PETTY MAYA

The Italian Cotton Industry in the Later Middle Ages, 1100-1600 Stichting Promotie Archeologie Since 1968 several thousand leather artefacts have been recovered in the city of Dordrecht, ranging in date from the 12th century through to the 17th century. At that time, Olaf Goubitz was employed at the Rijksdienst voor Oudheidkundig Bodemonderzoek (ROB) and was able to devote his time to the leather and thus the organic conservation lab was established. Over the years the quantity and importance of the Dordrecht archaeological leather finds made it obvious they certainly merited publication. In 2002 the leather footwear from Dordrecht and other sites was presented in *Stepping Through Time*. A chapter on Roman footwear by Carol van Driel-Murray and the Prehistoric footwear by Willy Groenman-van Waateringe completed the chronological range. The archaeological leather purses, bags and other small containers from Dordrecht and other sites appeared in *Purses in Pieces* in 2007. The third

book was to cover the knife sheaths and sword scabbards from Dordrecht, numbering more than 300 to date. Goubitz had already begun to draw the decorated knife sheaths from Dordrecht that passed through his hands. The Medieval archaeological leather sheath and scabbard finds from the city of Dordrecht form the core collection for this volume, the third in the trilogy after *Stepping Through Time* and *Purses in Pieces*. It was finished by Marquita Volken. As with the previous volumes, a wider picture is presented, thus incorporating chapters on Prehistoric, Roman, and modern period sheaths and scabbards from other sites in the Netherlands and Europe. Sheaths and scabbards are covers for blades, so here scissors, agricultural tools and specialized knives are included along with knives, daggers, and swords. The aim, apart from presenting the Dordrecht collection, is also to provide a framework for research: chronology, typology, decoration styles, plus accessory items like suspension methods, cover-guards and handle grips in leather. A useful

research technique for understanding a leather archaeological object is to reconstruct it. A select number of sheaths and scabbards have been reconstructed, providing insights on construction, decoration, and functional aspects. Few prehistoric knife sheaths are known in archaeology due to the rare survival of organic materials. Frozen or very dry, stable environments also preserve organic material but so far the only prehistoric sheath to have been found in ice is the grass sheath from the Iceman. Here is a selection of the sheaths and scabbards of which you can find a reconstruction in chapter 9 of *Covering the Blade*: - An Early Bronze Age ceremonial axe and leather case come from Ireland. It was discovered in a peat bog at Brockagh, Co. Kildare. - From the Dutch site at Kessel on the Rhine-Meuse Delta the finds of La Tène period swords and sheaths are the remains of a battle between the Batavians and Roman forces. Of the 22 swords recovered four were still in their scabbards. - The Merovingian finds from tomb 11 at the Cathedral of Saint-Denis FR included fragments of a small

edge-seamed knife sheath with an attached case for the wood pick. - A decorated leather scabbard cover from Groningen NL, is the source for the hypothetical reconstruction of a seax scabbard. - A thirteenth century sword and scabbard have been preserved as the relics of Saint Maurice, a third century military leader martyred at Agaunum (present day Saint-Maurice, Switzerland). The scabbard has a wood core made of two laths shaped to the blade. - The upper section of a narrow fourteenth century hunting sword scabbard cover from Dordrecht is the model for this reconstruction. The scabbard has a peaked mouth, a reinforcement collar and a centre back closed seam. - The fourteenth century decorated scabbard from Leiden found with 137 other sword scabbards at the Marktenroute site, Leiden, a fourteenth century decorated leather scabbard cover is one of 28 examples decorated by creasing. - A fourteenth century leather scabbard cover from the Statenplein site, Dordrecht NL, is source for this reconstruction. -

The nearly complete leather scabbard cover from the Statenplein site, Dordrecht NL, and the lower section of the same type of scabbard from the Tolbrugstraat site, Dordrecht NL, are the sources for the reconstruction of the falchion scabbard. - A fourteenth century decorated leather dagger scabbard cover from the Statenplein site, Dordrecht NL, is the source for this reconstruction. - From the Wood Quay site in Dublin comes an almost complete winged small knife sheath dated from AD 1180-1250. It is decorated with creased motifs front and back. - The edge-seamed Schleswig knife sheath was fitted with a metal half-chape (absent) and a riveted handle section consisting of five straps through pairs of slits and a fringed re-enforcement band. - Among the many fourteenth century sheaths from the Statenplein site is one decorated with a two headed beast. The decoration is made with creased lines and the stippled background made with a fragment of a fine-toothed comb. - A fourteenth century sheath for a large principal knife

and a full set of byknives is often called a 'hunting set'. The hunting set sheath found at the Statenplein site at Dordrecht NL had a principal knife, a smaller knife, a honing steel, and a pair of bow spring scissors. - A fifteenth century fragmented sheath decorated with the apple tree motif from the Tolbrugstraat site at Dordrecht NL is the inspiration for a sheath for a knife and byknife honing steel.

