques, Empirical Orthogonal Functions and Teleconnection, Internet of Things, Kernel-Based Modeling, Large Eddy Simulation, Pattern Recognition, Uncertainty-Based Resiliency Evaluation, and Volume-Based Inverse Mode. This is an interdisciplinary book, and the audience includes postgraduates and early-career researchers interested in: Computer Science, Mathematical Science, Applied Science, Earth and Geoscience, Geography, Civil Engineering, Engineering, Water Science, Atmospheric Science, Social Science, Environment Science, Natural Resources, Chemical Engineering. - Key insights from 24 contributors in the fields of data management research, climate change and resilience, insufficient data problem, etc. - Offers applied examples and case studies in each chapter, providing the reader with real world scenarios for comparison. - Defines both the designing of good learning algorithms, as well as the science of analyzing an algorithm's computational and statistical properties and performance guarantees.

<p>Freethinkers in Europe Elsevier This one-stop Mega Reference eBook brings together the essential professional reference content from leading international contributors in the automotive field. An expansion the Automotive Engineering print edition, this fully searchable electronic reference book of 2500 pages delivers content to meet all the main information</p>	<p>needs of engineers working in vehicle design and development. Material ranges from basic to advanced topics from engines and transmissions to vehicle dynamics and modelling. * A fully searchable Mega Reference Ebook, providing all the essential material needed by Automotive Engineers on a day-to-day basis. * Fundamentals, key techniques,</p>	<p>engineering best practice- and rules-of- thumb together in one quick- reference. * Over 2,500 pages of reference material, including over 1,500 pages not included in the print edition <u>Sustainable Intensification</u> PUQ Main description: This collection of recent papers in Laboratory Phonology approaches phonological theory from several different empirical</p>
---	--	--

directions. Psycholinguistic research into the perception and production of speech has produced results that challenge current conceptions about phonological structure. Field work studies provide fresh insights into the structure of phonological features, and the phonology-phonetics interface is investigated in phonetic research involving both

segments and prosody, while the role of underspecification is put to the test in automatic speech recognition. *Advances in Modeling Agricultural Systems* Oxford University Press Agriculture has experienced a dramatic change during the past decades. The change has been structural and technological. Structural changes can be seen in the size of current farms; not

long ago, agricultural production was organized around small farms, whereas nowadays the agricultural landscape is dominated by large farms. Large farms have better means of applying new technologies, and therefore technological advances have been a driving force in changing the farming structure. New technologies continue to emerge, and their mastery and use in requires that farmers

gather more information and make more complex technological choices. In particular, the advent of the Internet has opened vast opportunities for communication and business opportunities within the agricultural community. But at the same time, it has created another class of complex issues that need to be addressed sooner rather than later. Farmers and agricultural researchers

are faced with an overwhelming amount of information they need to analyze and synthesize to successfully manage all the facets of agricultural production. This daunting challenge requires new and complex approaches to farm management. A new type of agricultural management system requires active cooperation among multidisciplinary and multi-institutional teams and ref-

ing of existing and creation of new analytical theories with potential use in agriculture. Therefore, new management agricultural systems must combine the newest achievements in many scientific domains such as agronomy, economics, mathematics, and computer science, to name a few.

"Men and women of the time."
Journal général de l'imprimerie et de la librairie
 CRC Press
 In January of 1208, a papal legate was murdered on the banks of the Rhone in southern France. A furious Pope Innocent III accused heretics of the crime and called upon all Christians to exterminate heresy between the Garonne and Rhone rivers-- a vast region now known as Languedoc--in a great

crusade. This most holy war, the first in which Christians were promised salvation for killing other Christians, lasted twenty bloody years-- it was a long savage battle for the soul of Christendom. In *A Most Holy War*, historian Mark Pegg has produced a swift-moving, gripping narrative of this horrific crusade, drawing in part on thousands of testimonies collected by inquisitors in the years

1235 to 1245. These accounts of ordinary men and women, remembering what it was like to live through such brutal times, bring the story vividly to life. Pegg argues that generations of historians (and novelists) have misunderstood the crusade; they assumed it was a war against the Cathars, the most famous heretics of the Middle Ages. The Cathars, Pegg reveals, never existed. He further shows how a

millennial fervor about "cleansing" the world of heresy, coupled with a fear that Christendom was being eaten away from within by heretics who looked no different than other Christians, made the battles, sieges, and massacres of the crusade almost apocalyptic in their cruel intensity. In responding to this fear with a holy genocidal war, Innocent III fundamentally changed how

