In February 2014 an international seminar on musical dynamics and creativity in Africa was held at Tor Vergata University of Rome. The topic and the approach were strongly influenced by issues that Gerhard Kubik

believed should have been addressed for a long time, such as the attention to cultural and social dynamics, with a specific emphasis on the creativity of individuals. Beside his keynote address, Music Traditions, Change and Creativity in Africa includes the contributions presented by scholars from different countries, particularly active in the East African area and in dialogue with Italian researchers who have field experience in

the same region. Music Traditions, Change and Creativity in Africa is the first monograph of a series of volumes connected and inspired to the journal *Etnografie Sonore / Sound Ethnographies* ([www.soundethnographies.it](http://www.soundethnographies.it)), which Giorgio Adamo and his colleagues recently founded. Along with the papers multimedia contents are also available online.

In the first critical study wholly devoted to Joseph Conrad's use of techniques associated with the literary tradition of romance, Baxter explores the ways in which Conrad borrows from, alludes to, and subverts the tropes of romance. Baxter examines not only familiar novels like *Lord Jim* but also less-studied works such as *Romance* and *The Rover*. Her

study enables a new appreciation of the ways in which Conrad continued to experiment, even in his later fiction, and of the ethical import of that aesthetic experimentation.

"The Ellington Century is a wonderful journey through the world of music and art. If you are already an aficionado of Ellington's music, you will enjoy the author's informative and detailed analysis of the composer's work and musical influences. If you are less familiar, this book puts Ellington's music in perspective with the great 'classical' composers of the twentieth century. David Schiff's remarkable insight into the

historical and musical parallels between these composers is a delight to read and his references are vast, from Schoenberg's *Pierrot Lunaire* and Stravinsky's *Agon* to television's *Sesame Street*. Schiff writes with a sense of humor and an enthusiasm for Ellington's music that comes out on every page."—George Manahan, Music Director, American Composers Orchestra "David Schiff points us forward, observing that 'Ellington's music asks us to see with our ears and hear with our eyes.' Writing as a composer and scholar, he has a gift for making complex ideas strikingly clear. His insights move across a huge terrain of twentieth-century culture, as he builds bridges in his musical and cultural analysis where many have not seen a

connection. Yet each musical work, each artist, is given his or her equal due. In this sense, he has met the spiritual and cultural challenge of Ellington's life work."—Marty Ehrlich, Composer/Instrumentalist, Associate Professor of Improvisation and Contemporary Music, Hampshire College *Music Traditions, Change and Creativity in Africa* IAP

With Mande Music, Eric Charry offers the most comprehensive source available on one of Africa's richest and most sophisticated music cultures. Using resources as disparate as early Arabic travel accounts, oral histories, and archival research as well as his own

extensive studies in Mali, Guinea, Senegal, and the Gambia, Charry traces this music culture from its origins in the thirteenth-century Mali empire to the recording studios of Paris and New York. He focuses on the four major spheres of Mande music—hunter's music, music of the jelis or griots, jembe and other drumming, and guitar-based modern music—exploring how each evolved, the types of instruments used, the major artists, and how each sphere relates to the others. With its maps, illustrations, and musical transcriptions as well as an exhaustive bibliography, discography, and videography, this book is essential reading for those seeking an in-depth look at one of the most exciting, innovative, and deep-rooted phenomena on the world music scene. A compact

disc is available separately.

Volumes 3 and 4 of the The Encyclopedia of More Great Popular Song Recordings provides the stories behind approximately 1,700 more of the greatest song recordings in the history of the music industry, from 1890 to today.

In this masterful survey, all genres of popular music are covered, from pop, rock, soul, and country to jazz, blues, classic vocals, hip-hop, folk, gospel, and ethnic/world music. Collectors will find detailed discographical data—recording dates, record numbers, Billboard chart data, and personnel—while music lovers will appreciate the detailed commentaries and deep research on the songs, their recording, and the artists. Readers who revel in pop cultural history will savor each chapter as it plunges deeply into key events—in music, society, and the world—from each era of the past 125 years. Following in the wake of the first two volumes of his original *Encyclopedia of Great Popular Song Recordings*, this follow-up work covers not only more beloved classic

performances in pop music history, but many lesser-known but exceptional recordings that—in the modern digital world of “long tail” listening, remastered recordings, and “lost but found” possibilities—Sullivan mines from modern recording history. The *Encyclopedia of Great Popular Song Recordings, Volumes 3 and 4* lets the readers discover, and, through their playlist services, from such as iTunes to and Spotify, build a truly deepcomprehensive catalog of classic performances that deserve to be a part of every passionate music lover’s life. Sullivan organizes songs in chronological order, starting in 1890 and continuing all the way through to the present to include modern gems from June 2016. In each chapter, Sullivanhe immerses readers,

era by era, in the popular music recordings of the time, noting key events that occurred at the time to painting a comprehensive picture in music history of each period for each song. Moreover, Sullivan includes for context bulleted lists noting key events that occurred during the song's recording