Bags (Victoria and Albert Museum) Bloomsbury Publishing USA

There was nothing chaste or sublimated about many aspects of medieval love which moved through the various stages of looking, talking, touching, kissing, and sexual possession. All the elements of medieval romance are revealed in this magnificently illustrated volume.

All Things Medieval [2 volumes] Nadel Und Faden Press LLC

This insightful survey of the "things" of medieval Europe allows modern readers to understand what they looked like, what they were made of, how they were created, and how they were used. All Things Medieval: An Encyclopedia of the Medieval World covers the

widest definition of "medieval Europe" possible, not by covering history in the traditional, textbook manner of listing wars, leaders, and significant historic events, but by presenting detailed alphabetical entries that describe the artifacts of medieval Europe. By examining the hidden material culture and by presenting information about topics that few books cover—pottery, locks and keys, shoes, weaving looms, barrels, toys, pets, ink, kitchen utensils, and much more—readers get invaluable insights into the nature of life during that time period and area. The heartland European regions such as England, France, Italy, and Germany are covered extensively, and information regarding the objects of regions such as Byzantium, Muslim Spain, and Scandinavia are also included. For each topic of material culture, the entry considers the full scope of the medieval period—roughly 500–1450—to give the reader a historical perspective of related traditions or inventions and describes the craftsmen and tools that produced it.

The Lost Art of the Anglo-

Saxon World Stichting Promotie Archeologie Illuminated with illustrations, an exploration of medieval manuscript production that offers insight into both the early history of the book and life in the Middle Ages. This book takes the reader on an immersive journey through medieval manuscript production in the Latin Christian world. Each chapter opens with a lively vignette by a medieval narrator—including a parchment maker, scribe, and illuminator—introducing various aspects of manuscript production. Sara J. Charles poses the question "What actually is a scriptorium?" and explores the development of the medieval scriptorium from its early Christian beginnings through to its eventual decline and the growth of the printing press. With the written word at the very heart of the Christian monastic movement, we see the immense amount of labor, planning, and networks needed to produce each manuscript. By tapping into these processes and procedures, *The Medieval Scriptorium* helps us to experience medieval life

through the lens of a manuscript maker.

Fabrics, Fancy Goods and Notions A&C Black Set in the fourteenth century, the classic story of one boy's personal heroism when he loses the use of his legs.

Everyday Objects A&C Black Material culture research has become an increasingly important aspect of the study of medieval and early modern societies, yet its study often remains uncoordinated and confined to narrow subject specific boundaries. As such, scholars will welcome this volume which provides an overview of various methodological strands currently developing across a range of disciplines. Taking a refreshingly broad approach, the collection explores 'everyday objects' as a way of questioning the relationship between material culture and historical themes. In so doing it highlights the way in which the study of objects can provide unexpected access to the 'lived experience' of individuals who may otherwise have left little impact in the written records.

DigiCat Publishing presents to you this special edition of "Silver Slippers" by Temple Bailey. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

The Door in the Wall

Todtri Book Pub

These 4 crochet and 2 knit designs were created with Lion Brand Vanna's Choice. Crochet designs include Ripple Afghan, Bebob Cardi for girls, Granny Sampler Afghan, and Squares Within Squares Afghan. Knit designs include Easy Lace Shrug and Bright Blocks Blankie. Vanna White, America's favorite crocheter, has been Lion Brand's spokesperson for

more than 14 years.

Vanna's Choice, a silky-soft premium basic, is the easy-care yarn she loves enough to call her own.

With a supple hand and stunning stitch quality, it has the versatility to help you create the designs of your dreams. The shades in this palette coordinate perfectly, so you can spend less time second-guessing your color choices and more time getting great results.

Toxophilus. 1545

Leisure Arts

The chest was found in Mastrmyr on the the island of Gotland, Sweden in 1936. More than 200 objects were found in and around it. Most are tools that were used by blacksmiths and carpenters, many of them amazingly modern in appearance.