Western civilization dealt with individuals accused of corrupting society. This fundamental change, Pegg argues, led directly to the creation of the inquisition, the rise of an anti-Semitism dedicated to the violent elimination of Jews, and even the holy violence of the Reconquista in Spain and in the New World in the fifteenth century. All derive their divinely sanctioned slaughter from the

Albigensian Crusade. Haunting and immersive, A Most Holy War opens an important new perspective on a truly pivotal moment in world history, a first and distant foreshadowing of the genocide and holy violence in the modern world. [Handbook of Hydroinformatics](#) Oxford University Press Continued population growth, rapidly changing consumption patterns and the impacts of

climate change and environmental degradation are driving limited resources of food, energy, water and materials towards critical thresholds worldwide. These pressures are likely to be substantial across Africa, where countries will have to find innovative ways to boost crop and livestock production to avoid becoming more reliant on imports and food aid.

Sustainable agricultural intensification - producing more output from the same area of land while reducing the negative environmental impacts - represents a solution for millions of African farmers. This volume presents the lessons learned from 40 sustainable agricultural intensification programmes in 20 countries across Africa, commissioned as part of the UK Government's Foresight

project. Through detailed case studies, the authors of each chapter examine how to develop productive and sustainable agricultural systems and how to scale up these systems to reach many more millions of people in the future. Themes covered include crop improvements, agroforestry and soil conservation, conservation agriculture, integrated pest management,

horticulture, livestock and fodder crops, aquaculture, and novel policies and partnerships. Corrosion of Aluminium Academic Press Managing Wine Quality, Volume 2: Oenology and Wine Quality, Second Edition, brings together authoritative contributions from experts across the world's winemaking regions who cover yeasts, fermentation, enzymes, and stabilization, amongst other topics. A new

chapter covers, in detail, extraction technologies and wine quality. Other sections cover the management of wine sensory quality, with new chapters covering the management of fortified wines, of Botrytized wines, and of wines produced from dried grapes. In addition, an updated section on insect taints in wine has been widened to cover all insects. With a focus on

recent studies, advanced methods, and a look to future technologies, this fully updated edition is an essential reference for anyone involved in viticulture and oenology who wants to explore new methods, understand different approaches, and refine existing practices. - Reviews our current understanding of yeast and fermentation management, as well as the

<p>effects of aging on wine quality - Details alternatives to cork in bottle closing and the latest developments in the stabilization and clarification of wines - Includes new chapters covering extraction technologies for wine quality and on managing the quality of a wide range of wine types, including fortified and Botryzied wines - Provides extensively expanded</p>	<p>coverage of insect taints and their effects on wine quality Bulletin Mensuel des Récentes Publications Françaises Presses de l'Université Laval A listing of the scientific names of the bacteria. catholique de Louvain Walter de Gruyter Ecosystem and Territorial Resilience: A Geoprospective Approach provides a full review of the geoprospective approach and how it can be used in planning for and implementing environmental and territorial resilience measures. The geoprospective approach is a way to predict and assess for future risks, and is a comprehensive method for identifying and addressing potential change impacts. In addition to the main concepts and methods of this approach, the book presents applications and case studies for different spatio-temporal scales and problems related to the degradation of socio-ecosystems, as well as applying the geoprospective approach to environmental and urban planning. The book offers an interdisciplinary perspective, tying in concepts and techniques from geography, including spatial analysis methods, modelling, and GIS, to address issues of ecological impacts of climate change, urban risk and resilience, land use changes, coastal impacts, and sustainable development and potential of adaptability. This book is a unique and integral resource for

policy makers, environmental and territorial managers, scientists, engineers, consultants, and graduate students interested in anticipating future change in socio-ecosystems. - Introduces the geopropective approach to assess the impact of global changes on socio-ecosystems, and potential risk situations for ecosystems and society - Includes geographical techniques such as spatial

analysis methods, modeling, and GIS to address various climate change issues and to detect vulnerabilities vs adaptive capacities of spatial systems - Provides case studies as well as interviews with planners and policy makers regarding their views on territorial planning and expectations of the geopropective
Who's who
 Elsevier
 This volume brings together for

