In this book, leading experts employ an evidence-based approach to provide clear practical guidance on the important question of when and how to facilitate return to play after some of the most common injuries encountered in football. Detailed attention is paid to biomechanics, the female athlete, risk factors, injury prevention, current strategies and criteria for safe return to play, and future developments. Specific topics discussed in depth include concussion, anterior cruciate ligament and other knee injuries, back pathology, rotator cuff tears, shoulder instability, hip arthroscopy, and foot and ankle injuries. The chapter authors include renowned clinicians and scientists from across the world who work in the field of orthopaedics and sports medicine. Furthermore, experiences from team physicians involved in the Olympics, National Football League (NFL), Union of European Football Associations (UEFA), and Fédération Internationale de Football Association (FIFA) are shared with the reader. All who are involved in the care

of injured footballers will find this book, published in cooperation with ESSKA, to be an invaluable, comprehensive, and up-to-date reference that casts light on a range of controversial issues.

He's the bad boy quarterback, one scandal away from being traded. She's the squeaky-clean pop star with a morality clause hanging around her neck. And they can't keep their hands off each other. Cassian Ellis fell in love with Gigi Cavanaugh when he was a kid. But he couldn't have her, because her dad--his mentor — promised to take him all the way to the pros. The price: stay away from his daughter. But Gigi was embedded in his soul — there was no distancing himself from her. And, senior year in high school, in a moment of desperation when he couldn't take all the want and love and lust, he ended things in the worst way possible. Now, nine years later, he's forced to do charity work to clean up his party boy image. And guess who's working right alongside him? Gigi can't believe her bad luck. She's on the same charity tour as Cassian Ellis. And, with the press recording their every move, she has to pretend to like the man who tore out her heart and stomped all over it. But Cassian's determined to win her back. Only, someone's leaking photographs, and headlines about the bad boy quarterback corrupting the squeaky-clean pop star could sink both their dreams. Can their love overcome all the world has put between them?

Experiencing God at Home takes a fresh path back into the rich roots of Henry Blackaby's world-renowned Experiencing God writings to connect what happens in our homes to what happens in our churches. Here, his sons Tom and Richard Blackaby first establish the biblical case for the idea of experiencing God at home, illuminating how the clear foundation for God's work in nations and churches around the world is his work in families. Indeed, healthy families lead to healthy churches, and the Blackabys illustrate that through real-life stories of families that have found ways to experience God in marriage, in choosing life's direction, in rescuing broken relationships, in forgiveness, in the salvation of loved ones, etc. Lessons from the Bible support these moving accounts, and the book concludes with resources that will guide individuals families as well as entire churches toward practically experiencing God at home.

We are proudly presenting the proceedings of the 2nd International Conference on Social Sciences 2019 (ICSS 2019). It has focus on the relation of governance and sustainable development. The issue of governance, politics, policy and sustainable development is important today. Not only globally, but also Indonesia nationally to the local level. There are several important issues relating to this, both institutionally and the relationships between individuals and groups in supporting the agenda of sustainable development. More than 100 manuscripts were presented at this conference with more than 50 of them selected to be published in proceedings. We hope by this conference, discussions on the importance of sustainable development will increasingly become an important concern together. Brings better response from the government and social relations for development.

Football is probably the most widespread sport in the world. Like many other sports football has undergone major changes. It has increased in intensity, speed, and other factors contributing to increased risks of traumatic injury. Footballers, trainers, and the sport's medical staff are asking for greater information on the traumatic lesions associated with football. The primary role of those concerned with the health of footballers is to enforce preventive measures to reduce the risks of trauma.

The focus of Sports Medicine and Neuropsychology is the question of what role the neuropsychologist should have in the diagnosis, treatment, and management of sports-related concussions. The goal of this special issue is to examine the most current issues facing this growing and dynamic field of neuropsychology. The first article is dedicated to reviewing current issues in the neuropsychological assessment of concussions in sports-related events. The next paper examines data on over six million practice-and-game-exposures among athletes participating in the NCAA's Injury Surveillance System. Two contributions examine the empirical role that neuropsychologists can have in the area of concussion research. The final two papers review the advantages and limitations on computer-based assessment of sports-related concussions and discuss neuropsychology's role in return-to-play decisions following them.
