Loss is a part of every life, and grief related to loss is inescapable. It can result in distress that impacts work, learning, rehabilitation, spiritual beliefs, social relationships, health, mental health, and well-being. Helping professionals who encounter grief reactions in multiple settings are often not trained to identify and respond to the many complex grief-related problems of clients. Without the opportunity to learn how to assess and address grief, many may lack confidence in acknowledging loss and providing effective support. Although grieving is an extremely painful part of life, integration and adjustment are possible, and meaning can be made from loss. Readers will find many examples from caring and resilient students, interdisciplinary professionals, teachers, clients, and family members who have learned to make meaning from loss. The content of the third edition has been significantly influenced by the COVID-19 pandemic, the opioid addiction crisis, and increased awareness of racial trauma and injustice. The book provides a foundation for understanding, assessing, and responding effectively to grief and loss. The content is designed for students and professionals who find themselves working in proximity to loss, trauma, and grief in various capacities—educator, advocate, case manager, counselor, mental health and health care provider, and more. The work is vitally important, and the rewards for helping others cope with grief and loss are substantial.

It is no secret that problems in the construction industry can quickly escalate into full-fledged conflicts; adversarial positions taken by the various parties involved in a project routinely lead to disrupted schedules and costly litigation. It doesn't have to be that way. Project Partnering for the Design and Construction Industry provides powerful tools for improving

working relationships among contractors, designers, clients, and suppliers. Speaking directly to the construction professional, author Ralph J. Stephenson demonstrates numerous ways to avoid conflict and ensure successful, on-time project deliveries by promoting teamwork, establishing noncontract ground rules for ethical and responsible behavior, and employing a variety of conflict-resolution techniques. This thoroughly practical handbook describes all the steps, procedures, and guidelines you need to make project partnering work for you. You'll discover how to identify possible sources of conflict before the work begins and learn to plan and write a project partnering charter. You'll develop the ability to identify commonly encountered problem-types and avoid miscommunications and disputes that may arise from incompatible personalities and management styles. Using real-world case studies, examples, and his own personal observations, the author examines construction projects of all sizes and types, from inception and design through completion and beyond. He offers a historical overview of the construction industry, comments on its nature as a business, analyzes its various components, and offers helpful tips on management methods for specific projects and organizational structures. This comprehensive and enthusiastic book demonstrates how effective project partnering fosters competent, high-quality work throughout the entire life cycle of a project. It also enables construction professionals to make each project more profitable and less stressful, while finding renewed job satisfaction in a revitalized working environment. How to manage construction projects on time, within budget-- and without major conflicts . . . To many contractors, architects, design engineers, and suppliers, a conflict-free construction project may seem like an impossible dream. Not so. Project Partnering for the Design and Construction Industry provides step-by-step instructions on how to conduct a high-quality, on-time, profitable construction project, while avoiding strife, adversarial behavior, or debilitating legal action. Written in plain English and spiced with humor, this enormously useful guide: * Examines all practical methods and procedures needed to create successful partnering systems for a wide range of projects * Shows how project partnering dispute resolution techniques can defuse problems and disagreements quickly and inexpensively before they get out of hand * Describes a variety of preventative measures to help contain liability and reduce time spent on

nonconstruction activities * Helps establish productive relationships among all participants in a construction project, including designers, contractors, clients, and suppliers * Provides numerous case studies where project partnering has been applied successfully, as well as real-world examples, charts, illustrations, and actual partnering charters * Offers alternative dispute resolution techniques for situations where project partnering is inappropriate * Discusses background, history, and the general organizational structure of the construction industry For contractors, engineers, architects, subcontractors, suppliers and owners, and anyone involved in the decision-making process on construction projects, this book provides the key to undertaking projects with confidence and building a solid reputation in the marketplace.

Using Focus Groups to Listen, Learn, and Lead in Higher Education presents an easy-to-use 6-step guide to help leaders in higher education listen to and learn from their stakeholders in order to enhance decision making. The big questions facing institutions today--especially those surrounding access, affordability, and accountability--require more than dashboards. Metrics and quantitative data alone do not offer lasting solutions and improvements. Using qualitative methods to listen to the voices of those involved, especially students and staff, is critical. Focus groups constitute the most appropriate, rigorous, and relevant qualitative research tool for this purpose, and one that is cost-effective and builds community when conducted using the

ODU Method described in this book. Using Focus Groups is a single, comprehensive, and practical resource that describes why, when, and how to use focus groups. The authors provide detailed guidance for using focus groups, from developing the research questions with stakeholders, through training and recruiting moderators, and identifying and recruiting participants, to the logistics of conducting focus groups, and ultimately analyzing data and developing final reports. Conversational vignettes illustrate the discussions that regularly occur in each step and help the reader better understand the process. Fifteen appendices provide templates and examples of every part of the process. Written particularly for institutional research and assessment staff and upper-level administrators, this book will also appeal to deans, department and program chairs and directors, faculty leaders, and administrative unit directors, including those in auxiliary and student services, alumni associations, and university foundations. It also serves as an excellent resource for higher education research methods courses. The authors are uniquely positioned to guide readers in this process. The team developed and refined this technique over two decades at Old Dominion University. They have conducted over 100 focus groups with campus, nonprofit, local, and international community organizations to assist them in assessing student learning, transition, and preparedness for the workforce, as well as evaluating organizations work and planning future projects.