the first time case studies on secularists of the 19th and early 20th centuries in national and transnational perspectives including examples from all over Europe. Its focus is on freethinkers taken as secular avant-gardes and early promoters of secularity. The authors of this book deal with multiple historical, religious, social, and cultural backgrounds and, in these contexts, analyze

freethinkers' organizations, projects, networks, and contributions to forming a secular worldview, in particular, the promotion of concrete undertakings such as civil baptism or initiatives to leave church. Next to this secularist agenda, the contributions also take into account ambivalences and difficulties freethinkers were faced with, namely, the tensions between a national self-image and the transnational

direction the movement has taken; the regional base of many projects and their transregional horizon; freethinkers' cultural programs and their immanent political mission; and the dialogue with respectively the conceptual distinction from other secularist groups. Readers interested in the history of secularity will learn that it was a heterogeneous

s enterprise already in its beginnings. This set the course for later European and global developments. Laboratory Phonology 7 Elsevier The Neurobiology of the Gilles de la Tourette Syndrome and Chronic Tics, Volume Three reviews historical background and current nosology and guidelines. In addition, it includes an overview of pathophysiology, ranging from its genetic basis and changes

<p>in neurochemistry and electrophysiology to widespread neural circuits. Specific chapters cover Tourette syndrome from phenomenology and natural history to neurobiology, Update and Recent progress in the Neurobiology of Tourette Syndrome, Current guidelines and nosology of Tourette syndrome, Neuroimaging applications in Tourette's Syndrome,</p>	<p>Clinical and neurodevelopmental brain imaging of Tourette syndrome, Altered Structural Connectivity in Gilles de la Tourette Syndrome, and much more. The last 20?years have seen an exponential growing body of research dedicated to Gilles de la Tourette Syndrome in the understanding of the syndrome's complex genetics and underlying neurobiology. This</p>	<p>unprecedented surge in basic and clinical research has resulted in over 3,000 scientific publications. - Examines Gilles de la Tourette Syndrome at behavioral, cognitive, clinical, electrophysiological, molecular and genetic levels - Provides a comprehensive overview of the neurobiological aspects of Gilles de la Tourette Syndrome - Edited and authored by top</p>
--	--	--

<p>researchers and clinicians treating the Gilles de la Tourette Syndrome</p> <p>A Structural Study of Zola's Germinal Ed. Universidad de Cantabria</p> <p>Corrosion of Aluminium, Second Edition, highlights the practical and general aspects of the corrosion of aluminium alloys. Chapters help readers new to the topic understand the metallurgical, chemical and physical features of</p>	<p>aluminium alloys. Author Christian Vargel adopts a practitioner styled approach that is based on the expertise he has gained during a 40-year career in aluminium corrosion. The book assesses the corrosion resistance of aluminium, a key metric recognized as one of the main conditions for the development of many uses of aluminium in transport, construction, power transmission, and more. -</p>	<p>Features 600 bibliographic references, providing a comprehensive guide to over 100 years of related study - Includes numerous illustrations to enhance study - Presents practical applications across many industries - Provides an accessible reference for both beginners and experts</p> <p><i>Catalogue général des livres imprimés de la Bibliothèque nationale</i></p> <p>Woodhead</p>
---	--	---

<p>Publishing Est-ce que la religion nuit ou collabore au développement social ? L'action philanthropique s'inscrit-elle dans une continuité des initiatives de l'Etat-providence ou encore s'y oppose-t-elle ? Les études du développement, ainsi que des organisations internationales, ont depuis plusieurs décennies négligé de reconnaître la contribution des organisations religieuses au</p>	<p>développement. L'auteur s'engage à participer à cette réflexion en étudiant le rôle de la Fondation Dhammakaya, de la Santi Asoke et finalement de la communauté mondiale Dhammananda en Thaïlande. Il s'agit de comprendre la façon dont ces trois organisations bouddhiques parviennent à faire la promotion de leur expertise dans un environnement où l'orthodoxie</p>	<p>religieuse est dominée par un bouddhisme d'Etat. Parallèlement, le royaume est aux prises avec deux visions différentes du rôle que l'Etat dans la redistribution sociale, d'un côté une perspective universaliste et, de l'autre, une conception minimaliste, axée sur la charité. La solidarité sociale et la philanthropie deviennent ainsi un enjeu politique de taille au pays.</p>
--	---	---

