WILLIS ELLISON

Platform Ecosystems Springer Science & Business Media

"A major contribution to the field..." ."
 Gordon B. Davis, Honeywell Professor of Management Information Systems, Carlson School of Management, University of Minnesota, USA " "This book is required reading for anyone who wants to understand how and why computers influence organization structure. It established a conceptual foundation for the field, and examines the particular characteristics of the tools computer systems provide and what organizational impacts they can be expected to have. The conclusions are sometimes counter-intuitive, but always convincingly argued." Lee L. Gremillion, Partner, PricewaterhouseCoopers, USA "This is a superb source for people seeking to learn about organizational structure. Groth gives remarkable reasoning and interesting examples throughout the book. An exciting contribution" Kamar Singh, Project

Manager, GE Aircraft Engines, Ohio, USA
 Lars Groth addresses a subject of key importance and takes a fresh and innovative look at the ways to build and develop organizations with the assistance of information technology. Five major examples are used to point out the road ahead for those aiming to improve existing organizations with the help of new technology, as well as explaining some significant properties inherent in organizations and information technology. For the first time, the interplay between organization structure and information technology is thoroughly analysed in the context of established organization theory. Through examination of existing models and taking into account the new possibilities offered by IT, this book will enable practising managers and consultants to look at their organizations and decide where the greatest, and least, opportunities lie. The book will also be highly relevant to MBA, MIS and Executive courses concerned with the relationship between organizations and IT.

Transformation Legare Street Press
Platform Ecosystems is a hands-on guide that offers a complete roadmap for designing and orchestrating vibrant software platform ecosystems. Unlike software products that are managed, the evolution of ecosystems and their myriad participants must be orchestrated through a thoughtful alignment of architecture and governance. Whether you are an IT professional or a general manager, you will benefit from this book because platform strategy here lies at the intersection of software architecture and business strategy. It offers actionable tools to develop your own platform strategy, backed by original research, tangible metrics, rich data, and cases. You will learn how architectural choices create organically-evolvable, vibrant ecosystems. You will also learn to apply state-of-the-art research in software engineering, strategy, and evolutionary biology to leverage ecosystem dynamics unique to platforms. Read this book to learn how to: Evolve software products and services into vibrant platform ecosystems Orchestrate platform architecture and governance to sustain competitive advantage Govern platform evolution using a powerful 3-dimensional framework If you're ready to transform platform strategy from newspaper gossip and business school theory to real-world competitive advantage, start right here! Understand how architecture and strategy are inseparably intertwined in platform ecosystems Architect future-proof platforms and apps and amplify these choices through governance Evolve platforms, apps, and entire ecosystems into vibrant successes and spot platform opportunities in almost any—not just IT—industry

Work-Life Balance in Europe Springer

Examining the debate on quality of jobs in Europe, this book focuses on the work-life balance—a central element of the EU agenda. It addresses tensions between work and private life, examining job quality, job security, working conditions and time-use patterns of individuals and households as well as institutional contexts.

Repräsentative Umfrage Springer
This book explores models and concepts of trust in a digitized world. Trust is a core concept that comes into play in multiple social and economic relations of our modern life. The book provides insights into the current state of research while presenting the viewpoints of a variety of disciplines such as communication studies, information systems, educational and organizational psychology, sports psychology and economics. Focusing on an investigation of how the Internet is changing the relationship between trust and communication, and the impact this change has on trust research, this volume facilitates a greater understanding of these topics, thus enabling their employment in social relations.

Trust and Communication in a Digitized World Oldenbourg Verlag

In managerial literature the challenges of ramping-up, growing and enhancing a (Finance) Shared Services Organization are regularly neglected. Therefore, the compilation will address two objectives: First, based on a generic phase model of an SSO's development, frequently arising questions related to the management of SSOs shall be systematically discussed and practicable solutions derived. Secondly, a picture of the future of SSOs shall be elaborated, resulting in new future management implications.

 Strategies and priorities for the public sector in Europe The public sector in our society has over the past two decades undergone substantial changes, as has the academic field studying Public Administration (PA). In the next twenty years major shifts are further expected to occur in the way futures are anticipated and different cultures are integrated. Practice will be handled in a relevant way, and more disciplines will be engaging in the field of Public Administration. The prominent scholars contributing to this book put forward research strategies and focus on priorities in the field of Public Administration. The volume will also give guidance on how to redesign teaching programmes in the field. This book will provide useful insights to compare and contrast European PA with PA in Europe, and with developments in other parts of the world. Contributors: Geert Bouckaert (KU Leuven), Werner Jann (University of Potsdam), Jana Bertels (University of Potsdam), Paul Joyce (University of Birmingham), Meelis Kitsing (Estonian Business School, Tallinn), Thurid Hustedt (Hertie School of Governance, Berlin), Tiina Randma-Liiv (Tallinn University of Technology), Martin Burgi (Ludwig Maximilians University of Munich), Philippe Bezès (Science Po Paris; CNRS), Salvador Parrado (Spanish Distance Learning University (UNED), Madrid), Mark Bovens (Utrecht University; WRR), Roel Jennissen (WRR), Godfried Engbersen (Erasmus University Rotterdam), Meike Bokhorst (WRR), Bogdana Neamtu (Babes Bolyai University, Cluj-Napoca), Christopher Pollitt (KU Leuven), Edoardo Ongaro

Future Organizational Design Leuven University Press

Das Buch bietet eine Einführung in die Techniken und Vorgehensweisen der Umfrageforschung - einschließlich grundlegender statistischer Auswertungsverfahren. Es setzt keine besonderen Vorkenntnisse voraus. Großer Wert wurde auf eine klare und einfache Ausdrucksweise gelegt (ohne Abstriche beim Inhalt). Die Kapitel zu Konfidenzintervallen für Mittelwerte und zum Chi Quadrat-Test sind so angelegt, dass an ihrem Beispiel die allgemeine Argumentation bei der Berechnung von Konfidenzintervallen und bei Signifikanztests verständlich werden sollte. Das Buch wendet sich an alle potentiellen Konsumenten und auch Produzenten von Umfrageergebnissen, also beispielsweise Studierende der Politologie, Soziologie, Pädagogik, Psychologie usw., an Journalisten, Kommentatoren sowie an alle

Auftraggeber von Umfragen, die sich in der Planungsphase ihres Projekts befinden.