The legendary Greek figure Orpheus was said to have possessed magical powers capable of moving all living and inanimate things through the sound of his lyre and voice. Over time, the Orphic theme has come to indicate the power of music to unsettle, subvert, and ultimately bring down oppressive realities in order to liberate the soul and expand human life without limits. The

liberating effect of music has been a particularly important theme in twentieth-century African American literature. The nine original essays in *Black Orpheus* examines the Orphic theme in the fiction of such African American writers as Jean Toomer, Langston Hughes, Claude McKay, James Baldwin, Nathaniel Mackey, Sherley Anne Williams, Ann Petry, Ntozake Shange, Alice Walker, Gayl Jones, and Toni Morrison. The authors discussed in this volume depict music as a mystical, shamanistic, and spiritual power that can miraculously transform the realities of the soul and of the world. Here, the musician uses his or her music as a weapon to shield and protect his or her spirituality. Written by scholars of English, music, women's studies,

American studies, cultural theory, and black and Africana studies, the essays in this interdisciplinary collection ultimately explore the thematic, linguistic structural presence of music in twentieth-century African American fiction.

A loving portrayal of our precious planet that offers easy-to-grasp discussions of scientific concepts and detailed examinations of Earth's tectonic, biological, and paleontological forces... Did you know that the history of Earth can be revealed by examining everything on it? From the esoteric science of minerals to the interactions between humans and their environment, our planet provides answers to every question we could ask about its history and what lies ahead. As climate change impacts everything we do on our planet, now is the time to take a closer look at what messages Earth has for us: what does it mean when the wind blows or the ground shifts? In this book, geologist Elisabeth Ervin-Blankenheim reveals the history of our planet through a geologic

lens and explains why everyone should care about it. *Song of the Earth* is a thrilling biography of our planet that equips readers with the scientific, historical, and philosophical symbiosis between humans and Earth. Ervin-Blankenheim explores geologic principles of deep time, plate tectonics, and change in life forms in plain English. The book is illustrated with striking maps, diagrams, and pictures, allowing her to dissect everything from how a roiling, molten planet cooled to how the first cyanobacteria began to oxygenate the atmosphere to how the atmosphere has changed over time. Ervin-Blankenheim journeys through the science with ease and provides narrative sections about pioneering geologists and their groundbreaking discoveries. In

viewing the planet as the integrated ecosystem it is, Ervin-Blankenheim showcases how land, water, life, and the atmosphere maintain an elegant yet delicate balance--one that, based on the author's evidence of current trends in the context of past planetary cataclysm, appears to be under imminent threat. At times both gripping and lovingly poetic, *Song of the Earth* shows not only how Earth has influenced life, but also how life has distinctly shaped our planet. *Traditions, Institutions, and American Popular Music* Oxford University Press Music, Health, and Power offers an original, on-the-ground analysis of the role that music plays in promoting healthy communities. The book brings the reader inside the world of kanyeleng fertility societies and HIV/AIDS support

groups, where women use music to leverage stigma and marginality into new forms of power. Drawing on ethnographic research conducted over a period of 13 years (2006–2019), the author articulates a strengths-based framework for research on music and health that pushes beyond deficit narratives to emphasize the creativity and resilience of Gambian performers in responding to health disparities. Examples from Ebola prevention programs, the former President’s AIDS “cure,” and a legendary underwear theft demonstrate the high stakes of women’s performances as they are caught up in broader contestations over political and medical authority. This book will be of interest to scholars and students of ethnomusicology, medical anthropology,

and African studies. The accompanying audio examples provide access to the women’s performances discussed in the text.