<p>Subhasita, Gnomic and Didactic Literature Otto Harrassowitz Verlag En este libro se aborda el análisis del sistema caciquil dentro del ámbito geográfico de la que fuera provincia de Santander, actual comunidad regional de Cantabria, con el propósito de llegar a entender y explicar su naturaleza como los que fueron sus fundamentos sociales y políticos. <u>La</u></p>	<p><u>philanthropie religieuse en tant que nouveau capital démocratique</u> Walter de Gruyter Sensory evaluation is applied in very diverse and sometimes unexpected sectors. Nonfood Sensory Practices aims to show how sensory professionals from sectors other than food have embraced sensory evaluation methods for product development and communicatio</p>	<p>n of their products' sensory properties. This book is thus intended as a first assessment of what is happening in nonfood sectors. It will open perspectives to those sensory professionals who wish to apply and adapt their expertise in food sensory science to other types of products, as well as to those working in nonfood sectors but with lesser background in sensory</p>
---	---	---

evaluation. Many nonfood products are intrinsically complex. They can be used in diverse ways, often in strong interaction with context and – unlike food – over several hours, days or months. This book shows how sensory professionals have adapted to these specificities, not to mention specific needs in terms of panel management and different ways to deal with consumers, users, customers or

even sometimes with patients. First chapters present general methodological principles that will allow readers to fully apprehend the use of sensory practices. Then, contributions from many professionals in nonfood sectors will help to realize and promote the potential added value of sensory evaluation to their own field of application. - Presents methodological specificities and solutions

for the sensory evaluation of non-food products - Includes case studies that help readers understand how to adapt food-centric sensory methods developed for non-food applications - Triggers new ideas and further useful developments for the sensory evaluation of food products and the study of food-related consumer behaviors

<p>Publishing Cet ouvrage est une réédition numérique d'un livre paru au XXe siècle, désormais indisponible dans son format d'origine. <i>Ecosystem and Territorial Resilience</i> Walter de Gruyter GmbH & Co KG This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATI ON SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of</p>	<p>linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicativ e action and interaction. For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research</p>	<p>undertaken from a variety of theoretical standpoints, while in the more recent branches of communicatio n science the handbooks will give researchers both an verview and orientation. To attain these objectives, the series will aim for a standard comparable to that of the leading handbooks in other disciplines, and to this end will strive for comprehensiv eness, theoretical explicitness,</p>
---	---	--

reliable documentation of data and findings, and up-to-date methodology. The editors, both of the series and of the individual volumes, and the individual contributors, are committed to this aim. The languages of publication are English, German, and French. The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science

covered by each of the various handbooks; however no inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended, and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set timetable for the publication of

the whole series. Each volume will be a self-contained work, complete in itself. The order in which the handbooks are published does not imply any rank ordering, but is determined by the way in which the series is organized; the editor of the whole series enlist a competent editor for each individual volume. Once the principal editor for a volume has been found, he or she then has a

completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervene where questions of delineation between individual volumes are concerned. It is felt that this (modus operandi) is best suited to achieving the objectives of the series, namely to

give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume. **Revue du clergé français** Routledge For almost forty years the study of the Iron Age in Britain has been dominated by Professor Sir Barry Cunliffe. Between the 1960s and 1980s he led a series of large-scale excavations at famous sites including the

Roman baths at Bath, Fishbourne Roman palace, and Danebury hillfort which revolutionized our understanding of Iron Age society, and the interaction between this world of 'barbarians' and the classical civilizations of the Mediterranean . His standard text on Iron Age Communities in Britain is in its fourth edition, and he has published groundbreaking volumes of

<p>synthesis on The Ancient Celts (OUP, 1997) and on the peoples of the Atlantic coast, Facing the Ocean (OUP, 2001). This volume brings together papers from more than thirty of</p>	<p>Professor Cunliffe's colleagues and students to mark his retirement from the Chair of European Archaeology at the University of Oxford, a post which he has held since 1972. The</p>	<p>breadth of the contributions, extending over 800 years and ranging from the Atlantic fringes to the eastern Mediterranean , is testimony to Barry Cunliffe's own extraordinarily wide interests.</p>
