Does Writing Have a Future? Neerlandia, Alta. : Inheritance Publications

An American truth seeker recounts his life-changing friendship with the spiritual leader Sri Sri Ravi Shankar in this intimate memoir. Michael Fischman is the president of His Holiness Sri Sri Ravi Shankar's Art of Living Foundation in the United States. In this intimate memoir, Fischman recounts his startling spiritual journey from childhood in New York "among the tribe of people known as the Jewish Middle Class" to befriending and working with the humanitarian and spiritual leader who changed his life. His story is a compelling narrative that blends remarkable experiences with an inner struggle and search for meaning. "In writing this story, different eras and their flavors came to life again—the world of Orthodox Jews I grew up in; twenty years of teaching meditation and breathing to people around the world; the traumas and triumphs of self-discovery in the Caribbean and Jerusalem; the spiritual traditions of India that became so meaningful to me; and the remarkable atmosphere around the enlightened master I fell in love with" (from the prologue). "Michael Fischman's journey reveals how fears and negative emotions can be transformed into love, compassion, and higher consciousness when a student has an authentic relationship with a wise teacher." —Deepak Chopra

Policy makers and business practitioners are eager to gain access to reliable information on the state of the economy for timely decision making. More so now than ever. Traditional economic indicators have been criticized for delayed reporting, out-of-date methodology, and neglecting some aspects of the economy. Recent advances in economic theory, econometrics, and information technology have fueled research in building broader, more accurate, and higher-frequency economic indicators. This volume contains contributions from a group of prominent economists who address alternative economic indicators, including indicators in the financial market, indicators for business cycles, and indicators of economic uncertainty.

The Law of Causality and its Limits was the principal philosophical work of the physicist turned philosopher, Philipp Frank. Born in Vienna on March 20, 1884, Frank died in Cambridge, Massachusetts on July 21, 1966. He received his doctorate in 1907 at the University of Vienna in theoretical physics, having studied under Ludwig Boltzmann; his subsequent research in physics and mathematics was represented by more than 60

scientific papers. Moreover his great success as teacher and expositor was recognized throughout the scientific world with publication of his collaborative *Die Differentialgleichungen der Mechanik und Physik*, with Richard von Mises, in 1925-27. Frank was responsible for the second volume, on physics, and especially noted for his authoritative article on classical Hamiltonian mechanics and optics. Among his earliest papers were those, beginning in 1908, devoted to special relativity, which together with general relativity and physical cosmology occupied him throughout his life. Already in 1907, Frank published his seminal paper 'Kausalgesetz und Erfahrung' ('Experience and the Law of Causality'), much later collected with a splendid selection of his essays on philosophy of science, in English (1941c and 1949g, in our Bibliography). Joining the first 'Vienna Circle' in the first decade of the 20th century, with Hans Hahn, mathematician, and Otto Neurath, sociologist and economist, and deeply influenced by studies of Ernst Mach's critical conceptual histories of science and by the striking challenge of Poincare and Duhem, Frank continued his epistemological investigations.