This classic reference work, the best one-volume music dictionary available, has been brought completely up to date in this new edition. Combining authoritative scholarship and lucid, lively prose, the Fourth Edition of *The Harvard Dictionary of Music* is the essential guide for musicians, students, and everyone who appreciates music. The *Harvard Dictionary of Music* has long been admired for its wide range as well as its reliability. This treasure trove includes entries on all the styles and forms in Western music; comprehensive articles

on the music of Africa, Asia, Latin America, and the Near East; descriptions of instruments enriched by historical background; and articles that reflect today's beat, including popular music, jazz, and rock. Throughout this Fourth Edition, existing articles have been fine-tuned and new entries added so that the dictionary fully reflects current music scholarship and recent developments in musical culture. Encyclopedia-length articles by notable experts alternate with short entries for quick reference, including definitions and identifications of works and instruments. More than 220 drawings and 250 musical examples enhance the text. This is an invaluable book that no music lover can afford to be without.

Traditionally, American educators and communities have looked to Europe and Asia for ideas for rethinking and reforming education for America's diverse children. This book, *Contemporary Voices from the Margin: African Educators on African and American Education*, brings together new voices of diverse African-born teacher educators and Africanist scholars who share personal experiences as well as researchbased perspectives about education in Africa and America that will be valuable to rethinking and reforming education for America's struggling schools. The book is a comprehensive work of experienced educators and scholars in the field of

teacher education and African Studies. The editors of the book invited a diverse group of African-born teacher educators and scholars from different countries of Africa who teach in the U.S. The contributors share a common African experience, but they are geographically diverse in countries of origin and research. Their knowledge about African communal living as well as colonial powers and imperialism as they operated in various African countries enables them to compare and contrast various educational models and practices, including traditional ones. They are also diverse in their fields of specialization but have expertise in multicultural education, urban education, and culturally responsive pedagogy that have become the focus of

U.S. discourses in public education and teacher preparation programs. Given that these scholars were born or socialized, and educated in, as well as, taught schools and colleges in their respective African countries before settling in the United States, they bring a wealth of experience and insights into what it means to successfully educate children and youth. The book is divided into three parts. Part 1 examines African processes and practices of education, both formal and informal, as contributing authors share perspectives about African indigenous education including cultural socialization and formal western-type education and organization of schools. Part 2 focuses on patterns and structures of formal, western-type education in selected African countries.

Part 3 explores cross-cultural perspectives on American education. The contributors provide chapters of stimulating and rich perspectives that will engage the discourse on rethinking and reforming education and schooling for America's diverse students.

The world of Sub-Saharan African music is immensely rich and diverse, containing a plethora of repertoires and traditions. In *The African Imagination in Music*, renowned music scholar Kofi Agawu offers an introduction to the major dimensions of this music and the values upon which it rests. Agawu leads his readers through an exploration of the traditions, structural elements, instruments, and performative techniques that characterize the music.

In sections that focus upon rhythm, melody, form, and harmony, the essential parts of African music come into relief. While traditional music, the backbone of Africa's musical thinking, receives the most attention, Agawu also supplies insights into popular and art music in order to demonstrate the breadth of the African musical imagination. Close readings of a variety of songs, including an Ewe dirge, an Aka children's song, and Fela's 'Suffering and Smiling' supplement the broader discussion. *The African Imagination in Music* foregrounds a hitherto under-reported legacy of recordings and insists on the necessity of experiencing music as sound in order to appreciate and understand it fully. Accordingly, a Companion Website features important

examples of the music discussed in detail in the book. Accessibly and engagingly written for a general audience, *The African Imagination in Music* is poised to renew interest in Black African music and to engender discussion of its creative underpinnings by Africanists, ethnomusicologists, music theorists and musicologists.

Singing has been a characteristic behaviour of humanity across several millennia. Chorus America (2009) estimated that 42.6 million adults and children regularly sing in one of 270,000 choruses in the US, representing more than 1:5 households. Similarly, recent European-based data suggest that more

than 37 million adults take part in group singing. The Oxford Handbook of Singing is a landmark text on this topic. It is a comprehensive resource for anyone who wishes to know more about the pluralistic nature of singing. In part, the narrative adopts a lifespan approach, pre-cradle to senescence, to illustrate that singing is a commonplace behaviour which is an essential characteristic of our humanity. In the overall design of the Handbook, the chapter contents have been clustered into eight main sections, embracing fifty-three chapters by seventy-two authors, drawn from across the world, with each chapter illustrating and illuminating a particular aspect of singing. Offering a multi-disciplinary perspective embracing the arts and humanities, physical, social and clinical

sciences, the book will be valuable for a broad audience within those fields.
