Comment situer la troupe amateur par rapport à la compagnie professionnelle ? L'auteur interroge ici le fonctionnement de ces entreprises théâtrales et les aborde comme le produit du "travail" de groupe d'individus, de leurs négociations et de leurs conflits, internes et externes. Entre appartenance organique et compromis d'intérêt, à la fois fournisseurs de lien social et fournisseurs d'emploi, ces organisations théâtrales se situent au croisement des mondes domestique et marchand, à la croisée des sphères privée et publique.

The Oxford Handbook of French Politics provides a comprehensive and comparative overview of the French political system through the lens of political science. The Handbook is organized into three parts: the first part identifies foundational concepts for the French case, including chapters on republicanism and social welfare; the second part focuses on thematic large-scale processes, such identity, governance, and globalization; while the third part

examines a wide range of issues relating to substantive politics and policy, among which are chapters on political representation, political culture, social movements, economic policy, gender policy, and defense and security policy. The volume brings together established and emerging scholars and seeks to examine the French political system from a comparative perspective. The contributors provide a state-of-the-art review both of the comparative scholarly literature and the study of the French case, making The Oxford Handbook of French Politics an invaluable resource for anyone interested in the foundations of contemporary political life in France.

This book addresses the epistemological, ethical and methodological challenges faced by African scholars in their research practices. The epistemological domain addresses three interrelated topics: how African university students ethnocentric choice of research topics hampers the production of knowledge; researchers adaptation of their research methods to improve validity; and the challenge of knowledge production on community museums plagued by gross inertia, irregularities, uncooperative gatekeepers and inadequate funding. The methodological domain foregrounds issues around scientific rigour, the criteria for what counts as quality research, and reporting standards. Contributors contend that the use of mixed methods provides the best scope for the effective study and evaluation of social issues. They also detail how better-funded projects tend to improve the respect of ethical standards especially as they pertain to the protection of subjects confidentiality. Self-financed researchers on the other hand tend to be less compliant, a challenge that afflict especially younger and inexperienced researchers. This volume thus contributes not only to a critical understanding of the challenges faced by social scientists in contemporary Africa, but also the prospects and mechanisms on how to improve knowledge production processes.

Policing reveals much about rural society. It refers to the way that the police, the public and other agencies regulate themselves and each other according to the dominant ideals of society. This can be formally, through the ever-growing spectrum of policing partnerships in neo-liberal countries, or informally, through the performance and enforcement of moral codes and values. This book draws on international inter-disciplinary perspectives to examine the range and consequences of policing across different rural localities. Rural Policing and Policing the Rural is organised into two sections: the first examines who is policing rural areas, while the second examines the nature of rural policing by considering, on the one hand, the policing of rural space and, on the other, how ideas of rurality are regulated. In doing so this book provides a survey of rural policing that will be valuable to academics, students, policy makers and those policing rural places.

La sociologie des organisations est un domaine central de la sociologie. L'ouvrage s'attache à considérer les grands courants théoriques en sociologie des organisations comme des visions spécifiques du comportement de l'homme au travail. Il propose un regard réflexif sur l'origine de la discipline, son évolution, et son actualité, en mobilisant l'apport de la sociologie pour interroger des thématiques contemporaines (« lean management », « entreprise libérée », « new public management » en particulier). The Muslim charity sector is stronger than ever, attracting thousands of volunteers and millions of pounds in donations. In times of mobile internet and social media, young people have set up small scale charities in urban areas, providing general social services to Muslims and non-Muslims alike. Breaking away from bureaucratic non-governmental organisations and traditional faith-based charities, these smaller local associations are an attractive alternative to young people. This book offers an exploration of the Muslim charity sector, from multi-million pound NGOs to discrete grassroots charities who are quietly giving rise to the next generation of Muslim entrepreneurs, scholars, politicians and other influencers. From studies of eleven charities across France, Poland and the UK, it investigates key questions around this young and dynamic movement. What motivates these young Muslim volunteers? What shapes the socially-engaged behaviour of young Muslims? What is the place and the role of Islam in their involvement and commitment to their causes? What social impact do these organisations have in their local area? How do they understand religion, faith, participation and citizenship? What challenges do they face and how do they overcome these? The book also examines how these grassroots are successful in helping to prevent extremism, curb Islamophobia and challenge colonialism. The analysis of these small, local and original initiatives is fundamental in understanding the role of religiosity for these younger generations who are trying to articulate their multiple identities, cultures and traditions in a modern, secular society. Rich, detailed and vivid, the book sheds new lights on a popular field of research, unveiling exclusive key information on the subject of young European Muslims.