Walter de Gruyter
Weave*Knit*Wear dispels the myth that you need expensive equipment, a large space, or special threads to weave. The directions for all 30

projects, from the narrowest boa to a 55" wide serape, are tailored to the most basic equipment--the 20" wide rigid-heddle loom--making it affordable, portable, and intimate. Judith Shangold's designs turn what might seem to be the limitations of this loom into a strength. She pairs simple shapes that reflect the ease of current fashion, and require little cutting and sewing, with the long tradition of ethnic garments created from narrow strips of handwoven fabric. The book offers guidance on the basics of weaving and the minimal hand sewing and knitting techniques used, as well as primers on choosing yarns, designing warps, planning garments, finishing the fabric, making Weave*Knit*Wear a resource that aids in planning and constructing one-of-a-kind woven or woven-and-knit projects. Embroiderers Ashgate Publishing, Ltd.

This book traces the dynamic advances in textile technology and changes in the structure of demand that accompanied the rise, in the late Middle Ages, of an Italian industry geared to mass production of cotton fabrics. The Italian manufacture, based on borrowed techniques and imitations of Islamic cloth, was the earliest large-scale cotton industry in western Europe. It thus marked a pivotal stage in the transmission of the knowledge and use of this textile fibre from the Mediterranean basin to northern Europe. The success of the Italians in creating new markets for a wide variety of products that included pure cotton, as well as mixed fabrics combining cotton with linen, hemp, wool and silk, permanently altered the patterns of taste and consumption in European society. Cotton, in various stages of proceeding, was at the heart of a complex network of communications that linked the north Italian towns to the source of raw materials and to international markets for finished goods. In the developing urban economy of northern Italy, cotton played a role comparable in magnitude

to that of wool and shared with the latter certain basic features of early capitalistic organization.

The Medieval Scriptorium

Oxbow Books

After twenty-five years of 'sex, drugs, bad behaviour and haute cuisine', chef and novelist Anthony Bourdain has decided to tell all. From his first oyster in the Gironde to his lowly position as a dishwasher in a honky-tonk fish restaurant in Provincetown; from the kitchen of the Rainbow Room atop the Rockefeller Center to drug dealers in the East Village, from Tokyo to Paris and back to New York again, Bourdain's tales of the kitchen are as passionate as they are unpredictable, as shocking as they are funny.

Liber quotidianus contrarotuloribus garderobae

Page Street Publishing

Examines the work of medieval embroiderers, including vestments, altar cloths, clothes, and wall-hangings, and discusses their techniques, how they acquired their skills, and embroiderers' guilds

The Macclesfield

Psalter Cambridge University Press

HOLSTERS have played, and are still playing, a very important part in the

history of man. And, since the making and manufacture of the first hand guns, methods for concealing, easier handling and carrying of these weapons have been devised. Trial and error being the surest way of improvement, holster making has now advanced to fill almost every need and requirement of the pistol user. Today, with the hundreds of Makes, Models, and barrel lengths of hand guns, it would be virtually impossible to reproduce holster patterns for each and every one into book form. The Holster Patterns presented in this book are a cross-section of a few of the most popular Makes and Models of the guns in use today; with alternate designs and added barrel lengths as space permits. Most of the Carving Designs presented can be altered for shorter, longer, or odd barrel lengths by adding or omitting a leaf, scroll, etc. The designs can also be used on similar holster patterns for other guns by "stretching"

or "squeezing" the flowers, leaves, etc., to fit the confines of the border lines. With a little Imagination and Ingenuity, the Carving Designs in this book can be used on hundreds of holster patterns. Remember... the patterns shown will also fit many other similar makes and models of guns ... too numerous to mention. The purpose of this book is to assist and instruct the craftsman in various methods of Holster Construction and Holster Pattern Making. Each phase is shown with clearly defined step-by-step photos and drawings. It is hoped that this book will aid the Self Taught Student, Instructor, and Professional Craftsman alike to further their knowledge of "How To Make Holsters" for Profit, Personal Satisfaction and Fun! A "special" thanks to my wife, Terry, who has devoted countless hours and painstaking effort to produce all of the photographs appearing in this book. Many thanks to Ralph Tiner . . . Sporting

Goods Center, Hemet, Calif. ... for his willing cooperation in supplying guns and information. Thanks to Lee Kelly, U. S. Forestry Service, and many other friends who have given unselfishly of their time and assistance. To the Leathercraftsman: Thanks for your patience in awaiting the first publication of "How To Make Holsters" . . . Many Happy Hours! Sincerely, Al Stohlman
